Developmental Education:
Readings on Its Past,

Present, and Future offers
twenty-two selections on
historical efforts to serve
underprepared students,
on the state of
developmental education
today, and on innovative

practices and possible directions for the future. Compiled by Hunter R. Boylan, Director of the National Center for Developmental Education (NCDE) and a professor of Higher Education at Appalachian State University, and Barbara S. Bonham, a professor in the Department of Leadership and Educational Studies at Appalachian State University, each chapter also includes introductions and questions for discussion and reflection.

Adult Education at the Crossroads SAGE
In this ambitious study, Anna K. Boucher and Justin Gest present a unique analysis of immigration governance across thirty countries. Relying on a database of immigration demographics in the world's most important destinations, they present a novel taxonomy and an analysis of what drives different approaches to immigration policy over space and time. In an era defined by inequality, populism, and fears of

international terrorism, they find that governments are converging toward a 'Market Model' that seeks immigrants for short-term labor with fewer outlets to citizenship - an approach that resembles the increasingly contingent nature of labor markets worldwide.
Crossroads John Benjamins Publishing Company
School Choice at the Crossroads compiles exemplary, policy-relevant research on school choice

options—voucher, private, charter, and traditional public schools—as they have been implemented across the nation. Renowned contributors highlight the latest rigorous research findings and implications on school vouchers, tuition tax credits, and charter schools in states and local areas at the forefront of school choice policy. Examining national and state-level perspectives, each chapter discusses the effects of choice and vouchers on student outcomes, the processes

of choice, supportive conditions of school choice programs, comparative features of school choice, and future research. This timely volume addresses whether school choice works, under what conditions, and for whom—further informing educational research, policy, and practice. *Handbook of Research on Quality Assurance and Value Management in Higher Education* Zed Books
Expanded access to and improved quality of

secondary education in Sub-Saharan Africa are key ingredients for economic growth in the region This Secondary Education in Africa (SEIA) synthesis report makes this point by bringing together a significant volume of analytical work sponsored by the World Bank and by many African and international partners. 'At the Crossroads: Choices for Secondary Education in Sub-Saharan Africa' argues the case for broad and equitable access for a basic education cycle of 8

to 10 years, as well as for expanded education and training opportunities. This book provides a timely resource on good practices and potential solutions for developing and sustaining high quality secondary education systems in Africa. It includes the main elements of a roadmap to improve Africa's secondary education systems' response to the demands of growing economies and rapidly changing societies.

Higher Education at

the Crossroads of Disruption Routledge International Education at the Crossroads captures the essence and complexity of international education in an interconnected and globalized world. Written by leading scholars, international educators, and policy makers, the 26 essays in this volume take stock of the unpredictable landscape of international education and demonstrate why international higher education is more essential now than ever

before. Responding to a timely global moment where education and international engagement are being redefined and practiced in new ways, the authors call for a reconsideration of paradigms and critical reflection of the entire field of international education. At the same time, the authors show how international education is an imperative for the future of learning and the world, and also, crucially, that this work cannot be done in a silo. International Education at

the Crossroads offers readers a chance to join in the conversation that is as global as it is meaningful in communities, the lives of learners, and institutions around the world. International education requires that everyone the world over work together to produce new knowledge, to navigate the "crossroads," and to collectively chart the directions in which the field will move into the future.

Industry at the Crossroads

John Wiley & Sons

"Higher education in Latin

America and the Caribbean has expanded dramatically in the past 15 years, as the average gross enrollment rate has more than doubled, and many new institutions and programs have been opened. Although higher education access has become more equitable, and higher education supply has become more varied, many of the 'new' students in the system are, on average, less academically ready than are their more advantaged counterparts. Furthermore, only half of

higher education students, on average, complete their degree, and labor market returns to higher education vary greatly across institutions and programs. Thus, higher education is at a crossroads today. Given the region's urgency to raise productivity in a low-growth, fiscally constrained environment, going past this crossroads requires the formation of skilled human capital fast and efficiently. 'At a Crossroads: Higher Education in Latin America and the

Caribbean' contributes to the discussion by studying quality, variety, and equity of higher education in Latin America and the Caribbean. The book presents comprehensive evidence on the recent higher education expansion and evolution of higher education labor market returns. Using novel data and state-of-the-art methods, it studies demand and supply drivers of the recent expansion. It investigates the behavior of institutions and students and explores the

unintended consequences of large-scale higher education policies. Framing the analysis are the singular characteristics of the higher education market and the market segmentation induced by the variety of students and institutions in the system. At this crossroads, a role emerges for incentives, information, accountability, and choice."

Qualitative Inquiry for Equity in Higher Education:

Methodological Innovations, Implications, and Interventions John Wiley & Sons

Higher Education at the Crossroads of Disruption: The University of the 21st Century looks at the various areas of higher education that will likely undergo radical changes. This books examines how teaching formats will vary, and how curricula and course content will evolve.

ASHE Higher Education Report Cambridge University Press

Advertising today is not only under sterner scrutiny by the various federal regulatory and judicial bodies but is also facing an ominous storm of public criticism because of certain abuses. One of the big questions troubling advertisers, agencies and media is whether advertising will be subject to increasingly stringent governmental controls or whether it will forestall such action by mature self-regulation. In Advertising at the Crossroads the author has attempted to face the

issue squarely and realistically, and to point out several constructive measures that advertising must initiate in its self-interest. First published in 1952.

Improving Teaching, Learning, Equity, and Success in Gateway Courses Indiana University Press

The book contains a selection of papers focusing on the idea of crossing boundaries in literary and cultural texts composed in English. The authors come from different methodological

schools and analyse texts coming from different periods and cultures, trying to find common ground (the theme of the volume) between the apparently generically and temporarily varied works and phenomena. In this way, a plethora of perspectives is offered, perspectives which represent a high standard both in terms of theoretical reflection and in-depth analysis of selected texts. Consequently, the volume is addressed to a wide scope of both scholars

and students working in the field of English and American literary and cultural studies; furthermore, it will be of interest also to students interested in theoretical issues linked with investigations into literature and culture. *Universal Design in Higher Education* Cambridge University Press This volume aims at contributing to an interpretive approach to writing and its dynamics. It offers a general scope on the process-product interface by multiplying

the points of view on both the process and the product and their links. The book presents new findings and perspectives in the study of language and writing, both theoretical and methodological (e.g. dual process models of writing, pragmatics of writing, linguistic analysis of psycholinguistic units such as bursts of production). It also presents new tools for a longitudinal approach to the writing steps, key-stroke logging with integrated linguistic

modules, and textometric analysis of written texts. The volume is composed of five sections that highlight different approaches to writing from the viewpoint of multiple disciplines: Anthropology, Cognitive Psycholinguistics, Communication Studies, Didactics (Applied Linguistics), Discourse Analysis, Literacy, Sociolinguistics and Text Genetics. This book will be relevant for scholars and students interested in writing, text analysis, literacy, learning and

teaching. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

IGI Global

Through its research-to-practice focus, this book honors the professional contributions of Professor Barry J. Zimmerman as illustrated by the recent selfregulation applications of a highly respected group of national and international scholars.

This book will serve as a valuable resource for those interested in

empowering and enabling learners to successfully manage and self-direct their lives, education, and careers. In particular, K-12 educators, college instructors, coaches, musicians, health care providers, and researchers will gain invaluable insight into the nature of self-regulation as well as how they can readily apply self-regulation principles into their teaching, instruction, or mentoring. Emergent trends in education and psychology circles, such as linking selfregulated

learning assessment and interventions as well as the use of technology to enhance student learning and self-regulation, are additional themes addressed in the book. The kaleidoscope of self-regulation issues addressed in this book along with the wide range of promising intervention applications should also prove to be particularly appealing to graduate students as they pursue their future research activities and seek to optimize their individual growth and development.

Pearson
The Internet is transforming the experience of reading and learning-through-reading. Is this transformation effecting a radical change in reading processes as readers synthesize understandings from fragments across multiple texts? Or, conversely, is the Internet merely a new place to use the same reading skills and processes developed through experience with traditional print-based media? Are the changes

in reading processes a matter of degree, or are they fundamentally new? And if so, how must reading theory, research, and instruction adjust? This volume brings together distinguished experts from the fields of reading research, teacher education, educational psychology, cognitive science, rhetoric and composition, digital humanities, and educational technology to address these questions. Every question is not answered in every chapter. How could they

be? But every contributor has many thoughtful things to say about a subset of these important questions. Together, they add up to a comprehensive response to the issues the field faces as it approaches what may well be—or not—a crossroads. A website devoted to extending discussion around the book in creative (and disjunctive) ways [readingatacrossroads.net] moves it beyond the printed page. [Applications of Self-Regulated Learning across](#)

Diverse Disciplines IAP

The most comprehensive and up-to-date source available for college reading and study strategy practitioners and administrators, the Third Edition of the Handbook of College Reading and Study Strategy Research reflects and responds to changing demographics as well as politics and policy concerns in the field since the publication of the previous edition. In this thorough and systematic examination of theory, research, and practice, the Handbook

offers information to help college reading teachers to make better instructional decisions; justification for programmatic implementations for administrators; and a complete compendium of both theory and practice to better prepare graduate students to understand the parameters and issues of this field. The Handbook is an essential resource for professionals, researchers, and students as they continue to study, research, learn, and share

more about college reading and study strategies. Addressing current and emerging theories of knowledge, subjects, and trends impacting the field, the Third Edition features new topics such as disciplinary literacy, social media, and gaming theory.

With 695 signed entries with cross-references and recommended readings, the Encyclopedia of Diversity in Education, Four-Volume Set, in both

print and electronic formats, presents research and statistics, case studies and best practices, policies and programs at pre- and post-secondary levels. *Research Perspectives IGI Global*
 This book describes the remarkable culture of jeliya, a musical and verbal art from the Manding region of West Africa. Using an embodied practice as her methodology, the author reveals how she and her music teachers live “in between” local and global

cultures. Her journey spans 20 years of fieldwork presented through personal and intimate stories, first as a student of the balafon instrument, then as a patron of the music. Tensions build in both the music and in social relations that require resolutions, underscoring the differences between two world views. Through balafon lessons, the author embodies values such as patience, courage, and generosity, resulting in a transformative practice

that leads her to better understand her position vis-à-vis that of her jeli teachers. Meanwhile, jeliya itself, despite having been transmitted from teacher to student for 800 years, is currently in peril. Jelis cite modern globalized culture and people like the author herself as both a source of the problem as well as the potential solution.

At a Crossroads

Routledge

The rapid growth in online and virtual learning opportunities has created culturally diverse classes

and corporate training sessions. Instruction for these learning opportunities must adjust to meet participant needs. Online Course Management: Concepts, Methodologies, Tools, and Applications is a comprehensive reference source for the latest scholarly material on the trends, techniques, and management of online and distance-learning environments and examines the benefits and challenges of these developments. Highlighting a range of

pertinent topics, such as blended learning, social presence, and educational online games, this multi-volume book is ideally designed for administrators, developers, instructors, staff, technical support, and students actively involved in teaching in online learning environments. [AEHE, Volume 37, Number 1](#) Springer Nature Amid the increased use of the notion of cultural capital as a theoretical or analytical tool in educational research

remain many different definitions, misconceptions, and appropriations of the concept. Cultural capital--the cultural relevant knowledge, competencies, skills, or abilities valued in a particular context--acts as a form of social currency in educational settings. This monograph extensively reviews the past thirty years of research, investigating the strengths and weaknesses regarding the widely varying uses of cultural capital in

educational research. Although the concept of cultural capital holds great promise for explaining the perpetuation of power and privilege, unfilled hopes remain. The use of the economic metaphor implied by cultural capital, the lack of attention to race and gender inequalities, the possibility for misunderstanding in transferring the concept between countries and a general implied deficiency model present limitations in many studies of cultural

capital. An understanding of cultural capital, if appropriately theorized about and applied to research, has the promise of helping to understand and transform educational inequalities. This is Volume 36 Issue 1 of the Jossey-Bass publication ASHE Higher Education Report. Each monograph in the series is the definitive analysis of a tough higher education problem, based on thorough research of pertinent literature and institutional experiences. Topics are identified by a

national survey. Noted practitioners and scholars are then commissioned to write the reports, with experts providing critical reviews of each manuscript before publication. *School Choice at the Crossroads* Routledge Historically, few topics have proven to be so controversial in international intellectual property as the protection of geographical indications (GIs). The adoption of TRIPS in 1994 did not resolve disagreements, and

countries worldwide continue to quarrel today as to the nature, the scope, and the enforcement of GI protection nationally and internationally. Thus far, however, there is little literature addressing GI protection from the point of view of the Asia-Pacific region, even though countries in this region have actively discussed the topic and in several instances have promoted GIs as a mechanism to foster local development and safeguard local culture. This book, edited

by renowned intellectual property scholars, fills the void in the current literature and offers a variety of contributions focusing on the framework and effects of GI protection in the Asia-Pacific region. The book is available as Open Access. *The University of the 21st Century* Routledge

Education at the Crossroads World Bank Publications
 The mood of the first U of M U.S.-Japan Auto conference in January 1981 could only be described as electric. People wanted to know what our problems were and how we could begin to solve them. Inherent in the latter issue was the questions, what could we learn from the Japanese? One left the conference with a sense that there was a call for action, a mandate to address the problems facing industry.

The mood, about a year later, at the March 1982 U.S.-Japan Auto Conference was far more subdued. While undoubtedly this reflected the stream of statistics confirming the continually depressed state of the industry, another dynamic was possibly operating as well. Whereas the 1981 conference was "electric," a state of mind which flowed from a certain frustration at seemingly overwhelming difficulties and often vague expectations of what we might learn from the

Japanese, the 1982 conference was more "workmanlike" in the sense that speakers discussed specifically what progress was being made in addressing problems. This more subdued, pragmatic approach continued throughout and was reinforced by workshops held the day after the main conference. Instead of discussing the virtues of the Just-In-Time system in Japan, speakers addressed the practical problems of introducing such a system in the U.S.

firms. Instead of railing about the benefits or failings of regulation of the industry, they discussed what we could reasonably expect from regulation. Instead of exhorting the industry to adopt Japanese practices willy-nilly, they focused on some of the limitations of the Japanese model in a range of different areas. Instead of trying to identify some magic key to Japanese success in the automotive industry, they discussed the interrelationships among various factors. At the

same, they continued to explore the basic issues transforming the auto industry worldwide. In this

connection, they sought to unravel some of the complexities associated

with the internalization of the auto industry and trade obligations under the GATT.
