"In the dark, bewildering, trap-infested jungle of misinformation and opaque riddles that is the world of investment, JL Collins is the fatherly wizard on the side of the path, offering a simple map, warm words of encouragement and the tools to forge your way through with confidence. You'll never find a wiser advisor with a bigger heart." -- Malachi Rempen:

Filmmaker, cartoonist, author and self-described ruffian This book grew out of a series of letters to my daughter concerning various things-mostly about money and investing-she was not yet quite ready to hear. Since money is the single most powerful tool we have for navigating this complex world we've created, understanding it is critical. "But Dad," she once said, "I know money is important. I just don't want to spend my life thinking about it." This was eye-opening. I love this stuff. But most people have better things to do with their precious time. Bridges to build, diseases to cure, treaties to negotiate, mountains to climb, technologies to create, children to teach, businesses to run. Unfortunately, benign neglect of things financial leaves you open to the charlatans of the financial world. The people who make investing endlessly complex, because if it can be made complex it becomes more profitable for them, more expensive for us, and we are forced into their waiting arms. Here's an important truth: Complex investments exist only to profit those who create and sell them. Not only are they more costly to the investor, they are less effective. The simple approach I created for her and present now to you, is not only easy to understand and implement, it is more powerful than any other. Together we'll explore: Debt: Why you must avoid it and what to do if you have it. The importance of having F-you Money. How to think about money, and the unique way understanding this is key to building your wealth. Where traditional investing advice goes wrong and what actually works. What the stock market really is and how it really works. Why the stock market always goes up and why most people still lose money investing in it. How to invest in a raging bull, or bear,

market. Specific investments to implement these strategies. The Wealth Building and Wealth Preservation phases of your investing life and why they are not always tied to your age. How your asset allocation is tied to those phases and how to choose it. How to simplify the sometimes confusing world of 401(k), 403(b), TSP, IRA and Roth accounts. TRFs (Target Retirement Funds), HSAs (Health Savings Accounts) and RMDs (Required Minimum Distributions). What investment firm to use and why the one I recommend is so far superior to the competition. Why you should be very cautious when engaging an investment advisor and whether you need to at all. Why and how you can be conned, and how to avoid becoming prey. Why I don't recommend dollar cost averaging. What financial independence looks like and how to have your money support you. What the 4% rule is and how to use it to safely spend your wealth. The truth behind Social Security. A Case Study on how this all can be implemented in real life. Enjoy the read, and the journey! What They Don't Teach You at Harvard Business School Harriman House Limited The final book of the Bible, Revelation prophesies the ultimate judgement of mankind in a series of allegorical visions, grisly images and numerological predictions. According to these, empires will fall, the "Beast" will be destroyed and Christ will rule a new Jerusalem. With an introduction by Will Self. *Quit Like a Millionaire* CreateSpace The accumulated wisdom of the most celebrated motivational writers of all time is distilled into one brief playbook for unlocking the prosperity-power of your mind. Why Not You? This is the guiding question of How to Be Rich. To answer it, this compact book gleans must-read passages, powerful

meditations, and tantalizing wealth-building techniques from the collected work of the greatest motivational writers ever. Each chapter in *How to Be Rich* is short enough to read in a grocery store checkout line-yet powerful enough to challenge years of ingrained, self-limiting thinking. *How to Be Rich* boils down the cumulative insight of leading self-help and positive-thinking guides into one surprisingly concise rule book for releasing your hidden potential.

Finance experts reveal how they save, spend, and invest Biggerpockets Publishing, LLC

The world of investing normally sees experts telling us the 'right' way to manage our money. How often do these experts pull back the curtain and tell us how they invest their own money? Never. *How I Invest My Money* changes that. In this unprecedented collection, 25 financial experts share how they navigate markets with their own capital. In this honest rendering of how they invest, save, spend, give, and borrow, this group of portfolio managers, financial advisors, venture capitalists and other experts detail the 'how' and the 'why' of their investments. They share stories about their childhood, their families, the struggles they face and the aspirations they hold. Sometimes raw, always revealing, these stories detail the indelible relationship between our money and our values. Taken as a whole, these essays powerfully demonstrate that there is no single 'right' way to save, spend, and invest. We see a kaleidoscope of perspectives on stocks, bonds, real assets, funds, charity, and other means of achieving the life one desires. With engaging illustrations throughout by Carl Richards, *How I Invest My Money* inspires readers to think creatively about their financial decisions and how money figures in the broader quest for a contented life. The Waste-Free World Bantam

In a world where every business, brand, product, and service needs a strong visual identity, it's critical for clients and creative professionals to work together. And the key to success, as with any relationship, is communication. In *Dear Client*, award-winning graphic designer Bonnie Siegler offers an invaluable step-by-step guide to how to talk so creatives will listen, and how to listen when creatives talk. Written as a series of honest, friendly lessons—"Know What You Like," "Decide Who Will Decide," "Focus Groups Suck," "Don't Say 'Make It Yellow,' Say 'Make It Sunny,'" "Serve Lunch During Lunchtime Meetings"—it shows exactly how to deal with the subjectivity, emotional pitfalls, and occasional chaos of a creative partnership. Here's how to articulate your visual goals and set a clear, consistent direction. How to give feedback that works and avoid words that inhibit creative thinking. How to be open to something you didn't imagine. And most of all, how to have fun, save money, and get the results you want.

That is a universal desire, but many of us regard wealth and financial independence as a goal which we'll likely never achieve - there are just too many bills that need paying and there is a widespread belief that the money game is rigged. Even people who win the lottery or inherit money often seem to wind up losing it. How can you create independent wealth and hold on to it?
