National Geographic Learning

Algebra doesn't have to consist of solving hundreds of apparently meaningless problems! These worksheets, while they include abstract problems to help the student practice the skills, also include real-life problems that allow the student to remember the purpose of what they're learning, give them a chance to explore God's handiwork, and equip them to apply math outside of a textbook. Easy-to-use daily schedule Carefully graduated problems to help students learn the material Built-in review of concepts Problems that let the students apply algebra to real-life settings Perforated pages to tear out and hand students Chapter quizzes and quarter tests, along with a final exam

Blake Taylor's mother first suspected he

had ADHD when he, at only three years of

age, tried to push his infant sister in her

carrier off the kitchen table. As time went

by, Blake developed a reputation for being

hyperactive and impulsive. He launched

rockets (accidentally) into neighbor's

swimming pools and set off alarms in

museums. Blake was diagnosed formally

with ADHD when he was five years old. In

ADHD and Me, he tells about the next

twelve years as he learns to live with both

the good and bad sides of life with ADHD.
