LANEY GUERRA

IGCSE English Cambridge University Press
 Sujata Bhatt's first book of poems, the award-winning *Brunizem*, appeared in 1988. In a very short time she has gained recognition as one of the distinct and reckonable new voices. She has things to say about her native India and her native tongue (Gujarati), about America and Britain, and about Germany where she now lives. She is, the *New Statesman* declared, 'one of the finest poets alive', and alive in a unique way to language, to issues of politics and gender, to place and history. Hers is a remarkable complete imagination, generous and at the same time unsparingly severe in its quest for the difficult truths of experience.

Cambridge IGCSE® Computer Science Coursebook Cambridge University Press

This textbook has been written to appeal to A-level chemistry students. It covers the syllabuses of all the main examining boards offering A-level chemistry and also contains some material suitable for S-level students. The author places the subject in context by discussing the nature and, where relevant, the economics of the chemical industry and the wider social implications and applications of chemistry.

New Century Senior Physics meets the global objectives of the 2007 Queensland Senior Physics syllabus in terms of Knowledge and Conceptual Understanding, Scientific Investigation and Evaluating and Concluding. All 10 key concepts of the syllabus have been developed in varied contexts along with an extensive range of mandatory and elective key ideas. Key Features: A contextual approach throughout—each chapter begins with questions, problems or situations that experienced teachers have found to spark students' interest. A familiar format allowing students to quickly find information, whatever the context they may be studying. Teachers can develop contexts of their own choosing without restriction to a narrow set of pre-chosen contexts. An easy to follow progression through focus questions to the underlying key concepts and ideas. Many and varied contextualised questions, problems and puzzles, including traditional closed-response questions as well as open-ended and stimulus-response questions - all essential for understanding. 'Novel Challenge' questions - drawn from unfamiliar situations and designed to develop the higher order thinking (HOT) skills. End-of-chapter review questions - ranging from simpler practice questions requiring straight-forward use of principles and problem-solving (one and two star difficulty) to more challenging extension questions (three stars) requiring HOT skills. A focus on the tentative nature of scientific knowledge where throughout history accidents and serendipity have gone hand-in-hand with scientific investigation. An open, 'chatty' writing style that speaks directly to students but with sufficient depth to cover information they will need for tertiary studies in science and other physics-related areas such as engineering, medical science, computing, human movement etc. Gender-balanced contexts using material drawn from boys' and girls' spheres of experience. Video-coded stimulus ideas for experimental and non-experimental investigations suggested by physics teachers throughout the state. Online Support. Visit the authors' Web Page

containing on-line worked solutions to the end-of-chapter extension (challenging, complex, novel) questions and the Novel Challenge text-box questions, suggestions for Extended Experimental Investigations and hints to students who are about to undertake them, as well as a host of other resource material useful in developing a school work program. Go to seniorphysics.com and select the textbook webpage.
