The definitive guide to unsaturated soil— from the world's experts on the subject This book builds upon and substantially updates Fredlund and Rahardjo's publication, *Soil Mechanics for Unsaturated Soils*, the current standard in the field of unsaturated soils. It provides readers with more thorough coverage of the state of the art of unsaturated soil behavior and better reflects the manner in which practical unsaturated soil engineering problems are solved. Retaining the

fundamental physics of unsaturated soil behavior presented in the earlier book, this new publication places greater emphasis on the importance of the "soil-water characteristic curve" in solving practical engineering problems, as well as the quantification of thermal and moisture boundary conditions based on the use of weather data. Topics covered include: Theory to Practice of Unsaturated Soil Mechanics Nature and Phase Properties of Unsaturated Soil State Variables for Unsaturated Soils Measurement and Estimation of State Variables Soil-Water Characteristic Curves for Unsaturated Soils Ground Surface Moisture Flux Boundary Conditions Theory of Water Flow through Unsaturated Soils Solving Saturated/Unsaturated Water Flow Problems Air Flow through Unsaturated Soils Heat Flow Analysis for Unsaturated Soils Shear Strength of Unsaturated Soils Shear Strength Applications in Plastic and Limit Equilibrium Stress-Deformation Analysis for Unsaturated Soils Solving Stress-Deformation Problems with Unsaturated Soils Compressibility and Pore Pressure Parameters Consolidation and Swelling Processes in Unsaturated Soils *Unsaturated Soil Mechanics in Engineering Practice* is essential reading for geotechnical engineers, civil engineers, and undergraduate- and graduate-level civil engineering students with a focus on soil

mechanics.

Peritoneal dialysis (PD) is in widespread use for the treatment of acute and chronic renal failure. A considerable amount of knowledge about the various procedures and problems associated with this form of treatment has accumulated over recent years, particularly since the introduction of continuous ambulatory peritoneal dialysis (CAPD). However to date the information regarding the more technical or practical aspects of PD has been largely scattered in various books and journals. There appears to be no straightforward text concerned with these points suitable for recommending to junior doctors or nurses dealing with patients receiving this therapy. Though in-house-training is of considerable value it takes time and I have noticed that on a number of occasions in our own unit, technical problems with PD have not been dealt with quickly because of lack of knowledge in the staff on duty. There thus appeared to me to be a need for a short book giving firm advice on how to perform the various procedures and how to deal with problems as they arose. This manual is an attempt to fulfil that aim. Initially it was tried and tested on the renal unit in the Cardiff Royal Infirmary for 3 years. Prior to publishing it has been extensively revised and updated.

Protest Knits is the book for you. From pussy hats to protest scarfs and political pin cushions to shy anarchist socks. Make your point with a crochet hook or pair of knitting needles. From the easy peasy to the more complex, here are more than 15 projects for some crafty therapy. Knitting and handicrafts have a long history in protesting - the pussy hat project has been particularly successful but it joins a long tradition of crafty activism. In Canada, there's the Revolutionary Knitting Circle, which first made headlines for their protest at the 2002 G8 summit. Australia has the Knitting Nannas, who protest about environmental issues by holding "knit-ins". In the UK, activists from Wool Against Weapons knitted a seven-mile-long pink "peace scarf" to protest against the country's Trident nuclear weapon programme. Then, a year later, they repurposed it into thousands of blankets for those in need in warzones and developing nations. And down in Chile, it's the hombres tejedores (knitting men) who break down stereotypes and teach other men to embrace the creative hobby. In cities across the world, "yarn bombing" reclaims urban spaces with a pair of needles, covering everyday items in brightly coloured knits. Like other forms of graffiti, yarn bombing can convey a message of protest - or it can just be street art for the sake of art. Knitting for change is a global activity. So get your needles and hooks out and change the world.
