Ecoliterate Routledge

A new integration of Goleman's emotional, social, and ecological intelligence. Hopeful, eloquent, and bold, Ecoliterate offers inspiring stories, practical guidance, and an exciting new model of education that builds - in vitally important ways - on the success of social and emotional learning by addressing today's most important ecological issues. This book shares stories of pioneering educators, students, and activists engaged in issues related to food, water, oil, and coal in communities from the mountains of Appalachia to a small village in the Arctic; the deserts of New Mexico to the coast of New Orleans; and the streets of Oakland, California to the hills of South Carolina. Ecoliterate marks a rich collaboration between Daniel Goleman and the Center for Ecoliteracy, an organization best known for its pioneering work with school gardens, school lunches, and integrating ecological principles and sustainability into school curricula. For nearly twenty years the Center has worked with schools and organizations in more than 400 communities across the United States and numerous other countries. Ecoliterate also presents five core practices of emotionally and socially engaged ecoliteracy and a professional development guide.

Announcing the biggest, best, most innovative book ever on paper craft. Even better, this is not about how to use costly, artsy paper, but how to turn stuff around the house—magazines and shopping bags, candy wrappers and paint sample cards, wrapping paper, old maps, and paper towel tubes—into stunning jewelry, gifts, home decor, party favors, and much more. Chances are you've seen the author's cutting-edge work in the windows of Anthropologie, where she is the chain's merchandising manager. An inveterate crafter who creates projects and styles photo shoots for magazines like *Parents* and *Vogue Knitting*, Kayte Terry takes the most versatile of materials and the most basic of crafts (remember snipping valentines out of construction paper?), and creates something completely transformative. Turn a sheaf of any white or graph paper into an amazing Scrap Happy Globe Lantern for the dining room. Fashion colored tissue paper into Songbird Votives, leftover raffle tickets into a Prizewinning Bowl,

that out-dated pile of holiday catalogs into a picture frame. There's a necklace made of playing cards, a gum wrapper bracelet, and barrettes made by quilling—a paper technique that goes back to the Renaissance. Every project is photographed in full color, and includes step-by-step illustrations and instructions. Truly a book that shows how to think outside the (cardboard) box. *Implementation Monitoring and Process Evaluation Workman Publishing*

Paper dolls might seem the height of simplicity—quaint but simple toys, nothing more. But through the centuries paper figures have reflected religious and political beliefs, notions of womanhood, motherhood and family, the dictates of fashion, approaches to education, individual self-image and self-esteem, and ideas about death. This book examines paper dolls and their symbolism—from icons made by priests in ancient China to printable Kim Kardashians on the Internet—to show how these ephemeral objects have an enduring and sometimes surprising presence in history and culture.

*I'm Working On That Rowman & Littlefield*

Writing high-quality papers suitable for publication within international scientific journals is now an essential skill for all early-career researchers; their career progression and the reputation of the department in which they work depends upon it. However, many manuscripts are rejected or sent back for major

re-working not because the science they contain is in any way 'bad', but because the same problems keep occurring in the way that the material is presented. It is one thing to write a good scientific paper, however it is quite another thing to get it published. This requires some additional nous. In writing this book Don Harris draws upon nearly a quarter of a century of experience as an author and reviewer of research papers, and ultimately as a journal editor. By his own admission, it contains all the things he wished that his mentors had told him 25 years ago, but didn't. The material in the book is drawn from many years of finding all these things out for himself, usually by trial and error (but mostly error!). The text adopts a much lighter touch than is normally found in books of this type - after all, who really wants to read a book about writing research papers? The author describes his own unique approach to writing journal papers (which, in his own words, has proved to be extremely successful). All major points are illustrated with examples from his own, published works. The book is written in the form of a manual for constructing a journal manuscript: read a chapter, write a section. However, the material it contains goes beyond just this and also describes how to select a target journal, the manuscript submission process, what referees are looking for in a good journal paper, and how to deal with the referees' comments. Each chapter concludes with a checklist to ensure all the key elements have been addressed. [Download the Previous Year's Paper for LIC Assistant exam here!](#) Springer

A Texas map marked with three red dots like drops of blood. A serial killer who claims to have dementia. A mysterious young woman who wants answers. What could go wrong? FINALIST FOR THE ITW THRILLER AWARD • "Fast and furious . . . You'll never see what's coming."—The Washington Post Years ago, her sister Rachel vanished. To find the truth, she proposes a dangerous idea: a ten-day road trip with a possible serial killer to examine cold cases linked to his haunting photographs. Is he a liar or a broken old man? Is he a pathological con artist—or is she? You won't see the final, terrifying twist spinning your way until the very last mile.
