Chapter 14 - Autonomic Nervous System - Part 1

Chapter 11 terminology sp13 Chapter 15 - Autonomic Nervous System Chapter 12 Nervous Tissue Chapter 11 Autonomic Nervous System It is autonomic because it functions subconsciously and involuntarily. Dual Innervation. There are two branches or divisions of the autonomic nervous system (ANS): the sympathetic and parasympathetic. Both branches innervate most organs in an arrangement called dual innervation. The parasympathetic division is most active during rest and stimulates digestive activities. Chapter 11 - Autonomic and Motor Nervous System Functions of the Autonomic Nervous System Some ANS neurons release acetylcholine, and others release norepinephrine; the result is excitation in some cases and inhibition in others. ANS neurons that release acetylcholine include (1) all sympathetic and parasympathetic preganglionic neurons, (2) all parasympathetic postganglionic neurons, and (3) a few sympathetic postganglionic neurons. Most sympathetic postganglionic neurons release the neurotransmitter norepinephrine (NE). The central nervous system (CNS) cells, where the impulses for the sympathetic nervous system (SNS) originate, are located where? A) Cranium and sacral area of the spinal cord B) Hypothalamus and the medulla C) Nerve membranes D) Thoracic and lumbar sections of the spinal cord Ans: D Feedback: The SNS is also called the thoracolumbar system because the CNS cells, where the impulses for the ... Chapter 29- Introduction to the Autonomic Nervous System ... The autonomic nervous system (ANS) is responsible for involuntary control of the body, usually for the sake of homeostasis (regulation of the internal environment). Sensory input for autonomic functions can be from sensory structures tuned to external or internal environmental stimuli. 12.1 Basic Structure and Function of the Nervous System ... involuntary responses the brain controls without the need for conscious thought. The autonomic nervous system (ANS) works using a balance of the sympathetic and parasympathetic nervous systems that regulate the body's involuntary functions, including heart rate, respiratory rate, digestion, and sweating. Chapter 11: Autonomic and Motor Systems. Description. N/A. Total Cards. 24. Subject. Physiology. Level. Undergraduate 2. ... Dual innervation: Definition. Both branches of the autonomic nervous system innervate most organs: Term. Another name for the autonomic nervous system is: Definition. Involuntary nervous system: Term. The primary function ... Chapter 16 - The Autonomic Nervous System Notes Flashcards ... -after synapsing within named autonomic ganglia in the cephalic region, parasympathetic fibers are distributed to salivary and lacrimal glands, smooth muscle of the eye, and to the smooth muscle and

glands of the respiratory and digestive systems, and to the heart.
