BRYSON YATES

To the Ends of the Earth HarperCollins
An encyclopedic compendium of the myths and actual events from humanity's ancient civilizations that reveal the influence of visitors from the 12th planet--

the Anunnaki • Offers easy access to the myriad characters and subjects covered by the seven books of The Earth Chronicles series

- Provides alphabetical listings to the terminology of ancient civilizations concerning their gods, kings, cultures, and religions
- Contains detailed summations, commentaries, and

instructions for locating topics within all the author's books The Earth Chronicles series, a historical and archaeological adventure into the origins of mankind and planet Earth, began with the publication of the bestselling The 12th Planet. The series is based on the premise that the myths from the world's earliest civilizations were in fact recollections of actual events and that the gods of ancient peoples were visitors to Earth from another planet--the Anunnaki, inhabitants of the 12th planet. The series' books include The 12th Planet, The Stairway to Heaven, The Wars of Gods and Men, The Lost Realms, When Time Began, The Cosmic Code, and The

End of Days, all products of the author's unmatched study of the ancient records of Sumer, Babylonia, Assyria, Israel, and Egypt and the civilizations of pre-Columbian America. Unearthing the hidden history of Earth and mankind, the series uses the past to unveil the meaning of the prophesied future. Zecharia Sitchin has created an encyclopedic compendium of the key figures, sites, concepts, and beliefs to provide a unique navigational tool through this entire opus. Entries are coded to indicate at a glance their cultural origin and contain summations, commentaries, and guidance for locating the topics within all of his books, including Genesis Revisited,

Divine Encounters, The Lost Book of Enki, The Earth Chronicles Expeditions, and Journeys to the Mythical Past.

Proving Einstein Right

PublicAffairs

Winner of the National Outdoor Book Award From the Pulitzer Prize-winning historian, a "suspenseful" (WSJ) and "adrenaline-fueled" (Outside) entwined narrative of the most adventurous year of all time, when three expeditions simultaneously raced to the top, bottom, and heights of the world. As 1909 dawned, the greatest jewels of exploration—set at the world's frozen extremes—lay unclaimed: the North and South Poles and the so-called "Third Pole," the pole of altitude, located in

unexplored heights of the Himalaya. Before the calendar turned, three expeditions had faced death, mutiny, and the harshest conditions on the planet to plant flags at the furthest edges of the Earth. In the course of one extraordinary year, Americans Robert Peary and Matthew Henson were hailed worldwide at the discovers of the North Pole; Britain's Ernest Shackleton had set a new geographic "Furthest South" record, while his expedition mate, Australian Douglas Mawson, had reached the Magnetic South Pole; and at the roof of the world, Italy's Duke of the Abruzzi had attained an altitude record that would stand for a generation, the result of the first

major mountaineering expedition to the Himalaya's eastern Karakoram, where the daring aristocrat attempted K2 and established the standard route up the most notorious mountain on the planet. Based on extensive archival and on-the-ground research, Edward J. Larson weaves these narratives into one thrilling adventure story. Larson, author of the acclaimed polar history *Empire of Ice*, draws on his own voyages to the Himalaya, the arctic, and the ice sheets of the Antarctic, where he himself reached the South Pole and lived in Shackleton's Cape Royds hut as a fellow in the National Science Foundations' Antarctic Artists and Writers

Program. These three legendary expeditions, overlapping in time, danger, and stakes, were glorified upon their return, their leaders celebrated as the preeminent heroes of their day. Stripping away the myth, Larson, a master historian, illuminates one of the great, overlooked tales of exploration, revealing the extraordinary human achievement at the heart of these journeys.

The Lost Realms (Book IV) Simon and Schuster
An in-depth analysis of Sitchin's revelations about the Anunnaki, early humanity, and Earth's future • Examines Sitchin's research into the Anunnaki arrival on Earth, the lineage of the Nefilim, their space travel technology, and

their creation of modern humans • Written by longtime Sitchin friend and colleague M. J. Evans, Ph.D., and draws upon her research and personal discussions with Sitchin • Explores the lust and lovemaking relationships of the Nefilim and suggests we inherited our warlike and love making tendencies from them Known for his provocative interpretations of ancient Sumerian and Akkadian clay tablets, Zecharia Sitchin (1920-2010) read the words of our most ancient ancestors as fact and, through decades of meticulous research, showed that these ancient tablets revealed a coherent narrative about the extraterrestrial

inhabitants of Earth and the origins of modern humanity. Drawing upon her many conversations with Zecharia Sitchin over nearly 20 years, M. J. Evans, Ph.D., longtime Sitchin friend and colleague, provides an in-depth analysis of Sitchin's revelations about the Anunnaki, focusing on Anunnaki activities on Earth and Earth's future. She explores the genesis of Sitchin's interest in the Nefilim, the leaders of the Anunnaki, and the controversy caused by the publication of Sitchin's first book, *The 12th Planet*. She examines Sitchin's research into the Nefilim family tree, the Anunnaki arrival on Earth to mine gold to repair the atmosphere on their planet, Nibiru,

and their creation of modern humans as workers for their mines and to build their civilization on Earth. She shows how, in the context of 21st-century technological capabilities, Sitchin's work casts a different light on ancient events, with implications for our future. The author reveals the details of the love and lust proclivities of the Nefilim gods Anu, Enlil, and Enki and the goddess Ishtar/Inanna and shows how we inherited these tendencies from our Anunnaki creators as well as their use of war for problem solving. Concluding with an examination of Sitchin's prediction of a nuclear event on Earth in our modern era, she shows how we would be repeating the

aggressive warlike behaviors of our Anunnaki creators, who may very well become our saviors when Nibiru next returns to our solar system.

When Time Began
(Book V) Ballantine Books

#1 NEW YORK TIMES BESTSELLER • From the author of *Killers of the Flower Moon* comes a masterpiece of narrative nonfiction that unravels the greatest exploration mystery of the twentieth century—the story of the legendary British explorer who ventured into the Amazon jungle in search of a fabled civilization and never returned.

"Suspenseful...rollicking." —The New York Times In 1925, Percy Fawcett went into the Amazon jungle, in

search of a fabled civilization. He never returned. Over the years countless perished trying to find evidence of his party and the place he called "The Lost City of Z." In this masterpiece, journalist David Grann interweaves the spellbinding stories of Fawcett's quest for "Z" and his own journey into the deadly jungle. Look for David Grann's new book, *The Wager*, coming in April 2023!

Sea of Glory Simon and Schuster

"A treasure of a book."—David McCullough The harrowing story of a pathbreaking naval expedition that set out to map the entire Pacific Ocean, dwarfing Lewis and Clark with its discoveries, from the New York Times bestselling author of

Valiant Ambition and In the Hurricane's Eye. A New York Times

Notable Book

America's first frontier was not the West; it was the sea, and no one writes more eloquently about that watery wilderness than Nathaniel Philbrick. In his bestselling *In the Heart of the Sea* Philbrick probed the nightmarish dangers of the vast Pacific. Now, in an epic sea adventure, he writes about one of the most ambitious voyages of discovery the Western world has ever seen—the U.S.

Exploring Expedition of 1838–1842. On a scale that dwarfed the journey of Lewis and Clark, six magnificent sailing vessels and a crew of hundreds set out to map the entire Pacific Ocean and

ended up naming the newly discovered continent of Antarctica, collecting what would become the basis of the Smithsonian Institution. Combining spellbinding human drama and meticulous research, Philbrick reconstructs the dark saga of the voyage to show why, instead of being celebrated and revered as that of Lewis and Clark, it has—until now—been relegated to a footnote in the national memory. Winner of the Theodore and Franklin D. Roosevelt Naval History Prize
The Anunnaki Chronicles Simon and Schuster
The Earth Chronicles series is based on the premise that mythology is not fanciful but the repository of ancient

memories; that the Bible ought to be read literally as a historic/scientific document; and that ancient civilizations--older and greater than assumed--were the product of knowledge brought to Earth by the Anunnaki, "Those Who from Heaven to Earth Came." The 12th Planet, the first book of the series, presents ancient evidence for the existence of an additional planet in the Solar System: the home planet of the Anunnaki. In confirmation of this evidence, recent data from unmanned spacecraft has led astronomers to actively search for what is being called "Planet X." The subsequent volume, *The Stairway to Heaven*, traces man's unending search

for immortality to a spaceport in the Sinai Peninsula and to the Giza pyramids, which had served as landing beacons for it--refuting the notion that these pyramids were built by human pharaohs. Recently, records by an eye witness to a forgery of an inscription by the pharaoh Khufu inside the Great Pyramid corroborated the book's conclusions. The Wars of Gods and Men, recounting events closer to our times, concludes that the Sinai spaceport was destroyed 4,000 years ago with nuclear weapons. Photographs of Earth from space clearly show evidence of such an explosion. Such gratifying corroboration of audacious conclusions has been even swifter

for The Lost Realms. In the relatively short interval between the completion of the manuscript and its publication, archaeologists, linguists, and other scientists have offered a "coastal theory" in lieu of the "frozen trekking" one to account for man's arrival in the Americas--in ships, as this volume has concluded. These experts have "suddenly discovered 2,000 years of missing civilization" in the words of a Yale University scholar--confirming this book's conclusion--and are now linking the beginnings of such civilizations to those of the Old World, as Sumerian texts and biblical verses. For the first time, the entire Earth Chronicles series

is now available in a hardcover collector's edition.

The Complete Earth Chronicles Bear

Reveals the course of archaeological adventures and insights that resulted in The Earth Chronicles series • Explores links between the Old world and the New in search of evidence of extraterrestrial gods in the artifacts and murals of ancient civilizations • Reveals archaeological cover-ups concerning Olmec origins in Mexico and ancient UFO artifacts in Turkey In this autobiographical book, the internationally acclaimed author Zecharia Sitchin reveals the foundational research and the adventurous expeditions that resulted in his writing

the bestselling The Earth Chronicles series. Ranging from Mayan temples in Mexico to hidden artifacts in Istanbul, Turkey, from biblical tunnels in Jerusalem to the mysteries of Mt. Sinai, from the abode of a Sumerian goddess to Greek islands, the Expeditions' destinations and amazing discoveries unmasked established fallacies, detected the fate of mysterious artifacts, and revealed ancient connections to modern space facilities. For the first time, Sitchin shares with the reader not only his encompassing knowledge of antiquity and his field experiences, but also the concrete evidence for his conclusions that ancient myths were recollections of factual

events, that the gods of ancient peoples were visitors to Earth from another planet, and that we are not alone in our own solar system. Accompanied by photographs from his personal archive, here is Sitchin's own story and his inner feelings about the cord that binds him to his ancestral past.

Divine Encounters

Feral House

In book five of the award-winning Austin Family Chronicles young adult series from Madeleine L'Engle, author of *A Wrinkle in Time*, Vicky Austin experiences the difficulties and joys of growing up. After a year in New York City and a summer with her grandfather, Vicky Austin returns to the rural connecticut village she grew up in--

and feels totally out of place. Then she meets Adam Eddington's Great Aunt Serena, who reminds her of her beloved grandfather, and she begins to find a comfortable, if not exciting, routine to her days. At Christmas, Serena gives Vicky a trip to Antarctica, to visit Adam. Vicky can't believe her luck. But the trip is not what Vicky imagined it would be. First of all, she doesn't know where she stands with Adam. He's pulled back, saying they are just friends. But weren't they more than that, Vicky thinks. And Vicky's fellow passengers are not what they seem or they are more than she knows. Finally, even Aunt Serena's motives are suspect, as Vicky discovers a journal that

belonged to Adam's famous uncle who disappeared many years earlier. As Vicky becomes more and more caught up in a mystery involving drugs, nuclear waste, and international espionage, she discovers that her assumptions about the world are hopelessly naive and that life, hers included, is as fragile as the ecosystem of Antarctica, the world's most remote continent.

 Over the years, startling evidence has been unearthed, challenging established notions of the origins of Earth and life on it and suggesting the existence of a superior

race of beings who once inhabited our world. The product of thirty years of intensive research, *The 12th Planet* is the first book in Zecharia Sitchin's prophetic Earth Chronicles series—a revolutionary body of work that offers indisputable documentary proof of humanity's extraterrestrial forefathers. Travelers from the stars, they arrived eons ago, and planted the genetic seed that would ultimately blossom into a remarkable species...called Man. *The 12th Planet* brings to life the Sumerian civilization, presenting millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki and of the landings of the Anunnaki on Earth

every 3,600 years, and reveals a complete history of the solar system as told by these early visitors from another planet. Zecharia Sitchin's Earth Chronicles series, with millions of copies sold worldwide, deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. The series is offered here, for the first time, in highly readable, hardbound collector's editions with enhanced maps and diagrams.

The Martian Chronicles Taylor & Francis

“An extraordinary real-life adventure of men battling the elements and themselves, told

with ice-cold precision.” –Kirkus Reviews (starred review) In the dark years following the Civil War, America’s foremost Arctic explorer, Charles Francis Hall, became a figure of national pride when he embarked on a harrowing, landmark expedition. With financial backing from Congress and the personal support of President Grant, Captain Hall and his crew boarded the *Polaris*, a steam schooner carefully refitted for its rigorous journey, and began their quest to be the first men to reach the North Pole. Neither the ship nor its captain would ever return. What transpired was a tragic death and whispers of murder, as well as a horrifying

ordeal through the heart of an Arctic winter, when men fought starvation, madness, and each other upon the ever-shifting ice. *Trial by Ice* is an incredible adventure that pits men against the natural elements and their own fragile human nature. In this powerful true story of death and survival, courage and intrigue aboard a doomed ship, Richard Parry chronicles one of the most astonishing, little known tragedies at sea in American history. “ABSORBING . . . Suspense builds as Parry describes the events leading up to Hall’s ‘murder,’ then climaxes in horrifying detail.” –Publishers Weekly “RIVETING.” –Library Journal House of Leaves Simon

The Cosmic Code (Book VI) Simon and Schuster

A thrilling adventure story chronicling the perilous journey of the scientists who set out to prove the theory of relativity--the results of which catapulted Albert Einstein to fame and forever changed our understanding of

the universe. In 1911, a relatively unknown physicist named Albert Einstein published his preliminary theory of gravity. But it hadn't been tested. To do that, he needed a photograph of starlight as it passed the sun during a total solar eclipse. So began a nearly decade-long quest by seven determined astronomers from observatories in four countries, who traveled the world during five eclipses to capture the elusive sight. Over the years, they faced thunderstorms, the ravages of a world war, lost equipment, and local superstitions. Finally, in May of 1919, British expeditions to northern Brazil and the island of Príncipe managed to photograph the stars,

confirming Einstein's theory. At its heart, this is a story of frustration, faith, and ultimate victory--and of the scientists whose efforts helped build the framework for the big bang theory, catapulted Einstein to international fame, and shook the foundation of physics.

Rising Patagonia

An oceanographer and award-winning photographer, Linder chronicles four polar expeditions in this richly illustrated volume: to a teeming colony of Adlie penguins, through the icy waters of the Bering Sea in spring, beneath the pack ice of the eastern Arctic Ocean, and over the lake-studded surface of the Greenland Ice Sheet.

Science on Ice Simon

and Schuster

An account of explorer Will Steger's expedition from Russia to Canada by way of the North Pole, traveling by dog sled and canoe.

The Journey of Alvar Nuñez Cabeza de Vaca and His Companions from Florida to the Pacific, 1528-1536

Simon and Schuster

Latitude is a gloriously exciting tale of adventure and scientific discovery that has never been told before. Crane, the former president of the Royal Geographic Society, documents the remarkable expedition undertaken by a group of twelve European adventurer-scientists in the mid-eighteenth century. The team spent years in South America, scaling volcanoes and traversing jungles

before they achieved their goal of establishing the exact shape of the Earth by measuring the length of 1 degree latitude at the equator. Their endeavors were not limited to this one achievement. Not only did their discovery open up the possibility for safe, accurate navigation across the seas, they also discovered rubber and quinine. With a narrative that reads like it was taken from the script of an adventure movie, Nicholas Crane brings to life a narrative that is a timely remind of how scientific discovery can change the world and our future. By knowing the shape of the earth we can create maps, survive the oceans, navigate the skies, and

travel across the globe. Without latitude, maps and navigation wouldn't be accurate, lives would have been lost, and exact locations of cities and rivers would never be known. After ten grueling years in search of a magic number, the survivors returned to Europe with their historical discovery and fueled the public's interest in science. Twent-five years ago, Dava Sobel's bestselling *Longitude* was a global publishing phenomenon, yet it told only one half of the story. With *Latitude*, this cornerstone piece of our shared history is now complete with this tale of a trip that changed the course of human civilization. Filled with raw

excitement and danger, Latitude brings the challenges that faced these explorer-scientists to vivid life.

Life Lived Wild

Milkweed Editions

The definitive story of the British adventurers who survived the trenches of World War I and went on to risk their lives climbing Mount Everest. On June 6, 1924, two men set out from a camp perched at 23,000 feet on an ice ledge just below the lip of Everest's North Col. George Mallory, thirty-seven, was Britain's finest climber. Sandy Irvine was a twenty-two-year-old Oxford scholar with little previous mountaineering experience. Neither of them returned. Drawing on more than a decade of prodigious

research, bestselling author and explorer Wade Davis vividly re-creates the heroic efforts of Mallory and his fellow climbers, setting their significant achievements in sweeping historical context: from Britain's nineteenth-century imperial ambitions to the war that shaped Mallory's generation. There was a country broken, and the Everest expeditions emerged as a powerful symbol of national redemption and hope. In Davis's rich exploration, he creates a timeless portrait of these remarkable men and their extraordinary times.

The Lost City of Z

Simon and Schuster
An insider's look into the decades of research behind Zecharia Sitchin's

books as well as an in-depth overview of his theories and discoveries • Includes carefully selected chapters from the Earth Chronicles series as well as never-before-published letters, articles, and lectures • Each piece includes an introduction, offering context and insight into Sitchin's passionate work and revealing the man behind the theories • Explains the genesis of The 12th Planet, the Anunnaki influences on the Sumerian civilization, the orbit of Nibiru, the prehistory of the Americas, the extraterrestrial origins of modern man, and much more What if the tales from the Old Testament and other ancient writings, such as those from Sumer,

Babylon, Egypt, and Greece, were not myths or allegory but accounts of actual historical events? Known for his ability to read and interpret ancient Sumerian and Akkadian clay tablets, Zecharia Sitchin (1920-2010) took the words of our most ancient ancestors as fact and, through decades of meticulous research, showed that they revealed a coherent narrative about the true origins of humanity and civilization. Drawing both widespread interest and criticism, his Earth Chronicles series of books, beginning with The 12th Planet, detailed how humanity arose after the arrival of the Anunnaki ("those who from Heaven to Earth came"), alien "gods"

who created modern man in their own image and imparted gifts of civilizing knowledge. Providing an insider's look into the decades of research behind Zecharia Sitchin's complete works as well as an in-depth overview of his theories, this collection includes carefully selected chapters from the Earth Chronicles series as well as never-before-published letters, articles, and lectures. We learn about the genesis of The 12th Planet in "The Book as a Story," the Sumerians and their Anunnaki influences in "The Sudden Civilization," the orbit of Nibiru in "UFOs, Pyramids, and the 12th Planet," the prehistory of the Americas in "Cities Lost and

Found," the extraterrestrial origins of modern man in "The Cosmic Connection--DNA," and much more. We get to read never-before-published lectures, culled from Sitchin's decades of presentations, as well as the article that spurred the writing of There Were Giants Upon the Earth. Each piece includes an introduction by Sitchin's niece, offering context and insight into Sitchin's passionate work. These introductions reveal the man behind the theories, a world traveler known for his scholarship, dry humor, and precisely chosen words. If his theories are true, as Sitchin wholeheartedly believed, then this collection presents some of the most

important knowledge we have of our origins and future.

To the Edges of the Earth Thames & Hudson

“A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious.” —The New York Times
Years ago, when *House of Leaves* was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers,

strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course,

neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door,

and of that unholy growl which soon enough would tear through their walls and consume all their dreams.

Zecharia Sitchin and the Extraterrestrial Origins of Humanity

Menasha Ridge Press

The tranquility of Mars is disrupted by humans who want to conquer space, colonize the planet, and escape a doomed Earth.
