A vector is what is needed to "carry" the point A to the point B; the Latin word vector means "one who

carries". Introduction to the mathematics of general relativity ... Mathematics is also the language of the universe, from the electrochemical signals in our brain to the equations of General Relativity which govern the motion of stars and galaxies everywhere in the universe. It is one of humanity's most noble endeavours to understand the universe we live in, and that would not be possible without mathematics.
