 What's for dinner? Not
 just in America, but
 around the world? And
 how is it cooked, what's
 the historical significance
 of that food, how is it
 served and consumed,
 and who gets to clean up?
 This book provides
 fascinating insight into
 how dinner is defined in
 countries around the
 world. Almost universally,
 "dinner" is a key meal in
 most countries around the
 world, whether it be a
 simple dish of rice and
 beans, a slice of pizza on

the go, or a multi-course
 formal meal. What do the
 specifics of how a meal is
 eaten-by hand instead of
 with utensils, for example-
 say about a specific
 culture? This fascinating
 one-volume reference
 guide examines all
 aspects of dinner in
 international settings,
 enabling insightful cross-
 cultural comparisons and
 an understanding of the
 effects of modernization
 and globalization on food
 habits. Some 50 countries
 are covered in chapters
 focusing on present-day
 meal habits in Europe,
 Asia, the Middle East,
 Africa, and North and
 South America. The
 commentary covers
 everything about the
 meal, such as the time,
 the cooking and

preparation, shopping for
 ingredients, the clean-up
 process, gender-based
 participation roles,
 conversation or other
 social interactions, and
 etiquette-just about
 everything that happens
 at the table. The book is
 ideal for classroom
 teaching and learning, as
 the entries and photos are
 conducive to teaching
 students about other
 cultures, directly
 supporting the National
 Geography Standards.
 Students will be able to
 make informed
 comparisons between
 their own lives and the
 various cultural
 experiences described in
 the book.

An updated, concise reference for the Java programming language, version 8.0, and essential parts of its class languages, offering more detail than a standard textbook. The third edition of Java Precisely provides a concise description of the Java programming language, version 8.0. It offers a quick reference for the reader who has already learned (or is learning) Java from a standard textbook and who wants to know the language in more detail. The book presents the entire Java programming language and essential parts of the class libraries: the collection classes, the input-output classes, the stream libraries and Java 8's facilities for parallel programming, and the functional interfaces used for that. Though written informally, the book describes the language in detail and offers many

examples. For clarity, most of the general rules appear on left-hand pages with the relevant examples directly opposite on the right-hand pages. All examples are fragments of legal Java programs. The complete ready-to-run example programs are available on the book's website. This third edition adds material about functional parallel processing of arrays; default and static methods on interfaces; a brief description of the memory model and visibility across concurrent threads; lambda expressions, method reference expressions, and the related functional interfaces; and stream processing, including parallel programming and collectors.

Java Precisely, third edition John Wiley & Sons 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep

into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological

process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.
