Understanding Emotions in Mathematical Thinking and Learning Disha Publications
 This timely new book outlines a whole-school approach to embedding a sustainable model of teaching and learning that puts the learner at the heart of the system. It provides an entire framework for ensuring all students achieve above their expectations; incorporating school vision, teacher professional development, assessment models, school culture, leadership and management, and core classroom practices. It takes what the current research suggests does - and does not - work and builds it into a practical approach that has been tried, tested and proven to work. Each section incorporates the research, a model of how this can be embedded across a

school and then a training section that allows senior leaders in schools to teach the skill-set to others to ensure it can be embedded and reviewed. Covering all aspect of teaching and learning including curriculum design, teacher practices, assessment and leadership, the book features: a clear planning framework that is easy to implement; subject based case studies to exemplify good practice; diagrams to clarify and consolidate information; training activities throughout each chapter, also available to download at www.routledge.com/9780415831178. Designed to be used as a training tool for both new and established teachers, this book is essential reading for senior leaders that want to equip their teachers with the skills and knowledge to create a school of outstanding classrooms.

Indian Railways is popularly known as the lifeline of the common man. It holds the pride of being the largest railway network all over the world. In recent years, the government has collaborated with many technical and scientific agencies to provide safer, more comfortable, and more efficient services to its customers. Well, this has led to the immense growth and achievement of the Railway sector including embedded systems, security cameras, fog vision technologies, and solar heat engines, etc. Besides, the Indian Railways stands as one of the largest employers in the nation. Recruitment to this sector is made by the Railway Recruitment Board (RRB).

EduGorilla

Emotions play a critical role in mathematical cognition and learning. Understanding Emotions in Mathematical Thinking and Learning offers a multidisciplinary approach to the role of emotions in numerical cognition, mathematics education, learning sciences, and affective sciences. It addresses ways in which emotions relate to cognitive processes involved in learning and doing

mathematics, including processing of numerical and physical magnitudes (e.g. time and space), performance in arithmetic and algebra, problem solving and reasoning attitudes, learning technologies, and mathematics achievement. Additionally, it covers social and affective issues such as identity and attitudes toward mathematics. Covers methodologies in studying emotion in mathematical knowledge Reflects the diverse and innovative nature of the methodological approaches and theoretical frameworks proposed by current investigations of emotions and mathematical cognition Includes perspectives from cognitive experimental psychology, neuroscience, and from sociocultural, semiotic, and discursive approaches Explores the role of anxiety in mathematical learning Synthesizes unifies the work of multiple sub-disciplines in one place
