Opportunities and Challenges Macmillan International Higher Education

Theory and Practice Rowman & Littlefield
 This book explores the multi-sensorial world of wine-tasting language, with a specific focus on communicative dynamics between winemakers and ordinary consumers in the context of online commerce. Promotional tasting notes of labelled wines from Campania—a Southern Italian region famous worldwide for its unique wine tradition—in their Italian and English version, are analysed to pursue the twofold aim of identifying the most common knowledge domains from which wine professionals draw new words from, and assessing the degree of terminological harmonisation between these descriptions and national/international terminological standards. Translation strategies put into use to promote Italian wines to the wider English-speaking audience are also discussed. The book provides a snapshot of wine language and is addressed to linguists and other academics, as well as members of the wine community and ordinary wine drinkers.

 Market-Driven Management adopts a broad approach to marketing, integrating the strategic and operational elements of the discipline. Lambin's unique approach reflects how marketing operates empirically, as both a business philosophy and an action-oriented process. Motivated by the increased complexity of markets, globalisation, deregulation, and the development of e-

commerce, the author challenges the traditional concept of the 4Ps and the functional roles of marketing departments, focusing instead on the concept of market orientation. The book considers all of the key market stakeholders, arguing that developing market relations and enhancing customer value is the responsibility of every member of the organization, and that the development of this customer value is the only way for a firm to achieve profit and growth. New to this edition: - Greater coverage of ethical issues and corporate social responsibility; cultural diversity; value and branding and the economic downturn - Broad international perspective - Thoroughly revised to reflect the latest academic thinking and research With its unique approach, international cases and complementary online resources, this book is ideal for postgraduate and upper level undergraduate students of marketing, and for MBAs and Executive MBAs.

Addressing the immensely important topic of research credibility, Raymond Hubbard's groundbreaking work proposes that we must treat such information with a healthy dose of skepticism. This book argues that the dominant model of knowledge procurement subscribed to in these areas—the significant difference paradigm—is philosophically suspect, methodologically impaired, and statistically broken. Hubbard introduces a more accurate, alternative framework—the significant sameness paradigm—for developing scientific knowledge. The majority of the book comprises a head-to-head comparison of the "significant difference" versus "significant sameness" conceptions of science across philosophical, methodological, and statistical perspectives.
