“Unique among survival books . . . stunning . . . enthralling. Deep Survival makes compelling, and chilling, reading.”—Denver Post
Over a decade since its original publication, Laurence Gonzales’s bestselling *Deep Survival* has helped save lives from the deepest wildernesses, just as it has improved readers’ everyday lives. Its mix of adventure narrative, survival science, and practical advice has inspired everyone from business leaders to military officers, educators, and psychiatric professionals on how to take control of stress, learn to assess risk, and make better decisions under pressure. Now with a new introduction on how this book can help readers overcome any of life’s obstacles, Gonzales’s gripping narrative is set to motivate and enlighten a new generation of readers.

Helps educators to design assignments and rigorous rubrics that truly measure student learning objectives The ability of students to pass an examination does not necessarily reflect or guarantee their ability to apply knowledge in practice, nor are traditional exams a sufficient means to evaluate all learning objectives. Written for both new and seasoned nurse educators, this book is unique in its provision of rigorous rubrics that fully take into account learning objectives and the teaching-learning process, and promote objective grading. It examines a variety of time-tested, alternative evaluation methods, discusses how to design them, and includes best practices for using them. The book provides an overview of how evaluation and rubrics play an integral part within the larger nursing education teaching-learning process. It helps educators clearly define learning objectives and desired outcomes, and how to evaluate them. The book describes how to formulate a variety of teaching strategies, design effective assignments, and examine in detail

specific evaluation methods including best practices for their use and exemplar analytic scoring rubrics. Also available are detailed, modifiable grading rubric templates for each assignment presented. Evaluation methods covered include papers, presentations, participation, discussion boards, concept maps, case studies, reflective journals, and portfolios. The book will assist both new and seasoned nurse educators in their quest to graduate competent, safe nurses at all levels of nursing education. Key Features: Provides rigorous, modifiable rubrics for learning objective grading Includes time-tested alternative evaluation methods Describes best practices for designing a variety of teaching-learning evaluation tools Includes guidelines for writing clear assignment descriptions Discusses papers, presentations, concept maps, case studies, portfolios, and more

The term was coined when electronics, with the personal computer, was very popular and internet was still at its dawn. It is

a very successful term, by now firmly in schools, universities, and SMEs education and training. Just to give an example 3.5 millions of students were engaged in some online courses in higher education institutions in 2006 in the USA¹. eLearning today refers to the use of the network technologies to design, deliver, select, manage and broaden learning and the possibilities made available by internet to offer to the users synchronous and asynchronous learning, so that they can access the courses content anytime and wherever there is an internet connection. *Business School Essays that Made a Difference* John Wiley & Sons
