There are many ways of designing a motorcycle, but it takes a great deal of artistic sensitivity to create a legend from only two cylinders. That is exactly what Moto Guzzi, the prestige manufacturer in Mandello del Lario, has done. Active in motorcycle construction since 1920, particularly in the years after 1945 it created motorcycles that made history, especially those with the powerful V-twin engine installed lengthwise in the chassis. For forty years the V-twin four-stroke engine has been the Italian company's flagship. The fine Italians, Le Mans, and California types, and the small 125s, 250s and 350s are described here with accuracy and detail. This comprehensive volume describes all models and technical details. As is the style of the authors, they also provide background information about the company and the industry. It is not all about machines and horsepower, but also the people who put their stamp on the operations: not only a treat for fans of serious technical information, but a gripping story as well.

This report presents the results of the project Safe Future Inland Transport Systems (SafeFITS),

which aims to develop a robust road safety decision-making tool to support the most appropriate road safety policies and measures to achieve tangible results. Road accidents constitute a major social problem in modern societies, accounting for more than 1 million accidents per year in EU-28 (2,900 per day), resulting in 1.4 million injuries and 26,000 fatalities. Current trends suggest that, unless action is taken, traffic injuries will become the fifth leading cause of death by 2030, with the disparity between high-income and low-income countries further increased.

*Manual of Urologic Surgery* Schiffer Military History

As a child, Philip Sherlock loved to listen to folk tales. Since then he has made a significant contribution to Caribbean folklore by recording many of them in print for the first time. Here are fables of the birds and animals of the West Indies: jaguar, snake, crested curassow, wild pig, parrot, wise owl, and of Anansi--the spider who can assume human form. These twenty-one stories are a wonderful mixture of early tales from the Arawak and the Carib people, the original inhabitants of the Caribbean, and from the Ashanti people of West Africa. Read together they help to provide a background to the history of the West Indies. The stories are retold here in a warm, rich style--some tales gentle and philosophical, some humorous and full of action.

This serial was established under the editorship of Dr. Norman R. Ellis in 1966. As a result of his editorial effort and the contributions of many authors, the serial is now recognized as the area's best source of reviews of behavioral research on mental retardation. From its inception, active research scientists and graduate students in mental retardation have looked to this serial as a major source of critical reviews of research and theory in the area.

Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly

Faibyshev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel Dublin Haynes Manuals N. America, Incorporated  
Without deifying its subject, this biography looks at the life of Nelson Mandela, placing his awe-inspiring political accomplishments into historical context for young readers.

Want to learn to program in Windows but don't know where to start? Look no further! This book is designed to teach you how to develop Windows applications using Microsoft Visual Basic 2008 Express. To help make learning fun and interesting, you will learn how to program through the development of computer games, and you will develop a new game that reinforces a newly learned concept in each chapter. It's the easiest way to learn! By the time you have finished the book, not only will you have access to a collection of working sample scripts, you also will have laid a foundation upon which you can begin to tackle real-world challenges and new languages. Whether you are an experienced programmer looking for a jumpstart on learning Visual Basic 2008 Express, or a first-timer looking for a friendly programming language and a book that will help you to begin your programming career, you will be happy with what this book has in store for you!

**Yamaha YZF-R1 1998-2003** Haynes Manuals N. America, Incorporated

The color photographs and illustrations appearing in select monographs over the past decade represent a significant advance in surgical communication. Previously, black and white renderings were standard because color printing had not been perfected and its cost was prohibitive. We believe the gradual change from black and white etchings and reproductions to detailed color illustrations represents a tremendous twentieth century achievement. In our own urologic practices it became evident that the use of black and white sketches for teaching operative urology, while helpful, left too much to the surgeon's imagination. Even the dimension of depth, produced by varying the intensity of shading, often was inadequate in demonstrating subtle surgical details in a fossa or bed. Since color photography recently has been used to demonstrate operative techniques, we climbed on the bandwagon and photographed in color many of the major operative procedures. However, the reflection of light caused by normal tissue fluid significantly reduces the clarity of photographs. Not infrequently, the crucial operative step is obscured by light reflected on a trickle of blood. Even when meticulous care is taken to irrigate and clean the surgical field, the tissue sheen obscures portions of the field. Color paintings by a gifted artist are not only unique, but can be extraordinary; the vividness with which subtleties can thus be portrayed cannot be matched by photography, black and white or color.
