Despite the difference in their populations and political status, New Caledonia and Papua New Guinea have comparable levels of economic dependence on the extraction and export of mineral resources. For this reason, the costs and benefits of large-scale mining projects for indigenous communities has been a major political issue in both jurisdictions, and one that has come to be negotiated through multiple channels at different levels of political organisation. The 'resource boom' that took place in the early years of the current century has only served to intensify the political contests and conflicts that surround the distribution of social, economic and environmental costs and benefits between community members and other 'stakeholders' in the large-scale mining industry. However, the mutual isolation of Anglophone and Francophone scholars has formed a barrier to systematic comparison of the relationship between large-scale mines and local-level politics in Papua New Guinea and New Caledonia, despite their geographical proximity. This collection of

essays represents an effort to overcome this barrier, but is also intended as a major contribution to the growth of academic and political debate about the social impact of the large-scale mining industry in Melanesia and beyond.

 Winner of the 1998 Paul A. Samuelson

Award given by TIAA-CREF, The Evolution of Retirement is the first comprehensive economic history of retirement in America. With life expectancies steadily increasing, the retirement rate of men over age 64 has risen drastically. Dora L. Costa looks at factors underlying this increase and shows the dramatic implications of her findings for both the general public and the U.S. government. Using statistical, and demographic concepts, Costa sheds light on such important topics as rising incomes and retirement, work and disease, the job prospects of older workers, living arrangements of the elderly, the development of a retirement lifestyle, and pensions and politics. "[Costa's] major contribution is to show that, even without Social Security and Medicare, retirement would have expanded dramatically."—Robert J. Samuelson, *New Republic* "An important book on a topic which has become popular with historians and is of major significance to politicians and economists."—Margaret Walsh, *Business History*

Acoustic Properties: Radio, Narrative, and the New Neighborhood of the Americas discovers the prehistory of wireless culture. It examines both the coevolution of radio and the novel in Argentina, Cuba, and the United States from the early 1930s to the late 1960s, and the various populist political climates in which the emerging medium of radio became the chosen means to produce the voice of the people. Based on original archival research in Buenos Aires, Havana, Paris, and the United States, the book develops a literary media theory that understands sound as a transmedial phenomenon and radio as

a transnational medium. Analyzing the construction of new social and political relations in the wake of the United States' 1930s Good Neighbor Policy, *Acoustic Properties* challenges standard narratives of hemispheric influence through new readings of Richard Wright's cinematic work in Argentina, Severo Sarduy's radio plays in France, and novels by John Dos Passos, Manuel Puig, Raymond Chandler, and Carson McCullers. Alongside these writers, the book also explores Che Guevara and Fidel Castro's *Radio Rebelde*, FDR's fireside chats, Félix Caignet's invention of the radionovela in Cuba, Evita Perón's populist melodramas in Argentina, Orson Welles's experimental New Deal radio, Cuban and U.S. "radio wars," and the 1960s African American activist Robert F. Williams's proto-black power *Radio Free Dixie*. From the doldrums of the Great Depression to the tumult of the Cuban Revolution, *Acoustic Properties* illuminates how novelists in the radio age converted writing into a practice of listening, transforming realism as they struggled to channel and shape popular power.

"Healthy mental, emotional, and behavioral (MEB) development is a critical foundation for a productive adulthood. Much is known about strategies to support families and communities in strengthening the MEB development of children and youth, by promoting healthy development and also by preventing and mitigating disorder, so that young people reach adulthood ready to thrive and contribute to society. Over the last decade, a growing body of research has significantly strengthened understanding of healthy MEB

development and the factors that influence it, as well as how it can be fostered. Yet, the United States has not taken full advantage of this growing knowledge base. Ten years later, the nation still is not effectively mitigating risks for poor MEB health outcomes; these risks remain prevalent, and available data show no significant reductions in their prevalence. *Fostering Healthy Mental, Emotional, and Behavioral Development in Children and Youth: A National Agenda* examines the gap between current research and achievable national goals for the next ten years. This report identifies the complexities of childhood influences and highlights the need for a tailored approach when implementing new policies and practices. This report provides a framework for a cohesive, multidisciplinary national approach to improving MEB health"--Publisher's description

Faking it till you make it doesn't work—at least, not long enough to build a sustainable business. This book by a CEO and public relations expert shows how authentic leadership eliminates the need for short-cuts that sabotage success. Self-doubt and the intense pressure of facing the unknown are real problems for entrepreneurs and leaders. But there's a difference between feigning confidence and running a con game; Elizabeth Holmes and Billy McFarland thrived on faking it for a short while, but their businesses were all aspiration, no foundation, and so collapsed disastrously. This book revisits the core of leadership, defines authentic, reality-based business integrity, and shows readers how to attain and maintain it. Through the double lens of running her own PR firm in Silicon Valley and advising hundreds of other executives, award-winning CEO Sabrina Horn shows leaders how to attend to the fundamentals and gain the clarity of thought necessary to make sound business decisions. She delivers real, workable strategies and best practices with firsthand accounts of painful lessons. Horn's fake-free advice will empower leaders to disarm fear and organize risk, manage setbacks, plan for the unexpected, and create a company culture designed for long-term, sustainable growth.
