Tektronix 2336 User Guide
 The Tektronix 2336 is a ruggedized portable dual-channel, 100 MHz analog scope. An A Ext connector (external signal to the A Trigger Generator) on the front panel, B Ext connector (external signal to the B Trigger Generator) on the front cover, and External Z-Axis connector at the rear round out its connectivity.

 Dear Internet Archive Community, I'll get right to it: please support the Internet Archive today. Right now, we have a 2-to-1 Matching Gift Campaign, so you can triple your impact, but time is running out! Most can't afford to give, but we hope you can. The average donation is \$45.
 Tektronix Manual: 2336 - Internet Archive
 Long Term Support on the 2336 ended in 1999. Not only is the product obsolete, but my resources for supporting it fade away. The 2336 was made before digital copies of manuals were made. I would try BAMA (Boat Anchor Manual Archive) first. If that doesn't work, Google. I do not have one, nor can I get one.
 TEK 2336 No trace / service manual - Tektronix and Keithley
 Just bought a Tektronix 2336 YA off ebay. It does a wonderful job of displaying horizontal lines, but not much else. I popped it open, and it seems that the CH1 and CH2 BNC connectors don't actually connect to anything inside the scope.
 Tektronix 2336 YA -- service manual wanted - Page 1
 Hi, all, I bought an analog Tektronix 2336 YA scope off of vendor a few days back. Almost everything appears to be fine with it (i.e. horizontal beam, visible CAL square wave, etc.) as far as I can tell, as this is my first scope. However, when I try adjust the beam vertically on the screen, I can only get it to go about halfway up the screen.
