Are you interested in learning day trading strategies? If yes, then this is the right book for you! In day trading, traders keep their titles for one day only. Day trading focuses on buying and selling stock during the same day; that's why its techniques and tips are different from the other types of trading. A successful day trader is the one who can take advantage of little movements in the prices of stock by playing around them in the right way. Do you want to learn how to day trade for a living? If yes, then keep reading. Day trading is a form of trading where trades are opened and closed on the same day, enabling the trader to

capitalize on marginal gains earned through the day to day volatility of the market. When you are a day trader, your goal is to identify what stocks are likely to shift into favor that day so that you can conduct your trades accordingly. Generally, day traders will buy their stocks in the morning and hold onto those stocks until later in the day when the marginal gains have accumulated enough to earn a significant profit. Then, they will close the trade by selling the stocks before the end of the day so that they are not left holding any stocks after the market closes. Utilizing the day trading strategy means that your goal is to always be free of stocks in the evening to ensure that you are not exposing yourself to the risk of overnight price changes. As with any form of trading, you want to minimize your risk by never staying in the market longer than you intended to, as doing so could expose you to unforeseen changes that can lead to significant losses. This book covers: Risk and Account Management How to Find Stocks for Trades Tools and Platforms Transactions Borrowings and Fiscal Costs Advanced Options Trading Strategies ...And so much more! Many individuals enter financial markets with the objective of earning a profit from capitalizing on price fluctuations. However, many of these new traders lose their money in attempting to do so. The reason for this is often because these new traders lack any fundamental understanding of financial markets, they cannot interpret any data, and they have no strategy for trading. Trading in markets is really about deploying strategies and managing risks. Indeed, successful traders are those who have strategies which they have proved to be consistent in granting them more

financial gains than financial losses. The purpose of this book is to help a potentially uninformed retail trader or inquisitive reader understand more about financial markets, and assist them in gaining the technical skills required to profit from trading. It represents a beginner's guide to trading, with a core focus on stocks and currencies.

To invest successfully or trade in Stocks, Options, Forex, or even Mutual Funds, it is imperative to know AND understand price and market movements that can only be learned from Technical Analysis. You should NEVER attempt Trading or Investing without

it!My 25 years experience has taught me that 'Every book on the market' regarding Charting and Technical Analysis are seemingly worthless! All seem to find yet another creative way to tell you to "Buy Low and Sell High!" And they offer NO in-depth understanding or analysis about WHO is buying and WHO is selling, and when.Point is, anyone, experienced or not, can show you a picture of a Chart and tell you to buy at the bottom and sell at the top. That is simple 'hindsight', and is always 20/20!This book is different! It is IN-DEPTH - EXPLAINED and you WILL learn price movements and technical analysis from this information!You will understand and recognize tops and bottoms in the market and in particular stocks, AS they are forming. This is highly valuable information, and you should NEVER attempt to trade or invest without this knowledge!Mutual Funds? Most people think they do not need this information because the have a Mutual Fund. That could not be farther from the truth. Investing your hard-earned money should be done with your own knowledge of market direction, when to buy, and when to move your money to safety. Without this knowledge you are at the mercy of a salesperson hungry to earn a commission. Thus, invariably entering the market at the wrong time and in the wrong investment. No one else has your best interest in mind, either learn to protect your money or keep it in the bank. It's that simple. The next move is yours.
