SOLID ROCKET COMPONENTS AND MOTOR DESIGN Solid Rocket Components And MotorA simple solid rocket motor consists of a casing, nozzle, grain (propellant charge), and igniter.. The solid grain mass burns in a predictable fashion to produce exhaust gases, the flow of which is described by Taylor-Culick flow.The nozzle dimensions are calculated to maintain a design chamber pressure, while producing thrust from the exhaust gases.Solid-propellant rocket - Wikipedia542 SOLID ROCKET COMPONENTS AND MOTOR DESIGN TABLE 14--2. Physical Properties of Selected Solid Propellant Motor Case Materials at 20°C Material Tensile Modulus of Strength Strength, Elasticity, Density, to Density N/ram 2 N/mm 2 g/cm 3 Ratio (103 psi) (106 psi) (lbm/in. 3) (1000 E-glass Aramid (Kevlar 49) ...SOLID ROCKET COMPONENTS AND MOTOR DESIGNRCS Rocket Motor Components (RCS), Inc. products are sold "as-is" and no warranty, suitability or fitness for any particular application, either expressed or implied, is made regarding RCS products.
