Brown's Boundary Control and Legal Principles Springer Science & Business Media

This book provides a comprehensive analysis of the Organisation for Economic Cooperation and Development's (OECD) war on offshore tax evasion. The authors explain the new emerging regulatory regimes on the global exchange of information to combat offshore tax evasion and analyse why Automatic Exchange of Information (AEOI) is not a "magic bullet" solution. Chapters include coverage of the Foreign Account Tax

Compliance Act (FATCA), AEOI and the Common Reporting Standards (CRS), and the unprecedented extra-territorial enforcement by the United States of its tax and reporting laws, including the FBAR provisions of the Bank Secrecy Act. These new legal regimes directly impact nearly all financial institutions and financial service providers in the U.S., U.K., EU, Canada, and each of the 132 member jurisdictions of the OECD's Global Forum, as well as 8 million U.S. expats. In light of The Panama Papers, this book offers a timely and valuable contribution on the prevalence and costs of international tax evasion for the global financial community, policy-makers, and practitioners alike. *Assembly Bills, Original and Amended* SUNY Press
A longtime professor of Ethnic Studies at the University of

California at Berkeley, Ronald Takaki was recognized as one of the foremost scholars of American ethnic history and diversity. When the first edition of *A Different Mirror* was published in 1993, Publishers Weekly called it "a brilliant revisionist history of America that is likely to become a classic of multicultural studies" and named it one of the ten best books of the year. Now Rebecca Stefoff, who adapted Howard Zinn's best-selling *A People's History of the United States* for younger readers, turns the updated 2008 edition of Takaki's multicultural masterwork into *A Different Mirror for Young People*. Drawing on Takaki's vast array of primary sources, and staying true to his own words whenever possible, *A Different Mirror for Young People* brings ethnic history alive through the words of people, including teenagers, who recorded their experiences in letters, diaries, and poems. Like Zinn's *A People's History*, Takaki's *A Different Mirror* offers a rich and rewarding "people's view" perspective on the American story.

 Forty-eight years ago, a young and apprehensive Tony Kevin set off with his family on his first diplomatic posting, to Moscow at the height of the Cold War. In the Russian winter of 2016 he returns alone, a private citizen, aged 73. What will he find? How has Russia changed since those grim Soviet days? Tony Kevin had a successful and challenging diplomatic career, ending with ambassadorships to Poland (1991-94) and Cambodia (1994-97). He now applies his attention to Vladimir Putin's Russia, a government and nation routinely demonized and disdained in Western capitals. Why does President Putin arouse such a high level of Western antagonism? Is the West throwing away the

lessons of recent history in recklessly drifting into a perilous and unnecessary new Cold War confrontation against Russia? The author invites readers to see this great nation anew: to explore with him the complex roots of Russian national identity and values, drawing on its traumatic recent seventy-year Soviet Communist past and its momentous thousand-year history as a great Orthodox Christian nation that has both loved and feared 'the West, ' and which the West has loved and feared back in equal measure. Tony Kevin's previous books include *A Certain Maritime Incident: the sinking of SIEV X* (2004) and *Reluctant Rescuers* (2012) on Australia's well-resourced maritime border protection system. He published a travel memoir *Walking the Camino* (2007) about his long pilgrimage walk through Spain in 2006. In 2009, *Crunch Time* tackled issues, still unresolved, of framing an effective Australian policy against global warming.

Since Edward Said's foundational work, Orientalism has been singled out for critique as the quintessential example of Western intellectuals' collaboration with oppression. Controversies over the imbrications of knowledge and power and the complicity of Orientalism in the larger project of colonialism have been waged among generations of scholars. But has Orientalism come to stand in for all of the sins of European modernity, at the cost of neglecting the complicity of the rest of the academic disciplines? In this landmark theoretical investigation, Wael B. Hallaq reevaluates and deepens the critique of Orientalism in order to deploy it for rethinking the foundations of the modern project. Refusing to isolate or scapegoat Orientalism, Restating

Orientalism extends the critique to other fields, from law, philosophy, and scientific inquiry to core ideas of academic thought such as sovereignty and the self. Hallaq traces their involvement in colonialism, mass annihilation, and systematic destruction of the natural world, interrogating and historicizing the set of causes that permitted modernity to wed knowledge to power. Restating Orientalism offers a bold rethinking of the theory of the author, the concept of sovereignty, and the place of the secular Western self in the modern project, reopening the problem of power and knowledge to an ethical critique and ultimately theorizing an exit from modernity's predicaments. A remarkably ambitious attempt to overturn the foundations of a wide range of academic disciplines while also drawing on the best they have to offer, Restating Orientalism exposes the depth of academia's lethal complicity in modern forms of capitalism, colonialism, and hegemonic power.

A richly illustrated tapestry of interwoven studies spanning some six thousand years of history, *Dæmons Are Forever* is at once a record of archaic contacts and transactions between humans and protean spirit beings—dæmons—and an account of exchanges, among human populations, of the science of spirit beings: dæmonology. Since the time of the Indo-European migrations, and especially following the opening of the Silk Road, a common dæmonological vernacular has been shared among populations ranging from East and South Asia to Northern Europe. In this virtuoso work of historical sleuthing, David Gordon White recovers the trajectories of both the “inner demons” cohabiting the bodies of their human hosts and the “outer dæmons” that

those same humans recognized each time they encountered them in their enchanted haunts: sylvan pools, sites of geothermal eruptions, and dark forest groves. Along the way, he invites his readers to reconsider the potential and promise of the historical method in religious studies, suggesting that a “connected histories” approach to Eurasian dæmonology may serve as a model for restoring history to its proper place at the heart of the discipline of the history of religions.

Originally published in 1987, this book presented for the first time a unified treatment of English kinship of the nineteenth and twentieth centuries. This system, far from being a patchwork of historical accidents, has a remarkably logical overall structure, permeating both law and custom. To understand it one must study a wide variety of sources ranging from Parliamentary debates through accounts of contemporary events, cases and incidents to fiction of the day. The work is pertinent to current studies in a number of fields: in history it represents a systematic overview, highlighting new sources of material, while for lawyers it gives a historical context and explanation of 'family law', particularly topical for impending English legislation in this area at the time. It collects two centuries of sociological data, and presents social anthropologists with the English system for comparison with systems conventionally studied in the field and with kinship theory. Finally, it provides philosophers with a new arena in which to discuss the nature of explanations of human activities, besides raising fresh questions.

Nationalization disputes in natural resources development are among the most disputed issues of international investment law. This book offers a fresh insight into the nature of nationalization disputes in natural resources development and the rules of international investment law governing them by systematically

analyzing (1) the content of investment contracts in natural resources development, and (2) the results of nationalization disputes in natural resources development from the perspective of dynamic bargaining theory. Based on the comprehensive and systematic empirical analyses, the book sheds new light on contractual renegotiation and renewal as a hardly known but practically normal solution of nationalization disputes and presents a set of soft law rules governing contractual renegotiation and renewal.

From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a

brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

Black & white print. American Government 3e aligns with the topics and objectives of many government courses. Faculty

involved in the project have endeavored to make government workings, issues, debates, and impacts meaningful and memorable to students while maintaining the conceptual coverage and rigor inherent in the subject. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. In order to help students understand the ways that government, society, and individuals interconnect, the revision includes more examples and details regarding the lived experiences of diverse groups and communities within the United States. The authors and reviewers sought to strike a balance between confronting the negative and harmful elements of American government, history, and current events, while demonstrating progress in overcoming them. In doing so, the approach seeks to provide instructors with ample opportunities to open discussions, extend and update concepts, and drive deeper engagement.

The essays in this volume illuminate a central topic in ethical theory: moral dilemmas. Some contemporary philosophers dispute the traditional view that a true moral dilemma - a

situation in which a person has two irreconcilable moral duties - cannot exist. The book provides the historical background to the on-going debate with selections from Kant, Mill, Bradley, and Ross. Musical notation is a powerful system of communication between musicians, using sophisticated symbolic, primarily non-verbal means to express musical events in visual symbols. Many musicians take the system for granted, having internalized it and

their strategies for reading it and translating it into sound over long years of study and practice. This book traces the development of that system by combining chronological and thematic approaches to show the historical and musical context in which these developments took place. Simultaneously, the book considers the way in which this symbolic language communicates to those literate in it, discussing how its features facilitate or hinder fluent comprehension in the real-time environment of performance. Moreover, the topic of musical as opposed to notational innovation forms another thread of the treatment, as the author investigates instances where musical developments stimulated notational attributes, or notational innovations made practicable advances in musical style.
