For decades, people

have reported close encounters with extraterrestrial entities. Witnesses describe being kidnapped by large-headed, black-eyed creatures from other worlds. Those same creatures have become popularly known as "the Grays." There is, however, another aspect to the alien abduction controversy. Abductees very often report being followed and spied upon by military and government personnel. It is typical for abductees to see black helicopters hovering directly over their homes in an intimidating manner. Phone calls are monitored. Emails are hacked into. Strange men dressed in black suits are seen photographing the

homes of the abductees. All of this brings us to the matter of what have become known in the domain of alien abduction research as "Military Abductions," or "MILABS." According to numerous abductees, after being kidnapped by aliens they are kidnapped again . . . by the government. These follow-up events are the work of a powerful group hidden deep within the military and the intelligence community. It is the secret agenda of this highly classified organization to figure out what the so-called Grays are really up to. And, the best way for the government to get the answers is to interrogate those who have come face-to-face with the UFO phenomenon: the

abductees. Why is the government secretly compiling files on alien abductees? Is the alien abduction issue so sinister that it has become a matter of national security proportions?

An Illustrated Guide to Alien Spacecraft

Some might think that the 27 thousand tons of material launched by earthlings into outer space is nothing more than floating piles of debris. However, when looking at these artifacts through the eyes of historians and anthropologists, instead of celestial pollution, they are seen as links to human history and heritage.

Space: The New

Frontier for Archeologists

Handbook of Space Engineering,

Archaeology and Heritage, published this month by CRC Press Taylor and

Francis Group, brings together 43 anthropologists, historians, physicists, and engineers, a scientific team as culturally diverse as the crew of any science fiction cruiser. They offer a range of novel historical and technological perspectives on humankind's experience in space. This ambitious work presents an informative, thought-provoking, and educational text that discusses the evolution of space engineering, spacecraft reliability and forensics, field techniques, and mission planning, as well as space programs for the future. The book is edited by a pair of scientists from different sides of the campus: Ann Garrison

Darrin, aerospace engineer and NASA veteran and Beth Laura O'Leary, anthropologist and member of the World Archaeological Congress Space Heritage Task Force. The handbook delves into the evolution of space archaeology and heritage, including the emerging fields of Archaeoastronomy, Ethnoastronomy, and Cultural Astronomy. It also covers space basics and the history of the space age from Sputnik to modern day satellites. It discusses the cultural landscape of space, including orbital artifacts in space, as well as objects left on planetary surfaces and includes a look at the culture of Apollo as a catalog of manned exploration of the moon. It also considers

the application of forensic investigation to the solving of cold case mysteries including failed Mars mission landing sites and lost spacecraft, and even investigates the archaeology of the putative Roswell UFO crash site and appraises material culture in science fiction.

The 1961 UFO abduction of Betty and Barney Hill stirred worldwide interest, because of the book *The Interrupted Journey*, the subsequent media coverage, and a 1975 TV movie. The case is mentioned in almost all UFO abduction books. It also became a target for debunkers, who still

attack it today. But the complete story of what really happened that day, its effect on the participants, and the findings of investigators has never been told ... until now. In *Captured!*, you'll get an insider's look at the alien abduction, previously unpublished information about the lives of the Hills before and after Barney's death in 1969, their status as celebrities, Betty's experiences as a UFO investigator, and other activities before her death in 2004. Kathleen Marden, Betty Hill's niece, shares details from her discussions with Betty and from the evidence of the UFO abduction. She also looks at the Hills' riveting hypnosis sessions about their time onboard the spacecraft. In addition,

coauthor, physicist, and ufologist Stanton T. Friedman, the original civilian investigator of the Roswell Incident, reviews and refutes the arguments of those who have attacked the Hill case, as well as the star map that Betty Hill saw inside the craft and later recreated.

Unmasking the mysteries of alien life on earth! Make

mention of the word “alien” and it conjures images of black-eyed, large-headed, dwarfish beings that have come to be known as the Greys. Indeed, Greys have become a staple part of pop-culture, never mind just the field of UFO research. They’ve appeared in Steven Spielberg’s classic 1977 movie, *Close Encounters of the Third Kind*. They regularly popped up in *The X-Files*. And, of course, there are numerous people – all across the world – who claim to have been abducted by the Greys and subjected to intrusive medical experiments. Yet, before the 1950s, the Greys were nowhere in sight. *The Alien Book: A Guide to Extraterrestrial Beings on Earth* shows that

extraterrestrial life comes in all kinds, appearances, sizes, and bodies. They all have one thing in common, however: the human race has encountered them, and we continue to do so today. Not just dozens, or even hundreds, but thousands of eyewitness experiences have been reported. Covering hundreds of extraterrestrial life forms in more than 40 thematic chapters, this absorbing look at the mysteries of aliens on earth includes ... the Space Brothers: long-haired, very human-looking ETs the fiendish Reptilians: seven-to-eight-foot-tall predatory shapeshifters Men in Black beings: extremely pale-skinned, tall, and with

huge eyes Black-eyed Children: anemic-looking kids with solid black eyes that might be ET-human hybrids Bigfoot the werewolf-like Dogmen jellyfish-style aliens that soar around the skies of our world the Shadow People: dangerous humanoids that terrorize people legendary Nephilim space-vampires: insect-like aliens that resemble a giant praying mantis and many, many more! The Alien Book investigates the full range of sentient, alien life forms. Some are benign and others downright deadly. Some are small, like a germ or virus that has NASA, creating guidelines to deal with an outbreak of an extraterrestrial germ. Some are big like a

giant praying mantis or the biblical Goliath. They all lurk on Earth and in this chilling book! With more than 120 photos and graphics, this tome is richly illustrated. Its helpful bibliography and extensive index add to its usefulness. *Alien Abductions* Tama Publishing LLC The author of *Prophecy 2000* shares his 39 years of research into the diabolical source of "flying saucers." Today our secularized society is so eager for quick, amazing answers. Will new hope arrive on these "chariots of the gods?" Psychics are channeling such exciting insights from alleged cosmic beings, detailing the "true" nature of God and alternate roads to salvation. Supermarket tabloids proclaim

oddball messages from space. New Agers are captivated by the promise of alien cosmic enlightenment and higher intelligence from beyond the stars. So, what is really out there? Why are movies filled with wise aliens, Eastern mysticism, and New Age humanism such hits? Are we being set up for a new, false, extraterrestrial hope? Yet another alternative to the only true way - Jesus Christ?

Mysteries of UFOs
Stanford University Press

Readers learn about visitors from another planet—aliens. They will learn what happened in the New Mexico desert in 1947 and decide for themselves if they believe it was a weather balloon crash, like the government

wants you to think, or something more. Readers discover the close encounters earthlings have had with extraterrestrials, through decades of reported incidents. A “twilight quiz” will ask readers what they would do during a UFO encounter.

Mysterious Predictions Crabtree Publishing Company

A voyage of exploration to the outer reaches of our inner lives. UFOs are a myth, says David J. Halperin—but myths are real. The power and fascination of the UFO has nothing to do with space travel or life on other planets. It's about us, our longings and terrors, and especially the greatest terror of all: the end of our existence. This is a book about UFOs that

goes beyond believing in them or debunking them and to a fresh understanding of what they tell us about ourselves as individuals, as a culture, and as a species. In the 1960s, Halperin was a teenage UFOlogist, convinced that flying saucers were real and that it was his life's mission to solve their mystery. He would become a professor of religious studies, with traditions of heavenly journeys his specialty. With *Intimate Alien*, he looks back to explore what UFOs once meant to him as a boy growing up in a home haunted by death and what they still mean for

millions, believers and deniers alike. From the prehistoric Balkans to the deserts of New Mexico, from the biblical visions of Ezekiel to modern abduction encounters, *Intimate Alien* traces the hidden story of the UFO. It's a human story from beginning to end, no less mysterious and fantastic for its earthliness. A collective cultural dream, UFOs transport us to the outer limits of that most alien yet intimate frontier, our own inner space.
