Start profiting from commodities,
commodity options, and currencies! All
you need to know, in 3 practical, easy-
to-use books! Start profiting from
commodities, commodity options, and

currencies! Here's all the knowledge you need, in three comprehensive, easy-to-understand eBooks – all at one low price. In *A Trader's First Book on Commodities: An Introduction to The World's Fastest Growing Market*, top trader/instructor Carley Garner brings together the crucial commodities information you need before you make your first trade. Garner explains the entire trading process, demystifies the unique language of commodities trading, shows how to avoid costly mistakes, and introduces indispensable market analysis techniques and trading strategies. Next, in *Commodity Options*, Garner and co-author Paul Brittain introduce powerful new trading techniques for the expanding commodities marketplace. Garner and Brittain present strategies

optimized for the unique characteristics of commodity options, illuminating the true risks and rewards with easy-to-understand charts and visuals that help you match your approach to your personal risk tolerance. Finally, in *Currency Trading in the Forex and Futures Markets*, Garner covers everything you new to know to earn big profits in currency trading – and avoid these markets' unique pitfalls and aggressive, unscrupulous marketers. Garner reviews each major venue for trading currencies, including Forex spot markets, currency futures, and currency ETFs, and demystifies issues ranging from market access to profit calculation, risk to analysis. Using these three widely-praised eBooks, you can identify markets and approaches that best serve

your objectives, avoid costly errors, and earn huge new profits in any market environment. From leading options traders, columnists, and instructors Carley Garner and Paul Brittain

An Introduction to Algorithmic Trading Spectra

Explains the workings of the commodity futures market, describes methods for analyzing the futures market, and offers advice on trading in futures

Trading in the Zone Routledge

Trading is generally far more difficult in practice than in theory. The reality is that no trade set up or individual trader or system can identify profitable trades in advance with complete certainty. In A Year of Trading, long-time trader Peter Brandt reveals the anxieties and uncertainties of trading in a diary of his

2009 trades. He explains his thought process as he searches for trading opportunities and executes them. Each trade includes charts, an analysis of the trade, and a play-by-play account of how the trade unfolds.

Becoming Trader Joe A Trader's First Book on Commodities Everything You Need to Know about Futures and Options Trading Before Placing a Trade

A brand new collection of high-profit commodity trading techniques and insights All the knowledge you need to start earning consistent profits in commodities trading! You can make huge profits by trading commodities – if you know how. You must know how these markets work, how they're different, where the risks are hidden, and how to avoid the mistakes too many

beginners make. You need realistic, up-to-the-minute strategies, skills, and knowledge from experts who trade commodities every single day. This unique 2 book package delivers all that. In *A Trader's First Book on Commodities: An Introduction to the World's Fastest Growing Market, Second Edition*, Carley Garner offers specific and current guidance on accessing commodity markets cost-effectively, and systematically improving your odds of successful, profitable trades. Garner covers new trading platforms, contracts, fees, and strategies, and offers a clear-eyed look at today's realities, including the scandalous failures of MF Global and PFG Best. Drawing on extensive experience teaching traders, Garner shows how to calculate profit, loss, and

risk in commodities; and choose the best brokerage firm, service level, data sources, and more. She demystifies the industry's colorful language, helps you clearly understand every trade you make, walks you through the entire process, and illuminates everything from logistics to psychology. Next, in *Trading Commodities and Financial Futures, A Step-by-Step Guide to Mastering the Markets, Fourth Edition*, George Kleinman introduces powerful new trend-based techniques for identifying trades that fit right into your "sweet spot" for profits. You'll learn how these markets have changed—and how to successfully use discipline to avoid today's "shark-infested waters." Building on 30+ years of success, Kleinman offers updated coverage of electronic trading, new

contracts, and advanced techniques, including his exclusive Pivot Indicator approach. You'll learn how to develop the deep discipline that characterizes all winning commodities and futures traders, as you gain critical knowledge about each leading market, including agricultural commodities, energy, metals, soft commodities, and financials. Kleinman helps you master today's most valuable technical analysis tools for trading commodities, and even reveals 25 indispensable trading secrets of the pros. From world-renowned commodities trading experts George Kleinman and Carley Garner

Diary of a Professional Commodity

Trader John Wiley & Sons

NEW YORK TIMES BESTSELLER

Shortlisted for the Financial

Times/McKinsey Business Book of the Year Award The unbelievable story of a secretive mathematician who pioneered the era of the algorithm--and made \$23 billion doing it. Jim Simons is the greatest money maker in modern financial history. No other investor-- Warren Buffett, Peter Lynch, Ray Dalio, Steve Cohen, or George Soros--can touch his record. Since 1988, Renaissance's signature Medallion fund has generated average annual returns of 66 percent. The firm has earned profits of more than \$100 billion; Simons is worth twenty-three billion dollars. Drawing on unprecedented access to Simons and dozens of current and former employees, Zuckerman, a veteran Wall Street Journal investigative reporter, tells the gripping story of how a world-class

mathematician and former code breaker mastered the market. Simons pioneered a data-driven, algorithmic approach that's sweeping the world. As Renaissance became a market force, its executives began influencing the world beyond finance. Simons became a major figure in scientific research, education, and liberal politics. Senior executive Robert Mercer is more responsible than anyone else for the Trump presidency, placing Steve Bannon in the campaign and funding Trump's victorious 2016 effort. Mercer also impacted the campaign behind Brexit. *The Man Who Solved the Market* is a portrait of a modern-day Midas who remade markets in his own image, but failed to anticipate how his success would impact his firm and his country. It's also a story of what

Simons's revolution means for the rest of us.

A Complete Guide to the Futures Market
John Wiley & Sons

A Trader's First Book on Commodities is guaranteed to shorten the learning curve for beginning traders while offering seasoned traders a new perspective on familiar topics. There's more to trading than oscillators and trendlines; profitable trading is only possible in a conducive environment (brokerage, platform, mindset, support, and awareness).

A Comprehensive Guide to Commodity Market Analysis, Strategy Development, and Risk Management Techniques Aimed at Favorably Shifting the Odds of Success
John Wiley & Sons

A common denominator among most new traders is that, within six months of

launching their new pursuit, they are out of money and out of trading. High-Probability Trading softens the impact of this "trader's tuition," detailing a comprehensive program for weathering those perilous first months and becoming a profitable trader. This no-nonsense book takes a uniquely blunt look at the realities of trading. Filled with real-life examples and intended for use by both short- and long-term traders, it explores each aspect of successful trading.

Trader'S First Book On Commodities FT

Press

Distills complex theories for the benefit of the average trader with little or no background in finance or mathematics by offering a wide range of valuable, practical strategies for limiting risk, avoiding catastrophic losses and managing the futures portfolio to maximize profits. Numerous topics are explored including: why most traders lose at the futures game most of the time; why most mechanical trading systems are apt to fail; the probabilistic approach to trading; how to make stop-loss orders work for, rather than against you; the pros and cons of options versus futures trading; and how to limit risk through diversification.

The Man Who Solved the Market
Currency

“A truly extraordinary saga . . . The characterizations are consistently superb, and [Hobb] animates everything with love for and knowledge of the sea.”—Booklist
Bingtown is a hub of exotic trade and home to a merchant nobility famed for its liveships—rare vessels carved from wizardwood, which ripens magically into sentient awareness. Now the fortunes of one of Bingtown’s oldest families rest on the newly awakened liveship Vivacia. For Althea Vestrit, the ship is her rightful legacy. For Althea’s young nephew, wrenched from his religious studies and forced to serve aboard the ship, the Vivacia is a life sentence. But the fate of the ship—and the Vestrits—may ultimately lie in the hands of an outsider: the ruthless buccaneer captain Kennit,

who plans to seize power over the Pirate Isles by capturing a liveship and bending it to his will. BONUS: This edition includes an excerpt from Robin Hobb's Mad Ship. Praise for Robin Hobb and the Liveship Traders Trilogy "Fantasy as it ought to be written . . . Robin Hobb's books are diamonds in a sea of zircons."—George R. R. Martin "A major work of high fantasy, reading like a cross between Tolkien and Patrick O'Brian . . . one of the finest fantasy sagas to bridge the millennium."—Publishers Weekly "Rich, complex . . . [Hobb's] plotting is complex but tightly controlled, and her descriptive powers match her excellent visual imagination. But her chief virtue is that she delineates character extremely well."—Interzone
High-Probability Trading Penguin

This book takes readers on an unprecedented journey through the commodity markets; shedding light on topics rarely discussed in trading literature from a unique perspective. *Day Trading Micro Futures for Income* Strelbytsky Multimedia Publishing "Reminiscences of a Stock Operator" is the most widely read, highly recommended investment book ever. Generations of readers have found that it has more to teach them about markets and people than years of experience. This is a timeless tale that will enrich your life - and your portfolio. Well known investor: Benjamin Graham, Warren Buffett, Philip Arthur Fisher, John Burr Williams, Charlie Munger, George Soros
Interviews with Top Traders Oxford University Press

Praise for Trading Price Action Trading Ranges "Al Brooks has written a book every day trader should read. On all levels, he has kept trading simple, straightforward, and approachable. By teaching traders that there are no rules, just guidelines, he has allowed basic common sense to once again rule how real traders should approach the market. This is a must-read for any trader that wants to learn his own path to success." —Noble DraKoln, founder, SpeculatorAcademy.com, and author of Trade Like a Pro and Winning the Trading Game "A great trader once told me that success was a function of focused energy. This mantra is proven by Al Brooks, who left an ophthalmology practice to become a day trader. Al's intense focus on daily price

action has made him a successful trader. A born educator, Al also is generous with his time, providing detailed explanations on how he views daily price action and how other traders can implement his ideas with similar focus and dedication. Al's book is no quick read, but an in-depth roadmap on how he trades today's volatile markets, complete with detailed strategies, real-life examples, and hard-knocks advice." —Ginger Szala, Publisher and Editorial Director, Futures magazine Over the course of his career, author Al Brooks, a technical analysis contributor to Futures magazine and an independent trader for twenty-five years, has found a way to capture consistent profits regardless of market direction or economic climate. And now, with his new three-book series—which

focuses on how to use price action to trade the markets—Brooks takes you step by step through the entire process. In order to put his methodology in perspective, Brooks examined an essential array of price action basics and trends in the first book of this series, *Trading Price Action TRENDS*. Now, in this second book, *Trading Price Action TRADING RANGES*, he provides important insights on trading ranges, breakouts, order management, and the mathematics of trading. Page by page, Brooks skillfully addresses how to spot and profit from trading ranges—which most markets are in, most of the time—using the technical analysis of price action. Along the way, he touches on some of the most important aspects of this approach, including trading

breakouts, understanding support and resistance, and making the most informed entry and exit decisions possible. Throughout the book, Brooks focuses primarily on 5 minute candle charts—all of which are created with TradeStation—to illustrate basic principles, but also discusses daily and weekly charts. And since he trades more than just E-mini S&P 500 futures, Brooks also details how price action can be used as the basis for trading stocks, forex, Treasury Note futures, and options. *Money, Power, and the Traders Who Barter the Earth's Resources* Macmillan

The last few years have been a watershed for the commodities, cash and derivatives industry. New regulations and products have led to an explosion in the commodities markets,

creating a new asset for investors that includes hedge funds as well as University endowments, and has resulted in a spectacular growth in spot and derivative trading. This book covers hard and soft commodities (energy, agriculture and metals) and analyses: Economic and geopolitical issues in commodities markets Commodity price and volume risk Stochastic modelling of commodity spot prices and forward curves Real options valuation and hedging of physical assets in the energy industry It is required reading for energy companies and utilities practitioners, commodity cash and derivatives traders in investment banks, the Agrifood business, Commodity Trading Advisors (CTAs) and Hedge Funds. In *Commodities and Commodity*

Derivatives, Hélyette Geman shows her powerful command of the subject by combining a rigorous development of its mathematical modelling with a compact institutional presentation of the arcane characteristics of commodities that makes the complex analysis of commodities derivative securities accessible to both the academic and practitioner who wants a deep foundation and a breadth of different market applications. It is destined to be a "must have" on the subject." —Robert Merton, Professor, Harvard Business School "A marvelously comprehensive book of interest to academics and practitioners alike, by one of the world's foremost experts in the field." —Oldrich Vasicek, founder, K&M

Revolution Pearson Education
Earn consistent profits trading commodities, even if you're a newcomer to the commodities markets! Carley Garner's A Trader's First Book on Commodities, Second Edition is today's most practical and realistic introduction to successful commodities trading. More than any other primer, it recognizes that the most important trading decisions are made long before the first trade is executed. Drawing on years of dealing with retail traders from all walks of life, experience levels, and amounts of risk capital, Garner answers the most pressing questions newcomers ask -- and the questions they haven't realized they need to ask. This extensively updated Second Edition reflects major changes in the market over the past three years,

including new trading challenges, platforms, tools, data resources, and risks. Garner presents a hard-eyed look at the collapses of MF Global and PFGBEST, their failure to honor the sanctity of "Customer Segregated Funds" accounts, the implications for investors, and techniques for mitigating these new risks. She has added new charts and example trades throughout; new coverage of commodity impacts arising from recent events in Europe; important information about new technological improvements and competitive intraday position margin standards; and much more.
How I Did Business My Way and Still Beat the Big Guys Decarley Trading, LLC
How top traders made huge profits during the most momentous market

events of the past century Financial and commodity markets are characterized by periodic crashes and upside explosions. In retrospect, the reasons behind these abrupt movements often seem very clear, but generally few people understand what's happening at the time. Top traders and investors like George Soros or Jesse Livermore have stood apart from the crowd and capitalized on their unique insights to capture huge profits. Engaging and informative, *The Greatest Trades of All Time* chronicles how a select few traders anticipated market eruptions?from the 1929 stock market crash to the 2008 subprime mortgage meltdown?and positioned themselves to excel while a majority of others failed. Along the way,

author Vincent Veneziani describes the economic and financial forces that led to each market cataclysm and how these individuals perceived what was happening beforehand and why they decided to place big bets, often at great risk and in opposition to consensus opinion at the time. Traders discussed include George Soros, Jesse Livermore, Paul Tudor Jones, John Templeton, and John Paulson Provide contemporary traders and investors with insights on how great traders make great trades Offers insights on market forecasting, mass psychology, and the importance of personal conviction in trading At a time when many investors are looking to the past for answers to the future, this book brings important historical moments in the financial markets to life.
