The #1 New York Times bestseller. Over 4 million copies sold! Tiny Changes, Remarkable Results No matter your goals, Atomic Habits offers a proven framework for improving--every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven

ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to:

- make time for new habits (even when life gets crazy);
- overcome a lack of motivation and willpower;
- design your environment to make success easier;
- get back on track when you fall off course; ...and much more.

Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits—whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

A transformative guide to building more fulfilling relationships with colleagues, friends, partners, and family, based on the landmark Interpersonal Dynamics ("Touchy-Feely") course at Stanford's Graduate School of Business "Carole Robin and David Bradford are masters at helping people bring IQ and EQ together to satisfy both and be successful."—Ray Dalio, founder of Bridgewater and author of Principles: Life and Work The ability to create strong relationships with others is crucial to living a full life and becoming more effective at work. Yet many of us find ourselves struggling to build solid personal and professional connections or unable to handle challenges that inevitably arise when we grow closer to others. When we find ourselves in an exceptional relationship—the kind of relationship in which we feel fully understood and supported for who we are—it can seem like magic. But the truth is that the process of building and sustaining these relationships can be described, learned, and applied. David Bradford and Carole Robin taught interpersonal skills to MBA candidates for a combined seventy-five years in their legendary Stanford Graduate School of Business course Interpersonal Dynamics (affectionately known to generations of students as "Touchy-Feely") and have coached and consulted hundreds of executives for decades. In Connect, they show readers how to take their relationships from shallow to exceptional by cultivating authenticity, vulnerability, and honesty, while being willing to ask for and offer help, share a commitment to growth, and deal productively with conflict. Filled with relatable scenarios and research-backed insights, Connect is an important resource for anyone hoping to improve existing relationships and build new ones at any stage of life.

#1 NEW YORK TIMES BESTSELLER • In her latest book, Brené Brown writes, "If we want to find the way back to ourselves and one another, we need language and the grounded confidence to both tell our stories and be stewards of the stories that we hear. This is the framework for meaningful connection." In Atlas of the Heart, Brown takes us on a journey through eighty-seven of the emotions and experiences that define what it means to be human. As she maps the necessary skills and an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances—a universe where we can share and steward the stories of our bravest and most heartbreaking moments with one another in a way that builds connection. Over the past two decades, Brown's extensive research into the experiences that make us who we are has shaped the cultural conversation and

helped define what it means to be courageous with our lives. Atlas of the Heart draws on this research, as well as on Brown's singular skills as a storyteller, to show us how accurately naming an experience doesn't give the experience more power—it gives us the power of understanding, meaning, and choice. Brown shares, "I want this book to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing ourselves."

Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them.
