 Chemical Reactions Date: Pre-Lab Questions 1. Describe the hazards associated with each of the
 materials listed below and the precautions recommended in this lab. a. Heated (ONH,CO, b. 0.10M
 HCl c. 0.10 M NaOH 2. Distinguish between: a. Exothermic and endothermic reactions b. Single and
 double displacement reactions 3.Solved: Name: Section: Classifying Chemical Reactions Date
 ...Answers to Pre-Lab Quiz (p. 67) 1. d, tissues 2. 4 3. true 4. c, squamous 5. c, mesenchyme 6. c,
 neurons 7. true 8. neurons 9. 3 10. c, smooth Answer to Group Challenge 1 (pp. 74-75) Magnified
 Appearance Tissue Type Locations in the Body • Apical surface has dome-shaped cells (flattened
 cells may also be mixed in).Laboratory Materials - Holly H. Nash-Rule, PhDPrepare your students
 for medical and lab tech careers with Carolina's wide range of equipment, kits and models.
 Genetics Carolina offers a variety of resources and products to help your students delve into the
 emerging area of Genetics.Classifying Chemical Reactions | Carolina.comTranscript of Unit 5:
 Classifying Reactions Lab. Soak the steel wool in the vinegar. Pour a small amount of water into
 the white bowl. Shake off all the extra vinegar. Tape the steel wool into the bottom of the empty
 clear jar. Place the jar into the water upside-down. The Steel wool is turning brown.Unit 5:
 Classifying Reactions Lab by Aurora Rodriguez on PreziName Part 1 of the lab: Classifying
 Reactions Lab Part 2 Answers Observations: Appearance after initial mixing: Appearance after 30

minutes: Analysis/Conclusion: 1. Balance the equation, if necessary, for the reaction between
 magnesium sulfate and ammonia.Classifying Reactions Lab by Aurora Rodriguez on PreziWrite a
 balanced chemical equation for each reaction and classify the reaction. 1. Copper metal heated
 with oxygen gives solid copper (II) oxide. a. $2\text{Cu} + \text{O}_2 \rightarrow 2\text{CuO}$ b. Synthesis 2. Mixing ammonium
 nitrate and sodium hydroxide solutions gives aqueous sodium nitrate, ammonia gas, and water.1
 Write a balanced chemical equation for each reaction 1 8 ...Name: Hour: Lab: Identifying Elements,
 Compounds, and Mixtures. Directions: Read through the review chart below and answer the pre-lab
 questions. Then, rotate through the stations, identifying each substance as an element, compound,
 or mixture. If it is a mixture, be sure to include whether it is homogeneous or heterogeneous.Lab:
 Identifying Elements, Compounds, and MixturesThis lab was updated on June 1st 2015 this
 document is downloadable immediately after purchase and contains all of the answers to the
 whole lab. Taxonomy . Pre-Lab Questions. Use the following classifications to determine which
 organism is least related out of the three. Explain your rationale.Escience Labs Taxonomy,
 Experiment 1: Dichotomous Key ...Then use a toothpick to swirl the reaction mixture and touch the
 toothpick to the pH paper. If there is a difference then a reaction occurred. Use this as evidence
 the same way a precipitate or other information would be used to classify reactions. Pre-Lab
 Questions *Students must show their work to receive full credit. 1.Lab 6 Worksheet | Chemistry I
 Laboratory Manual3 SCIENTIFIC METHOD The Penny Drop Lab Introduction: Which side of a penny
 will hold more drops of water before spilling over on to a paper towel? OBJECTIVE: In this activity,
 you will use the scientific method of inquiry to perform a laboratory experiment. The basic parts of
