### Budgeting Basics and Beyond McGraw-Hill Education

This fictional U.S.-based case requires students to evaluate an asset-replacement decision in relation to whether a company should keep an asset it purchased and put into operation two years ago or whether it should replace that asset with a newer, more efficient model. Increasingly, accountants are being called upon to be "value integrators," that is, to integrate knowledge and skills from across a variety of disciplines. To complete the XYZ case successfully, students will need to draw upon and integrate concepts from accounting (determining relevant cash flows), finance (modeling-related issues associated with the analysis of a capital budgeting decision), and tax (various real-

world considerations). In addition, students are asked to complement their financial analysis with strategic and/or qualitative considerations associated with the capital investment proposal under consideration. Extensive use of Microsoft Excel is required to complete the case, including the use of Excel to deal with the issue of uncertainty. A final requirement of the case is to prepare an effective document (or table) that summarizes the various analyses students conduct in conjunction with the present case analysis.

Case Studies Chandra Sekhar

The KPG Grocers case study requires students to analyze a complex capital budgeting problem. The case describes a grocery store investigating if they should open a new distribution center close to their Midwestern stores. The impetus for the move is to improve the company's sustainability efforts, but freshness and

service are also improved. Students are required to use capital budgeting to analyze the four alternatives. It's appropriate for cost or managerial accounting classes at the undergraduate or graduate level. The case is enriched through the information elicitation process. The information elicitation methodology requires students to interview the vice president of distribution for the company to obtain the relevant facts then correspond via e-mail to gather additional information as required. The final deliverable is a presentation of the analysis and a recommendation to the vice president. This process requires students to develop core competencies often used in the workplace but seldom addressed in the classroom.

*Financial Appraisal of Investment Projects* IGI Global

Capital budgeting is an important part of the financial management of a business organization. It is a process that business houses use to evaluate an investment project. The decision of whether to accept or deny an investment project is capital budgeting decision. Capital budgeting is important because it

determines the long-term economic and financial profitability of any investment project. It lays down the future success of a business. Capital Budgeting aims to develop not only an understanding of the concepts of capital budgeting but also to provide its practical application to help students learn both theory and practice of capital budgeting used in the financial management of a business organization. It analyzes the capital budgeting practices of corporate enterprises in India in diverse sectors, on comparative basis, in order to provide the reader a better insight into the various issues and challenges regarding capital budgeting management.

### **Strategic Corporate Finance**

Cambridge University Press

This casebook in engineering economy illustrates the reality of economic analysis and managerial decision-making in a way that standard texts cannot. The variety of cases included make this book a valuable supplement to any engineering economy or capital budgeting textbook. Provides an introductory chapter on case analysis, a solved case, and an overview of sensitivity analysis, followed by 32 cases covering a wide range of real-life situations. Some

cases include hints for solution, and a solutions manual, referenced to major textbooks, is available to adopters.

### **Fundamentals of Investment Appraisal**

Pearson South Africa

"This book is more than a collection of ideas, equations, and chapters. It has an important integrating theme—that of value creation. This theme, which is carried throughout the book, provides a framework that helps students understand the relations between the various concepts covered in the book and makes it easier for them to learn these concepts. The concept of value creation is the most fundamental notion in corporate finance. It is in stockholders' best interests for value maximization to be at the heart of the financial decisions made within the firm. Thus, it is critical that students be able to analyze and make business decisions with a focus on value creation. The concept of value creation is introduced in the first chapter of the book and is further developed and applied throughout the remaining chapters. The theme of value creation is operationalized through the net present value (NPV) concept. Once students grasp the fundamental idea that

financial decision makers should only choose courses of action whose benefits exceed their costs, analysis and decision making using the NPV concept becomes second nature. By helping students better understand the economic rationale for a decision from the outset, rather than initially focusing on computational skills, our text keeps students focused on the true purpose of the calculations and the decision at hand"--

*Risk Adjusted Performances, Capital Management and Capital Allocation Decision Making* Macmillan

This volume will introduce the reader to basic topics of corporate finance. The notes will provide an integrative model that will help students evaluate projects, examine financing alternatives and assess

a firm. With problems and detailed solutions at the end of each chapter, this volume will also greatly benefit financial managers and investors. Corporate finance is a discipline from the firm's perspective and addresses the concerns of the Chief Financial Officer of the firm. Additionally, investors need to understand why firms make certain decisions so that they better recognize what drives firm value. These lecture notes assume no previous knowledge of finance, and are written in conversational style that makes the topics more accessible and easy to comprehend and absorb.

**Cases in Financial Management** Wiley Global Education

Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains

six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

**Planning and Control of Capital Expenditures** Wiley

This book explains the financial appraisal of capital budgeting projects. The coverage extends from the development of basic concepts, principles and techniques to the application of them in increasingly complex and real-world situations. Identification and estimation (including forecasting) of cash flows, project appraisal formulae, and the application of net present value (NPV), internal rate of return (IRR) and other project evaluation criteria are illustrated with a variety of calculation examples. Risk analysis is extensively covered by the use of risk adjusted discount rate, certainty equivalent, sensitivity, simulation and Monte Carlo analysis. The NPV and IRR models are further applied to forestry, property and international investments. Resource constraints are introduced to the capital budgeting decisions with a variety of worked examples using linear programming technique. All calculations

are extensively supported by Excel workbooks on the Web, and each chapter is well reviewed by end of chapter questions.

This new edition of Financial Management continues to emphasise on the theories, concepts, and techniques that aid in corporate decision making, Apart from updating the chapters with recent developments in the subject, it presents to the readers several new cases and examples, along with new-age tools like 'excel' for problem solving. *financial management* Cambridge Scholars Publishing

It gives me a great pleasure and satisfaction to present this book "FINANCE AND ACCOUNTING". The main characteristics of the book are simple understanding and key concepts. The following important highlights in this book will make the users to read this book. i. I have illustrated Accounting cycle steps by creating 42 transactions, given the journal entries for these 42 transactions, prepared all the various ledger accounts from these journal entries, preparation of Trial

balance has done with these ledger account balances and finally, prepared the final accounts (Trading, Profit and loss account and Balance sheet) based on the Trial balance. Hence, I conclude that the end-to-end process of Accounting cycle with data interpretation has done in this book which will help the readers to understand that “where can we get the amounts which are appear in trial balance). ii. I have evaluated 45 ratios based on latest financial statements of a leading manufacturing company for the financial year ended December 2019. iii. Clear presentation of financial statements analysis have done in this book. iv. Bank Reconciliation statement have prepared based on real time scenario. v. Capital budgeting methods have explained in clear and transparent manner. vi. Readers

can easily understand about Derivatives. vii. The computation of Sensex from live indices will help the readers to understand how the Sensex figures arrive. And also, I have given an important 150 terms under ‘GLOSSARY’ at the end of the book which can be used as a quick reference to learn an important terminology of Finance and Accounts. Chapter wise hyperlink will help the readers to go quickly to the desired chapter. This book is useful to everyone in Finance and Accounting field like students, Accounts executives, Financial analysts, etc. I have added two important chapters ‘Monetary policy Rates’ and ‘GDP and Inflation’ in this book. I hope that the book will help the readers to study in a focused manner. Any criticism and constructive suggestion in the direction of making the book a better teaching and studying

manual will be gratefully acknowledged by the author. Suggestions will be incorporated in the subsequent editions. All the best .....
