DIANE Publishing

"The Affordable Care Act, aka
Obamacare, makes health insurance
available to the majority of Americans. In
fact, failure to obtain coverage will result
in penalties, but the process of obtaining
insurance can be daunting. This brief

handbook explains the law and its history and tells readers how to apply for coverage and any exemptions and subsidies if they are eligible. Editor Amadeo, an expert on the act, discusses the benefits of having insurance and how the plan is financed. Each chapter has references, and the book has a glossary and a bibliography to help readers. This is a useful resource, but libraries should also have information about local exchanges if their states have them." — Barbara Bibel, BOOKLIST, March 15, 2016 issue

Obamacare can save you money, but only if you know how it really works. Americans have been barraged with fifteen times more negative than positive news about Obamacare. As a result, 40 percent of the people who dislike it actually

qualified for insurance subsidies and don't realize it. Hardworking, middle-class families need facts, not opinions, to get all the benefits they deserve. Here you'll find:

- A guide to buying low-cost health insurance
- Step-by-step instructions to signing up for insurance
- Directions to apply for Obamacare exemptions
- Eligibility requirements for subsidies
- Definitions of insurance, health care, and Obama terms
- Real-life stories of people who have already been helped

This handbook refutes the myths about the Affordable Care Act with research-based evidence. It reveals the seven reasons why health care costs so much, as well as how the ACA attacks those costs. You'll learn who really gets benefits from subsidies and who pays for them. Most importantly, this book

uncovers how the ACA might save you and your family money in 2016 and beyond.

Many Americans believe that people who lack health insurance somehow get the care they really need. *Care Without Coverage* examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million-one in seven-working-age

Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.

In 2010, an estimated 50 million people were uninsured in the United States. A portion of the uninsured reflects unemployment rates; however, this rate is primarily a reflection of the fact that when most health plans meet an individual's needs, most times, those health plans are not affordable. Research shows that people without health insurance are more likely to experience financial burdens associated with the utilization of health care services. But even among the insured, underinsurance has emerged as a barrier to care. The Patient Protection and Affordable Care Act (ACA) has made the most comprehensive changes to the

provision of health insurance since the development of Medicare and Medicaid by requiring all Americans to have health insurance by 2016. An estimated 30 million individuals who would otherwise be uninsured are expected to obtain insurance through the private health insurance market or state expansion of Medicaid programs. The success of the ACA depends on the design of the essential health benefits (EHB) package and its affordability. Essential Health Benefits recommends a process for defining, monitoring, and updating the EHB package. The book is of value to Assistant Secretary for Planning and Evaluation (ASPE) and other U.S. Department of Health and Human Services agencies, state insurance agencies, Congress, state governors,

health care providers, and consumer advocates.
