The demise of apartheid was one of the great achievements of postwar history, sought after and celebrated by a progressive global community. Looking at these events from the other side, An African Volk explores how the apartheid state strove to maintain power as the world of white empire gave way to a post-colonial environment that repudiated racial hierarchy. Drawing upon archival research across Southern Africa and beyond, as well as interviews with leaders of the apartheid order, Jamie Miller shows how the white power structure attempted to turn the new political climate to its advantage. Instead of simply resisting decolonization and African nationalism in the name of white supremacy, the regime looked to co-opt and invert the norms of the new global era to promote a fresh ideological basis for its rule. It adapted discourses of nativist identity, African anti-colonialism, economic development, anti-communism, and state sovereignty to rearticulate what it meant to be African. An African Volk details both the global and local repercussions. At the dawn of the 1970s, the apartheid state reached out eagerly to independent Africa in an effort to reject the mantle of colonialism and redefine the white polity as a full part of the post-colonial world. This

outreach both reflected and fuelled heated debates within white society, exposing a deeply divided polity in the midst of profound economic, cultural, and social change. Situated at the nexus of African, decolonization, and Cold War history, An African Volk takes readers into the corridors of white power to detail the apartheid regime's campaign to break out of isolation and secure global acceptance.

Minutes of Evidence ... 1906-8 Atlantic Publishers & Dist

In 1948 the United Nations adopted the Universal Declaration of Human Rights, and with it a profusion of norms, processes, and institutions to define, promote, and protect human rights. Today virtually every cause seeks to cloak itself in the righteous language of rights. But even so, this universal reliance on the rights idiom has not succeeded in creating common ground and deep agreement as to the scope, content, and philosophical bases for human rights. Makau Mutua argues that the human rights enterprise inappropriately presents itself as a guarantor of eternal truths without which human civilization is impossible. Mutua contends that in fact the human rights corpus, though well meaning, is a Eurocentric construct for the reconstitution of non-Western societies and peoples with a set of culturally biased norms and practices. Mutua

maintains that if the human rights movement is to succeed, it must move away from Eurocentrism as a civilizing crusade and attack on non-European peoples. Only a genuine multicultural approach to human rights can make it truly universal. Indigenous, non-European traditions of Asia, Africa, the Pacific, and the Americas must be deployed to deconstruct—and to reconstruct—a universal bundle of rights that all human societies can claim as theirs.

This book is a compendium of case studies in hematologic malignancies such as acute leukemias, myelodysplastic and myeloproliferative neoplasms, chronic leukemias and multiple myeloma covering cytogenetics (karyotyping Fluorescence in situ hybridization (FISH)) and molecular studies in detail. The first few chapters describe the methodology employed for karyotyping, FISH and Real Time PCR technology conducive to establishment of these labs if required. Each case study is described in detail by including the clinical history of the patient, findings of peripheral blood, bone marrow aspirate and bone biopsy morphological details. This is then followed by flowcytometric immunophenotyping, cytogenetic and molecular observations leading collectively to a final diagnosis, A discussion follows based on the relevance of this data in informing the prognosis, treatment response and survival in these patients. Additionally, this data serves as a key determinant for clinical decision making involving evidence based rational management of patients including targeted therapy. For

better understanding, each case study is accompanied by black and white or colour images as appropriate. This book is a source of learning and a valuable read for clinical hematologists, hematopathologists, medical oncologists, residents, interns, DM Hematology students and DNB Hematology students as well.

This book explores the images and perceptions of the European Union (EU) in the eyes of one of the EU's three strategic partners in Asia in the context of its own distinct policies and identity. It fills a major gap in existing studies on how Asians perceive the EU. The book examines the perception, representation and visibility of the EU in the Indian media, among the 'elites' and in public opinion. It explores whether the Union's self-proclaimed representation as a global actor, a normative power and a leader in environmental negotiations conforms to how it is actually perceived in Third World countries. The book asks questions such as, How have Indian images of Europe/European Union been changing from the 1940s to the present? What new narratives have emerged or are emerging about the EU in India? What does the rise of China mean for EU-India relations? Is the image of the EU changing in India or do old representations still persist even though

the Union is acquiring a new personality in the world politics? How does India perceive Poland?

The Fourth Gospel both blesses and betrays. It blesses readers who engage with its message, but it may betray those who read it nonchalantly. The notion that the Fourth Gospel is easy to understand is an enduring myth. This volume takes readers on a heuristic journey to discover the Fourth Gospel's unique theological aspects, problematic historical matters, inimitable literary features, and various interpretive approaches using an accessible format and easy-to-read language. The purpose of this publication is to enable readers to appreciate the Fourth Gospel's wide horizon, so necessary to understand its narratives in their historical and narrative contexts. Like the prologue of the Fourth Gospel that introduces and gives perspective on how readers should approach the rest of the Gospel, similarly, this volume introduces and gives perspective to studies in the Fourth Gospel. The text is divided into three parts, which examine its independent theology and argumentation, various outstanding issues, and its interpretation respectively. This volume is suitable for a wide readership, from Bible study groups to pastors and from undergraduate to graduate students.

*Report (technical)*. African Books Collective

This book is a collection of studies on economic development and growth in selected African countries. It consists of an introduction/summary and 15 inter-related empirical studies grouped into 5 research areas: women's empowerment and demand for healthcare; the impact of institutions, aid, inflation and FDI on economic growth; capital structure and bank-loan growth effects; trade, mineral exports and exchange rate; and growth, productivity and efficiency in various industries. While it provides a comprehensive picture of the state of economic development and growth in most parts of the continent, the main focus is on economic development and growth in Ethiopia and Rwanda – two countries undergoing rapid economic and social development.

Strengthening the protection of sexual and reproductive health and rights in the African region through human rights uses rights-based frameworks to address some of the serious sexual and reproductive health challenges that the African region is currently facing. More importantly, the book provides insightful human rights approaches on how these challenges can be overcome. The book is the first of its kind. It is an important addition to the resources available to researchers, academics, policymakers, civil society organisations, human rights defenders, learners and other persons interested in the subject of sexual and reproductive health and rights as they apply to the African region. Human rights issues addressed by the book include: access to safe abortion and emergency obstetric care; HIV/AIDS; adolescent sexual health and rights; early marriage; and gender-based sexual violence.

This is a book for an extraordinary time, about a pandemic for which there is no modern precedent. It is an edited collection of original essays on Asia's legal and policy responses to the Covid-19 pandemic, which, in a matter of months, swept around the globe, infecting millions. It transformed daily life in almost every corner of the planet: lockdowns of cities and entire countries, physical distancing and quarantines, travel restrictions and border controls, movement-tracking technology, mandatory closures of all but essential

services, economic devastation and mass unemployment, and government assistance programs on record-breaking scales. Yet a pandemic on this scale, under contemporary conditions of globalization, has left governments and their advisors scrambling to improvise solutions, often themselves unprecedented in modern times, such as the initial lockdown of Wuhan. This collection of essays analyzes law and policy responses across Asia, identifying cross-cutting themes and challenges. It taps the collective knowledge of an interdisciplinary team of sixty-one researchers both in the service of policy development, and with the goal of establishing a scholarly baseline for research after the storm has passed. The collection begins with an epidemiological overview and survey of the law and policy themes. The jurisdiction-specific case studies and cross-cutting thematic essays cover five topics: first wave containment measures; emergency powers; technology, science, and expertise; politics, religion, and governance; and economy, climate, and sustainability. Chapter 20: Cambodia: Public Health, Economic, and Political Dimensions by Ratana Ly, Vandana Hing, & Kimsan Soy is available for free.

The book presents a comprehensive view of the Indian equity markets over the past two decades (1994-2014). Equity markets constitute the most important segment of stock exchanges; in fact, the status of equity returns is, by and large, considered as a barometer of the state of a country's economy.

Returns earned by the equity investors on their funds invested in equity markets have become a decisive factor in the growth of such markets. In this context, the book discusses all the major aspects of equity returns and also conducts a dis-aggregative analysis based on underlying factors like age, size, ownership structure, industry affiliation/sector, among others, to explain the factors affecting returns and risk. While on the one hand the study ascertains the market rates of return (earned) on equities from the investors' perspective (by including both the capital gains and the dividend income), it also shows how to compute the rates of returns on equities from the corporate perspective (that is, rate of return earned on equity funds). It further assesses the required/expected rate of return and examines the volatility in stock returns, with a focus on its behaviour during the period of the study. It deepens investors' understanding of equity investment, helping them to make more-informed investments. While of interest to the investor community, this book also contributes significantly to the existing literature on market returns and is a valuable reference resource for academics, researchers and market participants, financial institutions and other intermediaries, regulators and policy makers.

When does international law allow a State or group of States to adopt trade measures in order to "coerce" another State to comply with its international obligations to ensure respect for human rights? In answering this question this book draws together complex areas of international law which include the rules prohibiting interference in the internal

affairs of sovereign States, the rules regulating extra-territorial exercises of jurisdiction, the law of State responsibility and the international legal rules requiring the protection of human rights and regulating international trade. The literature on "Trade and ..." issues invariably focuses on a limited number of these areas, or approaches the issues from an international relations or economic perspective. This book will assist specialists in international human rights law and international trade law, academic and government lawyers who advise on or implement international trade policy and those studying the use of human rights related trade measures. *ICoCIST 2021* Routledge

The Sundarban stretches from the brackish waters of the broad Hooghly on the west, to the fresh waters of the still broader Meghna to the east; the turbid waters of the Bay of Bengal on its southern limits, to the zamindari or pargana lands on its northern extremity and includes in its southern fringes the dense natural mangrove forests, it is famous for. The revenue history of Sundarbans is linked up with its riverine and coastal networks to its strategic location at the head of the Bay of Bengal which made it a natural protective barrier for the densely populated city of Calcutta. The massive transformation combined with the changed physical structure of Sundarban influenced society and economy on the one hand and invited settlers to establish their control in that region on the other. The text of Pargiter focuses on the revenue history of a larger part of Sundarbans, viz., Jessore, Khulna, Bakarganj and some parts of 24-Parganas since the inception of the colonial rule in Bengal. It has also been shown how the colonial administrators took various types of

measures for collecting revenue by the way of land reclamation. The introductory note by the editor analyses the revenue settlement policies which had been implemented on different occasions to ensure the revenue maximization policies of the British Raj on the one hand and to establish a human settlement in the deltaic region on the other. *Condominium Governance and Law in Global Urban Context* Oxford University Press

This book examines condominium, property, governance, and law in international and conceptual perspective and reveals this urban realm as complex and mutating. Condominiums are proliferating the world over and transforming the socio-spatial organization of cities and residential life. The collection assembles arguably the most prominent scholars in the world currently working in this broad area and situated in multiple disciplines, including legal and socio-legal studies, political science, public administration, and

sociology. Their analyses span condominium governance and law on five continents and in nine countries: the United States (US), China, Australia, the United Kingdom (UK), Canada, South Africa, Israel, Denmark, and Spain. Neglected issues and emerging trends related to condominium governance and law in cities from Tel Aviv to Chicago to Melbourne are discerned and analysed. The book pursues fresh empirical inquiries and cogent conceptual engagements regarding how condominiums are governed through law and other means. It includes accounts of a wide range of governance difficulties including chronic anti-social owner behaviour, short-term rentals, and even the COVID-19 pandemic, and how they are being dealt with. By uncovering crucial cross-national commonalities, the book reveals the global urban context of condominium governance and law as empirically rich and conceptually fruitful. The book will appeal to researchers and students in socio-legal studies, law, sociology, political science, urban studies, and public administration as well as journalists, social activists, policymakers, and condo owners/board members.
