Differentiating Instruction With Menus: Chemistry offers teachers everything needed to create a student-centered learning environment based on choice. This book uses different types of menus that students can use to select exciting advanced-level products that they will develop so teachers can assess what has been learned—instead of using a traditional worksheet format. Topics addressed include chemistry basics, measurements, atoms, chemical bonding and reactions, gas laws, energy, acids and bases, and nuclear and organic chemistry. Differentiating Instruction With Menus: Chemistry contains attractive reproducible menus, each based on the levels of Bloom's revised taxonomy as well as incorporating different learning styles. These menus can be used to guide students in making decisions as to which products they will develop after studying a major concept or unit. Grades 9-12

750 Strategies for Success! Corwin Press

Useful for small groups or one-on-one instruction, this book offers successful math interventions and RTI connections. Teachers will learn to target math instruction to struggling students by diagnosing weaknesses; providing specific, differentiated instruction; using formative assessments; offering corrective feedback; and motivating students by using games. Taylor-Cox emphasizes four main goals for math instructors. They must help students achieve: accuracy, efficiency, flexibility, and fluency in solving math problems. Integral to each of these goals is ensuring that students understand math concepts. Taylor-Cox writes, "When concepts are ignored and the focus is solely on rules and procedures, struggling students often develop misconceptions and learning gaps." Math Interventions: Building Number Power, Grades PreK-2 provides math teachers with specific strategies for imparting those concepts.
