Choose from 500 different sets of earth 6 2 chapter 3 1 rocks flashcards on Quizlet. earth 6 2 chapter 3 1 rocks Flashcards and Study Sets ... 3.1 The Rock Cycle The rock components of the crust are slowly but constantly being changed from one form to another and the processes involved are summarized

in the rock cycle (Figure 3.2). The rock cycle is driven by two forces: (1) Earth's internal heat engine, which moves material around in the core and the mantle and leads to slow but significant changes within the crust, and (2) the hydrological cycle, which is the movement of water, ice, and air at the surface, and is powered by the ... 3.1 The Rock Cycle - Physical Geology Chapter 3 Section 1- Geography of the Fertile Crescent DRAFT. 6th grade. 939 times. 26 Terms. Section 3.1 The Rock Cycle Flashcards | Quizlet Chapter 2 - Rocks. Learning Targets. Section 1 - The Rock Cycle. Distinguish between a rock and a mineral; Describe the rock cycle and some changes that a rock could undergo; Section 2 - Igneous Rocks. Recognize magma and lava as the materials that cool to form igneous rocks; Chapter 2 - Rocks - Earth Science Table of Contents. Section 3: Absolute Ages of Rocks Section 1: Fossils Section 2: Relative Ages of Rocks. • Paleontologists, scientists who study fossils, can learn about extinct animals from their fossil remains. • Scientists can learn how dinosaurs looked and moved using fossil remains. Chapter: Clues to Earth's Past Section 3.3 Sedimentary Rocks This section discusses the formation and classification of sedimentary rocks. Chapter 3 Rocks Section 3.3 Sedimentary Rocks Chapter 3 Rocks Section 3.2 Igneous Rocks This section discusses the characteristics of igneous rocks. Reading Strategy Outlining Complete the outline as you read. Include points about how each of these rocks form, some of the characteristics of each rock type, and some examples of each. For more information on this Chapter 3 Rocks Section 3.2 Igneous Rocks 6.1 Clastic Sedimentary Rocks A clast is a fragment of rock or mineral, ranging in size from less than a micron [1] (too small to see) to as big as an apartment block. Various types of clasts are shown in Figure 5.12 and in Exercise 5.3. The smaller ones tend to be composed of a single mineral crystal, and the larger ones are typically composed of pieces of rock. 6.1 Clastic Sedimentary Rocks - Physical Geology Chapter 3 Rocks Section 3.4 Metamorphic Rocks This section discusses the formation and

classification of metamorphic rocks. Reading Strategy Outlining This outline is a continuation of the outline from Section 3.3. Complete it as you read. Include points about how each of these rocks forms, some of the characteristics of each rock type, and ... Chapter 3 Rocks Section 3.4 Metamorphic Rocks Chapter 3 - Soft Rock Soft Rock can be sedimentary or magma based. These are typically non-quartzite sandstones (where the sand-grains, or the cement, or both, are not quartz-rich, and thus prone to weathering and weakening), limestone (calcium carbonate), volcanic rocks, and excessively weathered granites. Section 2 - The Book of Rock — Slackademics On this page you can read or download guided reading and study workbook earth science chapter 3 rocks in PDF format. ... 26 Chapter 3 Section 1: Guided Reading and Review ...
