A Periodic Table Logic Problem

Downloaded from [ftp.wlvq.com](http://wlvq.com) by guest

EMILIANO LIZETH

Name A Periodic Table Logic Problem
Purpose: In this activity you will use a set of clues to identify a set of unknown elements in a periodic table. The elements are the elements with atomic numbers 1-20 and 31-36. A letter of the alphabet is used to represent each unknown element.

INTRODUCTION When elements are arranged in the periodic table in order of increasing atomic number, there is a periodic repetition of their physical and chemical properties. The way properties change from left to right across a period and from top to bottom within a group are called periodic trends.

2. Fill in the blank periodic table with the valence electron configurations.

2. Color the s-sublevels red, p-sublevels blue, d-sublevels green and f-sublevels purple.

n=6 Chemistry — Chapter 6 Worksheet #1 Name KEY 1. Fill in ...

IMPORTANT: All the elements in this quiz have atomic numbers between 1 and 110. No element appears more than once. The entire grid can be completed without guesswork. See below for a few definitions. Definitions: Adjacent means that one cell is immediately adjacent to another, either vertically, horizontally, or diagonally.

The Periodic Table and Periodic Law 150 Chapter 6 What You'll Learn

You will explain why elements in a group have similar properties. You will relate the group and period trends seen in the periodic table to the electron configuration of atoms. You will identify the s-, p-, d-, and f-blocks of the periodic table. Why It's Important

Chapter 6: The Periodic Table and Periodic Law

Along with logic and knowledge of properties, you will use periodic trends to solve the puzzle. When you are done, each element will be in its unique place on the table. Good luck! Experiment 9 A Periodic Table Logic Problem 69 Name Date Class . Use a series of clues to arrange a set of unknown elements in a periodic table.

Name

Design your own periodic table logic problem based on the 26 elements with atomic numbers 1-20 and 31-36. Name each element after your friends, sports teams, favorite movies, musical groups, colors, or anything you like. Assign a symbol to each element and place it on the table.

2 Excluding elements identified in your answer to Question ...

There are forty unique bingo cards. You may choose to give your students a periodic table to reference. Begin by reading clues about the element and allow students about 5-10 seconds to mark the appropriate element on their card. Refer to the table (pages 2-4) for clues.

There are forty unique bingo cards. You may choose to give your students a periodic table to reference. Begin by reading clues about the element and allow students about 5-10 seconds to mark the appropriate element on their card. Refer to the table (pages 2-4) for clues.
