Have you ever thought about what your life would be like if it revolved around you? Me First: A Deliciously Selfish Take on Life is an unapologetic and hilarious perspective on what it takes to get to the top and to live life on your own terms. Before making any big decision such as getting into a relationship or choosing a career path-you will start with the most important question: What do I want? The second question you will ask is: How does this decision, action, or choice benefit me directly? If it's not what you want or does not benefit you directly, don't do it. At the heart of Me First is the belief that YOU deserve to be happy and fulfilled. Its "Delish-isms" will show you how to become the number one priority in your life and become smarter and more strategic about your relationships, career, health, and finances. Every chapter also contains "Kick Starters" to help you get moving in the right direction. How selfish, right? Absolutely! A deliciously selfish life means taking a step back from the craziness to figure out who you are and what you want, and once you do, to own it. Because the only person holding you back from getting what you want is you.

Includes Vital Information on Frontotemporal Dementia (FTD) Foreword by John Q. Trojanowski, MD, PhD, Director, Alzheimer's Disease Center, University of Pennsylvania Hospital Although the public most often associates dementia with Alzheimer's disease, the medical profession now distinguishes various types of other dementias. This book is the first comprehensive guide dealing with frontotemporal dementia (FTD), one of the largest groups of non-Alzheimer's dementias. The contributors are either specialists in their fields or have exceptional hands-on experience with FTD sufferers. Beginning with a focus on the medical facts, the first part defines and explores FTD as an illness distinct from Alzheimer's disease. Also considered are clinical and medical care issues and

practices, as well as such topics as finding a medical team and rehabilitation interventions. The next section on managing care examines the daily care routine including exercise, socialization, adapting the home environment, and behavioral issues. In the following section on caregiver resources, the contributors identify professional and government assistance programs along with private resources and legal options. This newly revised edition follows recent worldwide collaboration in research and provides the most current medical information available, a better understanding of the different classifications of FTD, and more clarity regarding the role of genetics. A completely new chapter 5 enlightens the reader about the various drugs that are now being used with FTD patients and also delves into a number of nonmedical options. The wealth of information offered in these pages will help both healthcare professionals and caregivers of someone suffering from frontotemporal dementia. Lisa Radin and her son, Gary Radin, provided complete care for father and husband Neil Radin over a four-year period. Based on this firsthand experience with a devastating illness, they compiled this collection of expert articles on FTD by medical specialists, healthcare professionals, and fellow caregivers. Gary and Lisa founded in 1998 the Neil L. Radin Caregivers Relief Foundation and were both involved in planning and coordinating the Multidisciplinary Conference on Picks Disease & Frontotemporal Dementia held in May 1999 in Philadelphia; the proceedings of this conference were published in Neurology. Lisa also provided organizational support for the Frontotemporal Dementia and Pick's Disease Criteria Conference held at the National Institutes of Health in July 2000 in Bethesda, MD.
