How Boston radio station WBCN became the hub of the rock-and-roll, antiwar, psychedelic solar system. While San Francisco was celebrating a psychedelic Summer of Love in 1967, Boston stayed buttoned up and battened down. But that changed the

following year, when a Harvard Law School graduate student named Ray Riepen founded a radio station that played music that young people, including the hundreds of thousands at Boston-area colleges, actually wanted to hear. WBCN-FM featured album cuts by such artists as the Mothers of Invention, Aretha Franklin, and Cream, played by announcers who felt free

to express their opinions on subjects that ranged from recreational drugs to the war in Vietnam. In this engaging and generously illustrated chronicle, Peabody Award-winning journalist and one-time WBCN announcer Bill Lichtenstein tells the story of how a radio station became part of a revolution in youth culture. At WBCN, creativity and countercultural politics

ruled: there were no set playlists; news segments anticipated the satire of The Daily Show; on-air interviewees ranged from John and Yoko to Noam Chomsky; a telephone “Listener Line” fielded questions on any subject, day and night. From 1968 to Watergate, Boston’s WBCN was the hub of the rock-and-roll, antiwar, psychedelic solar system. A cornucopia of images in color and black and white includes concert posters, news clippings, photographs of performers in action, and

scenes of joyousness on Boston Common. Interwoven through the narrative are excerpts from interviews with WBCN pioneers, including Charles Laquidara, the “news dissector” Danny Schechter, Marsha Steinberg, and Mitchell Kertzman. Lichtenstein’s documentary WBCN and the American Revolution is available as a DVD sold separately.

This Value Pack consists of Business Ethics and Values, 3/e by Lovell/Fisher (ISBN: 9780273694786); How to Write Dissertations & Project Reports, 1/e by McMillan/Weyers (ISBN: 9780273713586) Building Envelopes MIT Press

"This textbook provides an innovative, internationally oriented approach to the teaching of corporate social responsibility (CSR) and business ethics. Drawing on case studies involving companies and countries

around the world, the textbook explores the social, ethical, and business dynamics underlying CSR in such areas as global warming, genetically modified organisms (GMO) in food production, free trade and fair trade, anti-sweatshop and living-wage movements, organic foods and textiles, ethical marketing practices and codes, corporate speech and lobbying, and social enterprise. The book is designed to encourage students and instructors to challenge their own

assumptions and prejudices by stimulating a class debate based on each case study"--

 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In

Speculative Everything, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open

debate and discussion about the kind of future people want (and do not want). Speculative Everything offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for

example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.
Lawrence Kohlberg,

Consensus and Controversy Grand Central Publishing
For Business Ethics is a daring adventure into the world of business ethics. It offers a clear and accessible introduction to business ethics and also expands business ethics beyond its current narrow confines. It is groundbreaking in the sense that it invites a distinctively critical approach to business ethics, an approach that the authors argue is part and parcel of ethics. With a thought-provoking glossary and

recommendations for further readings, For Business Ethics is an essential purchase for students and practitioners alike. It is at once an introduction to business ethics and a challenge to anyone who wishes to take part in or change contemporary organized society.

Business Ethics and Values Cambridge University Press

The financial crisis focused unprecedented attention on ethics in investment banking. This book develops an ethical

framework to assess and manage investment banking ethics and provides a guide to high profile concerns as well as day to day ethical challenges.

Managing for Stakeholders Academic Internet Pub Incorporated Business ethics teaching appears to have had little impact, particularly in the light of continued malpractice and misdemeanour in the form of financial scandals, environmental disasters and adverse consequences for

communities. This timely book directly addresses a central question: is it that the existence of an ethical or an unethical climate influences behaviour, or, does the presence or absence of a moral character and personal values have the greatest influence on behaviour at work? Hemingway proposes four modes of individual moral commitment to corporate social responsibility (CSR) and sustainability: the Active Corporate Social Entrepreneur, the Concealed Corporate

Social Entrepreneur, the Conformist and the Disassociated. Hemingway posits that the Conformists represent the majority of people in organisations, adhering to the prevailing ethical climate, whatever that might be. However, it is the discovery of the corporate social entrepreneur which offers students and scholars a critical, alternative and optimistic perspective for the future of ethical business.

Giving Voice to Values
Hachette UK

In this new Architecture Brief, Ethics for Architects, Thomas Fisher presents fifty case studies representing a broad range of ethical dilemmas facing today's architects, from questions regarding which clients to work for, to the moral imperatives of reclaiming building

materials for construction instead of sending them to landfills. This timely book features newly relevant interpretations adapted to the pervasive demands of globalization, sustainability, and developments in information technology. Fisher's analysis of architecture's thorniest ethical issues are written in a style that is accessible to the amateur philosopher and appealing to professional architects and students alike. Thought-provoking and essential, Ethics for

Architects is required reading for any designer who wants to work responsibly in today's complex world.

Business Ethics and Values Pearson Education
This collection brings together leading scholarly thinking to understand why CSR failed to prevent the global financial crisis, how corporate social irresponsibility (CSI) contributed to the financial crisis, and how we may reframe CSR or improve CSR frameworks to help prevent or mitigate any future

financial and economic crises.

Saving Your Marriage When the Fairytale Falts

Taylor & Francis
How can you effectively stand up for your values when pressured by your boss, customers, or shareholders to do the opposite? Drawing on actual business experiences as well as on social science research, Babson College business educator and consultant Mary Gentile challenges the assumptions about business ethics at companies and business

schools. She gives business leaders, managers, and students the tools not just to recognize what is right, but also to ensure that the right things happen. The book is inspired by a program Gentile launched at the Aspen Institute with Yale School of Management, and now housed at Babson College, with pilot programs in over one hundred schools and organizations, including INSEAD and MIT Sloan School of Management. She explains why past

attempts at preparing business leaders to act ethically too often failed, arguing that the issue isn't distinguishing what is right or wrong, but knowing how to act on your values despite opposing pressure. Through research-based advice, practical exercises, and scripts for handling a wide range of ethical dilemmas, *Gentile* empowers business leaders with the skills to voice and act on their values, and align their professional path with their principles. Giving

Voice to Values is an engaging, innovative, and useful guide that is essential reading for anyone in business.

Business Ethics and Values Yale University Press

Across an amazing sweep of the critical areas of business regulation - from contract, intellectual property and corporations law, to trade, telecommunications, labour standards, drugs, food, transport and environment - this book confronts the question of how the regulation of

business has shifted from national to global institutions. Based on interviews with 500 international leaders in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and

decision-making bodies that would otherwise be dominated by concentrated economic interests. This book will become a standard reference for readers in business, law, politics and international relations.

Speculative Everything

Open Book Publishers

Managing for

Stakeholders: Survival,

Reputation, and Success,

the culmination of twenty

years of research,

interviews, and

observations in the

workplace, makes a major

new contribution to

management thinking and

practice. Current ways of thinking about business and stakeholder management usually ask the Value Allocation Question: How should we distribute the burdens and benefits of corporate activities among stakeholders? *Managing for Stakeholders*, however, helps leaders develop a mindset that instead asks the Value Creation Question: How can we create as much value as possible for all of our stakeholders? *Business* is about how customers, suppliers, employees,

financiers (stockholders, bondholders, banks, etc.), communities, the media, and managers interact and create value. World-renowned management scholar R. Edward Freeman and his coauthors outline ten concrete principles and seven practical techniques for managing stakeholder relationships in order to ensure a firm's survival, reputation, and success. *Managing for Stakeholders* is a revolutionary book that will change not only how managers do business but

also how they recognize and evaluate business opportunities that would otherwise be invisible. *Integrity Within* Chronicle Books
What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied

ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical

approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular

value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies. *Individual, Corporate and International Perspectives* by Colin Fisher, Alan Lovell, ISBN MIT Press Features include a comprehensive review of existing material, combined with new

perspectives to equip students for the challenges in the work environment; chapter overviews and student learning objectives offer a solid and useful framework in which to organise study; diagrams and charts present overviews and contexts for the subject to act as useful revision aids; effective pedagogy including a review of the arguments considered, a menu of seminar topics, and questions in every chapter, serving as an ideal basis for seminar

study; and additional open-ended simulations to allow students to work through unfolding scenarios.

Corporate Codes of Ethics
Routledge

"Business Ethics and Values" introduces students to the complexities and principles of ethical issues by focusing on developing ethical awareness and the ability to argue business ethics matters. A proven resource, the second edition of this text continues to present a successful blend of

concrete issues and academic theory, suitable for undergraduate and postgraduate students with or without practical experience of the world of organisations. It gives as much importance to individual conscience at work as it does to socially responsible behaviour at the corporate level and within the global business world. Hallmark features: Broad coverage of the many issues in this subject ensures that students see the whole picture. The use of real-world case studies and

simulations helps to stimulate debate and appreciate the multi-faceted aspects of ethical arguments. New to this edition: New material on the ethics of e-communication, sustainability and the ethical impact of globalisation ensures that students are learning from the most up-to-date material available. Further analysis of Anglo-American approaches to corporate governance and

their ethical underpinnings. Short test and assignment questions at the end of each chapter help students to consolidate their learning. More simulation exercises and activities give students the opportunity to reflect on their attitudes to this engaging subject. A well-developed supplements package to support tutors and students includes an instructor's manual,

PowerPoint slides and a companion website. Colin Fisher is Professor of Managerial Ethics and Values, Nottingham Business School, Nottingham Trent University. Alan Lovell is Professor of Organisational Accountability and Head of the Department of Accounting, Finance & Economics, Nottingham Business School, Nottingham Trent University.
