 Over the past 20 years, more than 100 countries have implemented social safety nets, targeted at the poorest and most vulnerable. Impact evaluations have shown the effectiveness of these programmes, and policymakers have explored different methods of delivery, including cash transfers. Cash Transfers for Poverty Reduction offers the first systematic discussion of the design and implementation of poverty reduction schemes, and cash transfer programmes in particular. The authors also draw on their own practical experience and present global case studies to show the effects that these decisions have on operations and outcomes. Featuring end-of-chapter questions and answers to help test your knowledge, this book offers an operational guide for key stakeholders, officials and students in understanding the design, implementation, and monitoring and evaluation of cash transfer programmes.
