Learn 30 mind-blowing illusions to amaze your friends and family Modern Library
 An extraordinary memoir about finding wonder in everyday life, from magician Nate Staniforth. Nate Staniforth has spent most of his life and all of his professional career trying to understand wonder--what it is, where to find it, and how to share it with others. He became a magician because he learned at a young age that magic tricks don't have to be frivolous. Magic doesn't have to be about sequins and smoke machines--rather, it can create a moment of genuine astonishment. But after years on the road as a professional magician, crisscrossing the country and performing four or five nights a week, every week, Nate was disillusioned, burned out, and ready to quit. Instead, he went to India in search of magic. Here Is Real Magic follows Nate Staniforth's evolution from an obsessed young magician to a broken wanderer and back again. It tells the story of his rediscovery of astonishment--and the importance of wonder in everyday life--during his trip to the slums of India, where he infiltrated a three-thousand-year-old clan of street magicians. Here Is Real Magic is a call to all of us--to welcome awe back into our lives, to marvel in the everyday, and to seek magic all around us.

The Life and Afterlife of Harry Houdini Penguin

A middle-grade fantasy and nonstop adventure, *The Train to Impossible Places* by debut author P. G. Bell is as fun as it is full of heart, and the first book of a trilogy. A train that travels through impossible places. A boy trapped in a snow globe. And a girl who's about to go on the adventure of a lifetime. The Impossible Postal Express is no ordinary train. It's a troll-operated delivery service that runs everywhere from ocean-bottom shipwrecks, to Trollville, to space. But when this impossible train comes roaring through Suzy's living room, her world turns upside down. After sneaking on board, Suzy suddenly finds herself Deputy Post Master aboard the train, and faced with her first delivery--to the evil Lady Crepuscula. Then, the package itself begs Suzy not to deliver him. A talking snow globe, Frederick has information Crepuscula could use to take over the entire Union of Impossible Places. But when protecting Frederick means putting her friends in danger, Suzy has to make a difficult choice--with the fate of the entire Union at stake.

Stage Illusions and Scientific Diversions, Including Trick Photography Bonnier Publishing Ltd.

'I immersed myself in magic. I read every book I could get my hands on and practised and practised, day after day and night after night. Magic became my world...some might say an obsession.' When you're a kid life can seem tough; tougher for some than others. But the darkest of times can also be the most enlightening. When his late granddad showed him magic for the first time, Steven Frayne knew there was more to life than hiding from bullies. He had a destiny. A calling. In that moment Dynamo was born: the most exciting magician of the 21st century. Since then, Dynamo has shocked, thrilled and amazed men, women and children, from all walks of life, all over the world. With his mind-blowing illusions, he has catalysed a whole new era of magic. Now, in his very first book, Dynamo invites you to join him on a breathtaking journey across the globe. Be prepared to levitate Lindsay Lohan in Singapore, transform snow into diamonds in the Austrian mountains, and walk on water across the River Thames. Along the way, he reveals how to make the impossible possible, what it takes to pull off the greatest stunts man has seen, and why everyone needs magic in their lives. This is no illusion. This is Dynamo revealed.

Charlie and the Great Glass Elevator Random House Trade Paperbacks

The Magus is the story of Nicholas Urfe, a young Englishman who accepts a teaching assignment on a remote Greek island. There his friendship with a local millionaire evolves into a deadly game, one in which reality and fantasy are deliberately manipulated, and Nicholas must fight for his sanity and his very survival.

The Perversity of Things GENERAL PRESS

When Pilchard keeps disappearing, Roley doesn't know why. So he follows the stripy cat and gets a big surprise.

The Morning of the Magicians Profile Books

Chapters in this book include trick photography, chronophotography and the projection of motion pictures. We find here evidence of the popularity and connections between magic and photography at the turn of the century, which is depicted effectively in the recent movie *The Illusionist*. Of course, the first photographers, such as Louis Daguerre, were magicians and masters of stage illusions.

Bloomsbury Publishing

First published in 1927.

Big Book of Magic Tricks Feiwel & Friends

Flipper the Seal discovers something round and strange, and takes it to all his animal friends to ask if they know what it is.

The Master Key System "O'Reilly Media, Inc."

The first Situationist text to be published in the UK in 1974, 'Leaving the 20th Century' was Chris Gray and the English situationists' attempt to capture and distil the vibrant anti-art, anti-capitalist energy of the original International Situationist texts (1957-74). With its loose translations and irreverent commentary, Gray and co. attempted to capture the "terrorism, wit and general megalomania" of the original publications, whilst faithfully reprinting the "photographs of girls, soldiers, bombings, comic-strip frames, maps of cities and diagrams of labyrinths, cathedrals and gardens." From the art/anti-art beginnings, to the role of the Situationists in the worker-student insurrection of May 68', 'Leaving the 20th Century' remains the definitive English pro-situ text.

Motivation And Personality Prabhat Prakashan

New York Times Bestseller: An "elegant" mosaic of trenchant observations on the late sixties and seventies from the author of *Slouching Towards Bethlehem* (The New Yorker). In this landmark essay collection, Joan Didion brilliantly interweaves her own "bad dreams" with those of a nation confronting the dark underside of 1960s counterculture. From a jailhouse visit to Black Panther Party cofounder Huey Newton to witnessing First Lady of California Nancy Reagan pretend to pick flowers for the benefit of news cameras, Didion captures the paranoia and absurdity of the era with her signature blend of irony and insight. She takes readers to the "giddily splendid" Getty Museum in Los Angeles, the cool mountains of Bogotá, and the Jordanian Desert, where Bishop James Pike went to walk in Jesus's footsteps--and died not far from his rented Ford Cortina. She anatomizes the culture of shopping malls--"toy garden cities in which no one lives but everyone consumes"--and exposes the contradictions and compromises of the women's movement. In the iconic title essay, she documents her uneasy state of mind during the years leading up to and following the Manson murders--a terrifying crime that, in her memory, surprised no one. Written in "a voice like no other in contemporary journalism," *The White Album* is a masterpiece of literary reportage and a fearless work of autobiography by the National Book Award-winning author of *The Year of Magical Thinking* (The New York Times Book Review). Its power to electrify and inform remains undiminished nearly forty years after it was first published.

Unlock the Secrets of Influence, Charisma, and Showmanship Avid Reader Press / Simon & Schuster
 Learn to do astounding tricks with cards, coins, rope; also, comedy magic, mental dexterity, more. Few props and little sleight of hand needed. "The best book yet on easy-to-do magic." — Martin Gardner. 247 illustrations.

The Mystic Test Book or the Magic of the Cards Lulu.com

David Blaine, downtown hipster and extraordinary illusionist, offers an exploration of the mysteries and history of the ancient art of magic. Mysterious Stranger brings Blaine's magic directly to his audience. In the book you'll find: mind-bending tricks you can learn to do yourself; interactive magic effects; mind-reading and psychic techniques; David Blaine's unique perspective on the art of magic;

a copiously illustrated history of the art; and autobiographical background and an insight into David's private world.

Essentials of Paleomagnetism Harper Collins

Joe Posnanski enters the colorful world of Harry Houdini and his legions of devoted fans to explore the illusionist's impact on global culture—and why his legacy endures to this day. Nearly a century after Harry Houdini died on Halloween in 1926, he feels as modern and alive as ever. The name Houdini still leaps to mind whenever we witness a daring escape. The baby who frees herself from her crib? Houdini. The dog who vanishes and reappears in the neighbor's garden? Houdini. Every generation produces new disciples of the magician, from household names in magic like David Copperfield and David Blaine to countless other followers whose lives have been transformed by the power of Houdini. In rural Pennsylvania, a thirteen-year-old girl finds the courage to leave a violent home after learning that Houdini ran away to join the circus; she eventually becomes the first female magician to saw a man in half on television. In Australia, an eight-year-old boy with a learning impediment feels worthless until he sees an old poster of Houdini advertising "Nothing on earth can hold Houdini prisoner," and begins his path to becoming that nation's most popular magician. In California, an actor and Vietnam War veteran finds purpose in his life by uncovering the secrets of his hero. But the unique phenomenon of Houdini was always more than his death-defying stunts or his ability to escape handcuffs and straitjackets. It is also about the power of imagination and self-invention. His incredible transformation from Ehrich Weiss, humble Hungarian immigrant and rabbi's son, into the self-named Harry Houdini has won him a slice of immortality. No one has withstood the test of time quite like Houdini. Fueled by Posnanski's personal obsession with the magician—and magic itself—*The Life and Afterlife of Harry Houdini* is a poignant odyssey of discovery, blending biography, memoir, and first-person reporting to trace Houdini's metamorphosis into an iconic figure who has inspired millions.

Here Is Real Magic Open Road Media

Data is at the center of many challenges in system design today. Difficult issues need to be figured out, such as scalability, consistency, reliability, efficiency, and maintainability. In addition, we have an overwhelming variety of tools, including relational databases, NoSQL datastores, stream or batch processors, and message brokers. What are the right choices for your application? How do you make sense of all these buzzwords? In this practical and comprehensive guide, author Martin Kleppmann helps you navigate this diverse landscape by examining the pros and cons of various technologies for processing and storing data. Software keeps changing, but the fundamental principles remain the same. With this book, software engineers and architects will learn how to apply those ideas in practice, and how to make full use of data in modern applications. Peer under the hood of the systems you already use, and learn how to use and operate them more effectively. Make informed decisions by identifying the strengths and weaknesses of different tools. Navigate the trade-offs around consistency, scalability, fault tolerance, and complexity. Understand the distributed systems research upon which modern databases are built. Peek behind the scenes of major online services, and learn from their architectures.

Microbe Hunters Orion

What can magic tell us about ourselves and our daily lives? If you subtly change the subject during an uncomfortable conversation, did you know you're using attentional 'misdirection', a core technique of magic? And if you've ever bought an expensive item you'd sworn never to buy, you were probably unaware that the salesperson was, like an accomplished magician, a master at creating the 'illusion of choice'. Leading neuroscientists Stephen Macknik and Susana Martinez-Conde meet with magicians from all over the world to explain how the magician's art sheds light on consciousness, memory, attention, and belief. As the founders of the new discipline of NeuroMagic, they combine cutting-edge scientific research with startling insights into the tricks of the magic

trade. By understanding how magic manipulates the processes in our brains, we can better understand how we work - in fields from law and education to marketing, health and psychology - for good and for ill.

Essays U of Minnesota Press

There are some things which cannot be learned quickly, and time, which is all we have, must be paid heavily for their acquiring. They are the very simplest things, and because it takes a man's life to know them the little new that each man gets from life is very costly and the only heritage he has to leave. In the winter of 1933, Ernest Hemingway and his wife Pauline set out on a two-month safari in the big-game country of East Africa, camping out on the great Serengeti Plain at the foot of magnificent Mount Kilimanjaro. "I had quite a trip," the author told his friend Philip Percival, with characteristic understatement. *Green Hills of Africa* is Hemingway's account of that expedition, of what it taught him about Africa and himself. Richly evocative of the region's natural beauty, tremendously alive to its character, culture, and customs, and pregnant with a hard-won wisdom gained from the extraordinary situations it describes, it is widely held to be one of the twentieth century's classic travelogues.
