Tropentag is the largest interdisciplinary conference in Europe focusing on development-oriented research in the fields of tropical and subtropical agriculture, food security, natural resource management and rural development. It is clear that a just and sustainable transformation of our food systems is urgently needed: climate change, conflicts, rising food and

fuel prices, and growing social and income inequalities are exacerbating the vulnerabilities of our food systems. The theme invites diverse contributions that explore different pathways for transforming food systems and the trade-offs and synergies involved, ranging from more technical solutions, such as climate-smart agriculture and biofortified crops, to more systematic solutions for changing the underlying relationships of our food systems, such as agroecology and alternative food networks.

One of the major pursuits for investors is the search for income. This ongoing search can be more difficult at some times than at others. For example, when interest rates are low and when companies cut dividends, traditional income sources come under pressure. However, the fundamentals of income investing remain in all economic conditions. These fundamentals can be learned and applied by investors, thus improving their chances of finding and securing income. This guide begins by covering the basics, providing you with an essential platform for effective income investing by giving detailed explanations of the concepts of interest rates, inflation and yield. The focus then moves on to the investment assets themselves: cash, fixed interest, equities, funds including ETFs, property, infrastructure and timber. For each there is a careful explanation of its traditional income

performance, how income is paid and how investors can use the asset in question as part of a broader income-generating portfolio. Attention is also given to the risks involved when investing in each type of asset. In the final part of the book, the focus falls on asset allocation and portfolio construction; how investments from various asset classes can be bought and held together to create a successful and balanced income portfolio. This includes ideas on how to set up and manage a portfolio along with example model portfolios for different risk appetites and age groups. The issues of securing an income from your pension in retirement and shielding your investment income from falling prey to more tax than is necessary are also covered. If you are in search of income this thorough and accessible book, written by experienced personal finance journalist Maïke Currie, will prove to be an indispensable guide. An Introduction to Global Financial Markets Cuvillier Verlag

The Treasury Sub-Committee calls for much greater transparency from the Treasury in accounting for the liabilities taken on by the nationalisation and part-nationalisation of financial institutions. The report recommends that these disclosures appear in the annual Treasury resource accounts. Furthermore they should be at least as comprehensive as those made by major corporations and go further than meeting the minimum acceptable accounting standards. In particular, the Report notes that the Treasury's 2007-08 Annual Report and Accounts cover the Government's financial relationship with Northern Rock but do not comment on its performance under temporary public ownership. Given the level of interest in the fully nationalised institutions of Northern Rock and

Bradford & Bingley, and the Treasury's role in their governance, the report recommends that key performance information for these institutions be published in the resource accounts as well. The wholesale nationalisation of Northern Rock, and Bradford & Bingley has created governance responsibilities for the Treasury while these entities remain under public ownership. The Government's announcements of October 2008 created further responsibilities regarding the oversight of part-nationalised banks, and created a new body, UK Financial Investments (UKFI). The report calls for UKFI to report annually to Parliament and to be accountable to the Treasury Committee. The Committee wants the Government to identify and publish performance indicators for UKFI, and to report against these measures on a six-monthly basis. All these developments are additional challenges for the Treasury and require it to act in areas its current staff base may not be fully equipped for or familiar with. The Government must ensure the Treasury is sufficiently resourced to manage the

extended responsibilities arising from the economic downturn, especially those regarding financial stability.

Annual Report for the Year Ended June ... John Wiley & Sons

On a warm September night in 2002, former acquaintances Alexis Maybank and Alexandra Wilkis reconnected at a mixer for new students at Harvard Business School. Alexis had just ended a four-year run at eBay during the dotcom boom and bust. Alexandra had just spent three years as an investment banker at Merrill Lynch. Now they were entering the country's top training ground for future titans of Wall Street and the Fortune 500. Little did either suspect that five years later, they'd become famous not in finance or consulting or corporate management, but at the bleeding-edge intersection of fashion and technology. Gilt Groupe - launched by Alexis, Alexandra, and three colleagues in 2007 - is one of the most fascinating startups of recent years, with a valuation of more than \$1 billion. And it all began with one bold idea: to bring sample sales online and change the way

millions shop. As Alexis and Alexandra write about the day Gilt.com went live: "We had created a website that could potentially change the rules of retail, for both shoppers and brands. If shopping was traditionally a slow, leisurely activity that might consume an entire day, it would now be competitive, addictive, urgent, thrilling—a rush delivered at the same time each day. Shopping would become not just easier, but so much fun." But turning that vision into reality wasn't easy. Designers had long controlled their own sample sales by staging them in anonymous, makeshift locations and strictly limiting invitations. Those lucky enough to hear about a Marc Jacobs or Hermès sample sale would drop everything and run for dramatic, fleeting bargains. Why should elite brands support a new startup trying to replicate the experience online? And even if brands like Valentino, Christian Louboutin, and Zac Posen got on board, would shoppers embrace such a website? Would the kind of people who love high-end fashion really visit a new online sale each day? Was "accessible luxury" a

breakthrough idea or an absurd oxymoron? Alexis and Alexandra share their perspective in this dramatic story of Gilt's birth, rise, and evolution. They show how they juggled the conflicting needs of their suppliers, engineers, marketers, and potential investors. They explain how they blended their individual strengths and weaknesses and managed their rapidly growing team. They cover the growing pains of expanding into new categories like housewares, travel, and menswear. And they take us through the darkest moments of the recession when Gilt might easily have died. As you'll learn from the true story of Gilt, anything is possible for those with the creativity to recognize a new opportunity and the perseverance to make it real.
