In this accessible book, the author demonstrates that school improvement must start with a reconsideration of school effects upon the home, and home effects upon the school. The students' school experience must acknowledge the daily influence of the family in the classroom. To ignore this 'hidden link' is to remain ignorant about students' lives and motivations, and makes it very difficult for educators to improve schools and schooling. Based on extensive research, Parent, Student and Teacher Collaboration provides invaluable guidance and insight.

In this new century mankind faces ever more challenging environmental and public health problems, such as pollution, invasion by exotic species, the emergence of new diseases or the emergence of diseases into new regions (West Nile virus, SARS, Anthrax, etc.), and the resurgence of existing diseases (influenza, malaria, TB, HIV/AIDS, etc.). Mathematical models have been successfully used to study many biological, epidemiological and medical problems, and nonlinear and complex dynamics have been observed in all of those contexts. Mathematical studies have helped us not only to better understand these problems but also to find solutions in some cases, such as the prediction and control of SARS outbreaks, understanding HIV infection, and the investigation of antibiotic-resistant infections in hospitals. Structured population models distinguish individuals from one another according to characteristics such as age, size, location, status, and movement, to determine the birth, growth and death rates, interaction with each other and with environment, infectivity, etc. The goal of structured population models is to understand how these characteristics affect the dynamics of these models and thus the outcomes and consequences of the biological and epidemiological processes. There is a very large and growing body of literature on these topics. This book deals with the recent and important advances in the study of structured population models in biology and epidemiology. There are six chapters in this book, written by leading researchers in these areas.

The Traveller's Tool is an up market man's man's manual which will find its place next to the Nivea on every executive's bedside table. When Sir Les Patterson at last agreed to wet his nib and set down on paper his guide for the modern man on the move he made his intention very clear: 'I'm a man's man and I call a spade a spade, so if you're a bluenosed wowser, a raving pillow-biter or a loony old lezzo with a facelike a half-sucked mango, I'd chuck this book away now because in the pages that follow I employ the direct, no holds barred lingo of a serious Australian diplomat at the top of his profession and the height of his sexual powers.' In The Traveller's Tool Australia's most articulate high-flyer lays bare the international lifestyle as he has lived it. The book is not only packed with practical advice, but is also, in Sir Les's own words, 'as funny as buggery'.

**The Traveller's Tool** Hodder Education

On July 19, 1916, 7000 Australian soldiers--in the first major action of the AIF on the Western Front--attacked entrenched German positions at Fromelles in northern France. By the next day, there were more than 5500 casualties, including nearly 2000 dead--a bloodbath that the Australian War Memorial describes as "the worst 24 hours in Australia's entire history." Just days later, three Australian Divisions attacked German positions at nearby Pozieres, and over the next six weeks they suffered another 23,000 casualties. Of that bitter battle, the great Australian war correspondent Charles Bean would write, "The field of Pozieres is more consecrated by Australian fighting and more hallowed by Australian blood than any field which has ever existed . . ." Yet the sad truth is that, nearly a century on from those battles, Australians know only a fraction of what occurred. This book brings the battles back to life and puts the reader in the moment, illustrating both the heroism displayed and the insanity of the British plan. With his extraordinary vigor and commitment to research, Peter FitzSimons shows why this is a story about which all Australians can be proud. And angry.
