Developing Continuing Professional Education Programs EduGorilla

This guide highlights the many forces
driving professionals to seek continuing

education: rapidly changing information; new technological developments; mandated credit to maintain licenses and professional certification; emerging professions struggling to define their competencies; and development changes in adults that affect career practices. In developing programs for professionals, common themes run across settings and groups. The guide focuses on these similarities and helps experienced continuing professional education (CPE) planners. CPE begins at the point when formal education ends and professional practice starts. Seven topics important to the CPE planner are addressed: (1) professionals as learners; (2) professionals in society; (3) providers of CPE; (4) regulation of professions and implications for CPE; (5) a planning

framework; (6) competencies of a CPE planner; and (7) useful tools for planning. The guide contains 42 references and 7 appendices: (1) needs assessment methods; (2) learning objectives; (3) categories of instructional format; (4) seating arrangements; (5) sample evaluation questions; (6) building a program budget; and (7) timetable for program development activities. Women in Science and Technology: Confronting Inequalities comprehensively explores women's status in the Science and Technology (S&T) domain by rigorously analysing and interpreting extensive recent information on major areas such as engineering, medicine, physical

sciences, biosciences and mathematics. The book forcefully demonstrates that gender-based differences and expectations play the determining role in limiting women's participation in S&T. These exist in various forms, from making subject choices in school and opting for specific disciplines in college to embracing specific career avenues such as scientific research. This book shows how the construction of gendered identities is perpetuated through a masculine culture in the informal environment of elite educational institutes and in major S&T workplaces such as academia and research laboratories, which serve together to exclude women from peer groups and opportunities for advancement. The book makes substantive

recommendations for policy measures on college admissions, improvement of institutional and organizational environments, and recruitment and capacity building for women in S&T. It calls for substantially reducing the myriad societal and familial barriers through cooperation and understanding.
