American Law from a Catholic Perspective Harvard University Press

The Carol J. Adams Reader gathers together Adams's foundational and recent articles in the fields of critical studies, animal studies, media studies, vegan studies, ecofeminism and feminism, as well as relevant interviews and conversations in which Adams identifies key concepts and new developments in her decades-long work. This volume, a companion to *The Sexual Politics of Meat* (Bloomsbury Revelations), offers insight into a variety of urgent issues for our contemporary world: Why do

batterers harm animals? What is the relationship between genocide and attitudes toward other animals? How do activism and theory feed each other? How do race, gender, and species categories interact in strengthening oppressive attitudes? In clear language, Adams identifies the often hidden aspects of cultural presumptions. The essays and conversations found here capture the decades-long energy and vision that continue to shape new ways of thinking about and responding to oppression.

Edited by Ronald J. Rychlak, *American Law from a Catholic Perspective* is one of the most comprehensive surveys of American legal topics by major Catholic legal scholars.

Contributors explore bankruptcy, corporate law, environmental law, family law, immigration, labor law, military law, property, torts, and several different aspects of constitutional law, among other subjects. Readers will find probing arguments that bring to bear the critical perspective of Catholic social thought on American legal jurisprudence. Essays include Michael Arians's account of Catholicism in the intellectual discipline of legal history, William Saunders's assessment of human rights and Catholic social teaching, Hadley Arkes's look at the place of Catholic social thought with respect to bioethics, and many others on major legal topics and their intersection with Catholic social teaching. *American Law from a Catholic Perspective* is essential reading for all Catholic lawyers, judges, and law students, as well as an important contribution to non-Catholic readers seeking guidance from a faith tradition on questions of legal jurisprudence. Based on well-developed and established ideas in Catholic social thought, the evaluations, suggestions, and remedies offer ample food for thought and a basis for action in the realm of legal scholarship.

In this innovative study of the South Carolina Low Country, author Stephanie McCurry explores the place of the yeomanry in plantation society--the complex web of domestic and public relations within which they were enmeshed, and the

contradictory politics of slave society by which that class of small farmers extracted the privileges of masterhood from the region's powerful planters. Insisting on the centrality of women as historical actors and gender as a category of analysis, this work shows how the fateful political choices made by the low-country yeomanry were rooted in the politics of the household, particularly in the customary relations of power male heads of independent households assumed over their dependents, whether slaves or free women and children. Such masterly prerogatives, practiced in the domestic sphere and redeemed in the public, explain the yeomanry's deep commitment to slavery and, ultimately, their ardent embrace of secession. By placing the yeomanry in the center of the drama, McCurry offers a significant reinterpretation of this volatile society on the road to Civil War. Through careful and creative use of a wide variety of archival sources, she brings vividly to life the small worlds of yeoman households, and the larger world of the South Carolina Low Country, the plantation South, and nineteenth-century America. *Exploring the Decolonial Imaginary* Westminster John Knox Press

Part of the Gibbs Smith Women's Voices series: A collection of literary voices written by, and for, extraordinary women—to encourage, challenge, and inspire. By the matriarch of feminism, Mary Wollstonecraft, *A Vindication of the Rights of Women* tackles womens-rights-as-human-rights decades before the women's suffrage movement began. In what is widely considered the very first feminist manifesto, Wollstonecraft argues on behalf of women's natural intellect and character—considered radical at the time, her writing has paved the way of progress for generations to come. Voices series with *Jane Eyre*, by Charlotte Bronte and *Hope Is the Thing with Feathers*, the complete poems of Emily Dickinson.

This study explores two categories—empire and citizenship—that historians usually study separately. It does so with a unifying focus on racialization in the lives of outstanding women whose careers crossed national borders between 1880 and 1965. It puts an individual, intellectual, and female face on transnational phenomena.

In Beyond Animal Rights, Josephine Donovan and Carol J. Adams introduced feminist "ethic of care" theory into philosophical discussions of the treatment of animals. In this new volume, seven essays from *Beyond Animal Rights* are joined by nine new articles—most of which were written in response to that book—and a new introduction that situates feminist animal care theory within feminist theory and the larger debate over animal rights. Contributors critique theorists' reliance on natural rights doctrine and utilitarianism, which, they suggest, have a masculine bias. They argue for ethical attentiveness and sympathy in our relationships with animals and propose a link between the continuing subjugation of women and the human domination of nature. Beginning with the earliest articulation of the idea in the mid-1980s and continuing to the theory's most recent revisions, this volume presents the most complete portrait of the evolution of the feminist-care tradition.

This reference book chronicles what American women did from the emergence of the republic through the end of World War I

and the passage of the Nineteenth Amendment. A broad spectrum of activities are depicted, showing their many accomplishments and how their activities affected the world around them. It was an era of great transition for all women. A who's who of American women and some men (those who showed great support or, ironically, great opposition to women's reform) are described one year at a time, beginning with 1789 and ending with 1920. Each year's activities are organized into seven possible categories: domesticity, work, education, religion, the arts, the law and politics, and joining forces. The book is thoroughly indexed.

The local public sector is deeply steeped in history. Studying the historic patterns of urban settlements helps us to understand the development of local priorities: zoning to separate residential areas by class and race, establishing police and fire departments to protect lives and property, building roads and canals to make transportation more efficient, and setting up school systems to educate students for work and adulthood. In this new book, the reader is guided through premodern conditions in order to identify paradigmatic changes that differentiate the premodern age from the modern age. The well-known contours of that transformation are then used to highlight trends that signal movements toward postmodernity. A great variety of books cover politics, policies, and governance at the local level. This book invites a more comprehensive look in that it structures the analysis around six basic themes: economics, politics and government, organization of work, education, human nature plus

related practices, and criminal justice; the book invites a historical perspective by using the six themes to clarify paradigmatic shifts from premodernity to modernity and now postmodernity. The paradigmatic changes are examined to ask important questions: What can local governments learn from premodernity and modernity to promote desirable developments and avert unfavorable trends in postmodernity? What are progressive and regressive strategies? What social, cultural, and economic principles and practices are worth promoting and which ones to discourage? The broad nature of the book makes it relevant to students, scholars, and experts of urban politics and policies, as well as city planning, economic planning, ethics, and related fields.

A Century of Votes for Women NYU Press

This book is an exercise in the recovery of historical memory about a set of thinkers who have been forgotten or purposely ignored and, as a result, never made it into the canon of Western political philosophy. Penny Weiss calls them "canon fodder," recalling the fate of soldiers in war who are treated by their governments and military leaders as expendable. Despite some real progress at recovery over the past few decades, and the now-frequent references to a few female thinkers like Mary Wollstonecraft, Hannah Arendt, and Simone de Beauvoir, the surface has only been scratched, and the rich resources of women's writings about political ideas remain still largely untapped. Included here, and intended to further whet the palate,

are figures from Sei Shōnagon, Christine de Pizan, and Mary Astell to Elizabeth Cady Stanton, Anna Julia Cooper, and Emma Goldman. Restoring female thinkers to the conversation of political philosophy is the primary goal of this book. Part I deploys a range of these thinkers to discuss the nature of political inquiry itself. Part II focuses on alternative approaches to and visions of core political ideas: equality, power, revolution, childhood, and community. While mainly an intellectual act of revival, this book also affects practical political life, because "remote and academic as they sometimes appear, debates about what to include in the canon ultimately touch almost everyone: students handed texts from lists of 'great books' to guide them . . . and citizens whose governments justify their actions with ideas from political texts deemed classic."

"[Adams] advocates an activism that reveals the truth about animal suffering and about women's lives."—Library Journal;" This book very usefully brings together Adams's thinking on animal defense as it has developed since the 1990 publication of her first book *The Sexual Politics of Meat*."—The Animals' Agenda; "Adams does for women and animals what the author of *Our Bodies, Ourselves* did for women's health. She proves insightfully that the 'unexamined meal is not worth eating.' "—Mary E. Hunt; "Adams's thinking is brilliant and original, and this volume belongs in every women's studies, theology, and environmental ethics collection."—Choice; "Carol Adams looks unsparingly at the way our culture has conditioned us to accept as normal the staggering cruelty inflicted daily on millions of animals. From theology to nutrition, from reproductive rights to pornographic

images, she shows how assumed male superiority to women and other others pervades our lives."—Jane Tompkins

The Civil War is remembered as a war of brother against brother, with women standing innocently on the sidelines. But battlefield realities soon challenged this simplistic understanding of women's place in war. Stephanie McCurry shows that women were indispensable to the unfolding of the Civil War, as they have been--and continue to be--in all wars.

Reading Feminist Theory: From Modernity to Postmodernity interweaves classical and contemporary writings from the social sciences and the humanities to represent feminist thought from the late eighteenth century to the present. Editors Susan Archer Mann and Ashly Suzanne Patterson pay close attention to the multiplicity and diversity of feminist voices, visions, and vantage points by race, class, gender, sexuality, and global location. Along with more conventional forms of theorizing, this anthology points to multiple sites of theory production--both inside and outside of the academy--and includes personal narratives, poems, short stories, zines, and even music lyrics. Offering a truly global perspective, the book devotes three chapters and more than thirty readings to the topics of colonialism, imperialism and globalization. It also provides extensive coverage of third-wave feminism, poststructuralism, queer theory, postcolonial theory, and transnational feminisms.

Letters have long been an outlet for political expression, whether they articulate the personal politics of the daily routine or the political views of individuals who witness or participate in dramatic events. In addition, letters can be unusually revealing records of the relations between men and women. Though letters have frequently been studied as a privileged space for literary, social, and cultural expression, the three-dimensional relationship of politics, gender, and letters has not been the focus of an entire volume. The nineteen essays in this collection examine how the gendered nature of political literacy is revealed over a 250-year period through letter writing, whether the writer is famous or unknown, the wife of a prominent politician or activist, a political prisoner or political militant. Ranging wide in terms of subject matter and geography, the contributors examine correspondence that ponders familial concerns, as well as letters providing political commentary on the effects of war or revolution on everyday life. Among the impressive group of international scholars are Jim Allen, Clare Brant, Edith Gelles, Jane Rendall, and Siân Reynolds.
