Gender Violence in Poverty Contexts
International Monetary Fund

This book contains the description of machines and systems as investments goods in production. These machines have a technological and

economical life cycle over the time used. By explaining the paradigms of life cycle management, the book describes how the life cycle of such investment goods can be designed, operated and optimized to deliver maximum benefit in industrial environment. Additional examples from industry including case studies and calculations demonstrate practical applications and deliver

benefit not only for academic or educational purpose but also for industrial practitioners.

The Routledge Handbook of Gender and Violence CABI

An updated edition of the groundbreaking anthology that explores the proliferation of gendered violence From Harvey Weinstein to Brett Kavanaugh, accusations of gender violence saturate today's

headlines. In this fully revised edition of *Gender Violence*, Laura L. O'Toole, Jessica R. Schiffman, and Rosemary Sullivan bring together a new, interdisciplinary group of scholars, with up-to-date material on emerging issues like workplace harassment, transgender violence, intersectionality, and the #MeToo movement. Contributors provide a fresh, informed perspective on gender violence, in all of its various forms. With twenty-nine new

contributors, and twelve original essays, the third edition now includes emerging contemporary issues such as LGBTQ violence, sex work, and toxic masculinity. A trailblazing text, *Gender Violence, Third Edition* is an essential read for students, activists, and others.

[Politics after Violence](#)
Routledge

This comprehensive and authoritative sourcebook offers academics, researchers and students an introduction to and overview of current

scholarship at the intersection of marketing and feminism. In the last five years there has been a resurrection of feminist voices in marketing and consumer research. This mirrors a wider public interest in feminism - particularly in the media as well as the academy - with younger women discovering that patriarchal structures and strictures still limit women's development and life opportunities. The "F" word is back on the agenda - made high profile by campaigns such

as #MeToo and #TimesUp. There is a noticeably renewed interest in feminist scholarship, especially amongst younger scholars, and significantly insightful interdisciplinary critiques of this new brand of feminism, including the identification of a neoliberal feminism that urges professional women to achieve a work/family balance on the back of other women's exploitation. Consolidating existing scholarship while

exploring emerging theories and ideas which will generate further feminist research, this volume will be of interest to researchers, academics and students in marketing and consumption studies, especially those studying or researching the complex inter-relationship of feminism and marketing. Interdisciplinary Perspectives Routledge This book discusses femicide in Italy, and the cultural conversations that have resulted from feminist discourse on

lethal violence against women entering the mainstream, by analyzing journalistic inquiries and literary works produced after 2012. In a global and national context where activism's goals are mainly discursive this study deepens our understanding of the role played by written narratives in the critique of a public interest matter such as gender-based violence. The first part of the book is dedicated to the analysis of three journalistic inquiries published in book format

that focus on one or more cases of femicide that happened on the Italian peninsula. The second section draws on the concept of feminist rewriting to propose the analysis of a heterogeneous body of literary texts that explore some of the most controversial and notorious femicide cases covered by previous journalistic, historical, or mythical narratives, before demonstrating the close connection between theoretical and narrative discourse within the

analyzed texts. This is a fascinating case study contributing to global understandings of gender-based violence, which will be important for researchers in gender studies, sociology, and media studies.

The Routledge Companion to Marketing and Feminism Taylor & Francis

This pioneering work explores the theme of women and violence in the late medieval Mediterranean, bringing together medievalists of

different specialties and methodologies to offer readers an updated outline of how different disciplines can contribute to the study of gender-based violence in medieval times. Building on the contributions of the social sciences, and in particular feminist criminology, the book analyses the rich theme of women and violence in its full spectrum, including both violence committed against women and violence perpetrated by women themselves, in order to show how

medieval assumptions postulated a tight connection between the two. Violent crime, verbal offences, war and peace-making are among the themes approached by the book, which assesses to what extent coexisting elaborations on the relationship between femininity and violence in the Mediterranean were conflicting or collaborating. Geographical regions explored include Western Europe, Byzantium, and the Islamic world. This multidisciplinary book will

appeal to scholars and students of history, literature, gender studies, and legal studies. [Our Thirty-Year Journey to End Gender Violence](#) University of Texas Press This book builds on work that examines the interactions between immigration and gender-based violence, to explore how both the justification and condemnation of violence in the name of religion further complicates our societal relationships. Violence has been described as a universal challenge that is

rooted in the social formation process. As humans seek to exert power on the other, conflict occurs. Gender based violence, immigration, and religious values have often intersected where patriarchy-based power is exerted on the other. An international panel of contributors take a multidisciplinary approach to investigating three central themes. Firstly, the intersection between religion, immigration, domestic violence, and human rights. Secondly,

the possibility of collaboration between various social units for the protection of immigrants' human rights. Finally, the need to integrate faith-based initiatives and religious leaders into efforts to transform attitude formation and general social behavior. This is a wide-ranging and multi-layered examination of the role of religion in gender-based violence and immigration. As such, it will be of keen interest to academics working in religious studies, gender studies, politics, and

ethics. *Vigilante Gender Violence* Routledge Technological developments move at lightening pace and can bring with them new possibilities for social harm. This book brings together original empirical and theoretical work examining how digital technologies both create and sustain various forms of gendered violence and provide platforms for resistance and criminal justice intervention. This edited collection is organised around two key

themes of facilitation and resistance, with an emphasis through the whole collection on the development of a gendered interrogation of contemporary practices of technologically-enabled or enhanced practices of violence. Addressing a broad range of criminological issues such as intimate partner violence, rape and sexual assault, online sexual harassment, gendered political violence, online culture, cyberbullying, and human trafficking, and including a critical

examination of the broader issue of feminist 'digilantism' and resistance to online sexual harassment, this book examines the ways in which new and emerging technologies facilitate new platforms for gendered violence as well as offering both formal and informal opportunities to prevent and/or respond to gendered violence.

Life-Cycle Management of Machines and

Mechanisms Routledge

"An elegant, impassioned demand that America see

gender-based violence as a cultural and structural problem that hurts everyone, not just victims and survivors... It's at times downright virtuosic in the threads it weaves together."—NPR From the woman who gave the landmark testimony against Clarence Thomas as a sexual menace, a new manifesto about the origins and course of gender violence in our society; a combination of memoir, personal accounts, law, and social analysis, and a powerful call to arms from one of

our most prominent and poised survivors. In 1991, Anita Hill began something that's still unfinished work. The issues of gender violence, touching on sex, race, age, and power, are as urgent today as they were when she first testified. *Believing* is a story of America's three decades long reckoning with gender violence, one that offers insights into its roots, and paths to creating dialogue and substantive change. It is a call to action that offers guidance based on what

this brave, committed fighter has learned from a lifetime of advocacy and her search for solutions to a problem that is still tearing America apart. We once thought gender-based violence--from casual harassment to rape and murder--was an individual problem that affected a few; we now know it's cultural and endemic, and happens to our acquaintances, colleagues, friends and family members, and it can be physical, emotional and verbal. Women of color

experience sexual harassment at higher rates than White women. Street harassment is ubiquitous and can escalate to violence. Transgender and nonbinary people are particularly vulnerable. Anita Hill draws on her years as a teacher, legal scholar, and advocate, and on the experiences of the thousands of individuals who have told her their stories, to trace the pipeline of behavior that follows individuals from place to place: from home to school to work

and back home. In measured, clear, blunt terms, she demonstrates the impact it has on every aspect of our lives, including our physical and mental wellbeing, housing stability, political participation, economy and community safety, and how our descriptive language undermines progress toward solutions. And she is uncompromising in her demands that our laws and our leaders must address the issue concretely and immediately.

Guided by Voices

Routledge

This book uses an interdisciplinary approach to chart how various forms of violence – domestic, military, legal and political – are not separate instances of violence, but rather embedded in structural inequalities brought about by colonialism, occupation and state violence. The book explores both case studies of individuals and of groups to examine experiences of violence within the context of gender and structures of

power in modern Indonesian history and Indonesia-related diasporas. It argues that gendered violence is particularly important to consider in this region because of its complex history of armed conflict and authoritarian rule, the diversity of people that have been affected by violence, as well as the complexity of the religious and cultural communities involved. The book focuses in particular on textual narratives of violence, visualisations of violence,

commemorations of violence and the politics of care.

Theory, Methods, Action

Oxfam

In this edited collection leading authors in the field draw on their experience to address key methodological questions and challenges that have arisen from the recent proliferation of research projects and government funded initiatives on violence against women. Topics include: evaluation research and feminist methodology; using quantitative and

qualitative approaches; ethics, safety and access in sensitive research; interviewing practitioners, perpetrators, policy makers, and survivors (including children, women and young people); utilising discourse analysis to interpret data; undertaking cross national and comparative research; practical guidelines for practitioners/academics wishing to consult with women survivors; gearing research to facilitate positive change in policy

and practice; and using the media for dissemination. increased focus on gender related violence politically and academically this book addresses head on the complex methodological issues involved leading experts in the field as contributors

The educational challenge
Routledge

Gender-based violence is a multi-faceted public health problem with numerous consequences for an individual's physical and mental health and wellbeing. This collection

develops a comprehensive public health approach for working with gender-based violence, paying specific attention to international budgets, policies and practice and drawing on a wide selection of empirical studies. Divided into two parts, the text looks at how public health budgets and policies can be used to influence a range of risk factors and outcomes, and then outlines a theoretical and conceptual framework. The second section draws

on empirical studies to illustrate ways of managing the risks and impacts of, and responses to, the problem. It concludes by summarising those risk factors that can be effectively addressed through appropriately budgeted public health programmes globally. Highlighting ways of bolstering protective and resilience factors and identifying early interventions, it demonstrates the importance of inter-agency interventions through coordinated effort

from a wide range of sectors including social services, education, religious organisations, judiciary, police, media and business. This interdisciplinary volume will interest students and researchers working on gender-based violence, gender budgeting and public health policy from a range of backgrounds, including public health, sociology, social work, public policy, gender studies, development studies and economics. *Religion in Gender-Based Violence, Immigration,*

and Human Rights Cengage Learning While gender-based violence occurs in all societies irrespective of the level of development or cultural setting, whether in conflict or peacetime, the challenges for legal responses to gender-based violence are particularly acute in Asia. This book addresses the lack of academic discourse on gender-based violence in Asia beyond domestic violence, by demonstrating that gendered violence exists

within many different contexts and is perpetuated by multiple actors. Bringing together scholars, legal practitioners and human rights advocates, the book examines the intersections between gender, violence and the state in Asian contexts. It considers the role of state institutions in perpetuating and preventing violence based on gender and identity, and thus contributes to growing scholarship around due diligence standards under

international law. Analyzing both physical and structural gender-based violence, it scrutinizes how such violence exists within a landscape shaped by distinct cultural norms, laws and policies, and grapples with how to practically translate international human rights standards about state responsibility into these complex domestic environments. Contributors from diverse backgrounds draw on case studies and empirical research to ground this

academic scholarship in lived experiences of individuals and their communities in Asia. By bridging the divide between policy, laws and practice to offer a unique insight into both theoretical and practical responses to how gender-based violence is understood within communities and state institutions in Asian countries, this book will appeal to students and scholars of Asian studies, Gender Studies and Law. **Women and Violence in the Late Medieval**

Mediterranean, ca.

1100-1500 Routledge
Gendered Violence at International Festivals is a groundbreaking collection that focusses on this highly important social issue for the first time. Including a diverse range of interdisciplinary studies on the issue, the book contests the widely held notion that festivals are temporal spaces free from structural sexism, inequalities or gender power dynamics. Rather, they are spaces where these concerns are enhanced and enacted

more freely and where the experiential environment is used as an excuse or as an opportunity to victim blame and shame. In this emerging and under-researched area, the chapters not only present original work in terms of topics but also in theoretical and methodological approaches. All of the chapters are cross- or interdisciplinary, drawing on gender, sexualities, cultural and ethnicity studies. Studies from a range of highly regarded academics based around

the world examine the subject by looking at examples from a wide range of destinations, including Spain, Argentina, Nigeria, Zimbabwe, Australia, Canada and the UK. This significant book progresses understanding and debates about gendered festival experiences and emphasises the symbolic and physical violence often associated with them. This will be of great interest to, undergraduate and postgraduate students and academics

in the field of Events Studies. It will also be of use to practitioners or non-profit workers in the festival industries, including festival management organisations and planning committees.

Annual Economic Report
Routledge

Between 1980 and 1994, Peru endured a bloody internal armed conflict, with some 69,000 people killed in clashes involving two insurgent movements, state forces, and local armed groups. In 2003, a government-

sponsored “Truth and Reconciliation Committee” reported that the conflict lasted longer, affected broader swaths of the national territory, and inflicted higher costs, in both human and economic terms, than did any other conflict in Peru’s history. Of those killed, 75 percent were speakers of an indigenous language, and almost 40 percent were among the poorest and most rural members of Peruvian society. These unequal impacts of the violence on the Peruvian people

revealed deep and historical disparities within the country. This collection of original essays by leading international experts on Peruvian politics, society, and institutions explores the political and institutional consequences of Peru’s internal armed conflict in the long 1980s. The essays are grouped into sections that cover the conflict itself in historical, comparative, and theoretical perspectives; its consequences for Peru’s political

institutions; its effects on political parties across the ideological spectrum; and its impact on public opinion and civil society. This research provides the first systematic and nuanced investigation of the extent to which recent and contemporary Peruvian politics, civil society, and institutions have been shaped by the country's 1980s violence.

Eliminating Gender-Based Violence

Grove/Atlantic, Inc.

This book aims to bring together the pioneering research on gender based

violence that has been conducted by the Centre for Gender and Violence Research at the School for Policy Studies, University of Bristol. Topics discussed include violence in young people's relationships, prostitution policy, disabled women's experiences of domestic violence, men as victims of domestic violence, feminist movements and methodological concerns. This book will have a wide appeal, as each individual chapter builds on and contributes to existing global and national

concerns about gender based violence. The book starts with an exploration of key theoretical, conceptual and methodological issues in researching gender based violence, then moves on to look at specific national (UK) based empirical studies. The final section brings together a wide range of research from diverse contexts, ranging from China, Iran, India and refugee camps in Rwanda. The book will be an invaluable resource for researchers, students and practitioners who have an

interest in this area, as well as for policymakers around the world. It will also be of interest to the general reader who wants to learn more about what is now a highly topical issue.

Tourism and Gender-based Violence Edward Elgar Publishing

While promoting access to resources and systems of support for those affected by gender-based violence is absolutely crucial, this new book focuses attention on the important question of how communities can take

action to prevent violence and abuse. Using examples of current research and practice, the book explores the actions that can be taken in individual sectors of society, our schools, faith communities, campuses, on our streets and using new popular technologies. The contributors draw on global examples to highlight the importance of learning from the study of the interaction between socio-political contexts and effective policies and strategies to address gender-based violence.

Chapters take up the challenge of exploring the construction of effective programmes that address cognitive, affective and behavioural domains. They discuss what people know, how they feel and how they behave, and include the important challenge of how to engage men in working towards the elimination of gender-based violence, offering positive messages which build on men's values and predisposition to act in a positive manner. Importantly, such

strategies place the responsibility for preventing gender-based violence on the society as a whole rather than on vulnerable individuals. This book is essential reading for anyone interested in gender studies, women's studies, social work, sociology, law and health studies. Its unique approach focuses on the achievement of prevention at the earliest possible stage and examines the issue through a society-wide, but community-focused lens.

Routledge
This book examines the issue of gender and violence in the Middle East and North Africa. Drawing on case studies across the region, the authors examine the historical, cultural, religious, social, legal and political factors affecting the issue.
Intersections of Animal Oppression, Patriarchy and Domination of the Earth Taylor & Francis
In recent years, mob attacks on women by men have drawn public attention to an emerging

social phenomenon. This book draws upon concepts from critical race theory and sociocultural evolutionary theory to examine this specific form of gender violence, which takes place outside the law and is a vigilante form of enforcing traditional gender norms. The author positions vigilante gender violence as a global issue produced during specific periods of sociocultural change in conditions marked by intensified social stratification. The catalyst for vigilante gender violence is the

formal state's breaching of the "gender bargain," the tacit psychological wage even non-elite men earn by at least not being female. When the state threatens to end the gender bargain by promoting women's rights, the die is cast for low-status men to enforce this bargain themselves in mob attacks against women who are perceived to be violating the patriarchal order. Seen through independent case studies in different national settings, this book provides empirical

evidence that demonstrates the existence of vigilante gender violence in times when societies are shifting from one phase to another and the social hierarchies present within are disrupted. With greater understanding of when and how to predict the occurrence of this phenomenon, the author posits notable ways to prevent it from happening altogether.

A Brief History Taylor & Francis

In its 114th year, Billboard remains the world's

premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

Gender, Violence and the State in Asia Routledge

This book is concerned with understanding the complex ways in which gender violence and poverty impact on young people's lives, and the

potential for education to challenge violence. Although there has been a recent expansion of research on gender violence and schooling, the field of research that brings together thinking on gender violence, poverty and education is in its infancy. This book sets out to establish this new field by offering innovative research insights into the nature of violence affecting children and young people; the sources of violence, including the relationship with poverty and

inequality; the effects of violence on young subjectivities; and the educational challenge of how to counter violence. Authors address three interrelated aims in their chapters: to identify theoretical and methodological framings for understanding the relationship between gender, violence, poverty and education to demonstrate how young people living in varying contexts of poverty in the Global South learn about, engage in, respond to and resist gender violence to

investigate how institutions, including schools, families, communities, governments, international and non-governmental organisations and the media constrain or expand possibilities to challenge gender violence in the Global South. Describing a range of innovative research projects, the chapters display what scholarly work can offer to help meet the educational challenge, and to find ways to help young

people and those around them to understand, resist and rupture the many faces of violence. Gender Violence in Poverty Contexts will appeal to an international audience of postgraduate students, academics and

researchers in the fields of international and comparative education, gender and women's studies, teacher education, poverty, development and conflict studies, African and Asian studies and related

disciplines. It will also be of interest to professionals in NGOs and other organisations, and policy makers, keen to develop research-informed practice. Winner of the 2016 Jackie Kirk Outstanding Book Award.
