While Spain is now a well-established democracy closely integrated into the European Union, it has suffered from a number of severe internal problems such as corruption, discord between state and regional nationalism, and separatist terrorism. The Politics of Contemporary Spain charts the trajectory of Spanish politics from the transition to democracy through to the present day, including the aftermath of the Madrid bombings of March 2004 and the elections that followed three days later. It offers new insights on the main political parties and the political system, on the monarchy, corruption, terrorism, regional and conservative nationalism, and on Spain's policies in the Mediterranean and the EU. It challenges many existing assumptions about politics in Spain, reaching beyond systems and practices to look at identities, political cultures and mentalities. It brings to bear on the analysis the latest empirical data and theoretical perspectives.

Today, the whole world is watching China with great interest and that includes India. China has been termed - a threat, a challenge, an opportunity, a concern, a competitor, the next superpower, a global player and many more things. It depends, who is looking at it and from where? In 2009, United Service Institution (USI) of India decided to commence a five years study programme on China. Towards that end, we held the National Security Seminar 2009 titled 'Rising China - Opportunity or Strategic Challenge' on 25-26 November 2009. Its proceedings have been published in the form of a book. This seminar on Chinas Quest for Global Dominance : Reality or Myth is a continuation of the above study. It focused on : China's grand strategy; economic future; military capability and PLA's modernisation; and, an assessment of China's strategic posture. *Dominant Classes And The State In Development* Vij Books India Pvt Ltd

Why does capitalist development give rise to political alliances between the state and certain economically dominant classes? Addressing this question, Professor Banerjee uses an evolutionary approach to social structure to develop a theory of the interaction

within and among business and manufacturing firms--a theory that highlights those aspects of market processes that promote the formation of dominant economic classes. Structural-evolutionary conceptions of property relations and of state planning and regulation are developed and combined with the market model. According to Professor Banerjee, the market, property relations, and state administration form a self-sustaining structure that simultaneously develops the economy in an uneven and clustered fashion and gives rise to a "dominant alliance" between a segment of the state and the fastest-accumulating classes in the economy. He applies his model to India during the 1956-1975 period, examining the industrialization process of the Second and Third plans, the crisis of the mid-1960s, and the Green Revolution.

Under Article 102 TFEU, dominant firms are allowed to compete, but only to the extent their market behaviour does not constitute an abuse. Needless to say, the wording of the article neither explains what an abusive restriction of competition is nor how such a practice can be identified. Rather than developing a one-size-fits-all test applicable to all forms of market behaviour by dominant firms, the European Court of Justice (ECJ) and the General Court (ex; Court of First Instance) have set out a system of tests for separate categories of conduct. Drawing on the full range of the EU Courts' relevant case law, this very useful book analyses the conditions that must be fulfilled for a broad range of business practices to be deemed abusive within the meaning of Article 102 TFEU, and also identifies the criteria that must be fulfilled for a practice to be 'objectively justified'. The potentially abusive practices studied here (as defined in the relevant case law) include the following: predatory pricing; margin squeezing; exclusivity agreements; loyalty rebates; refusals to supply to induce exclusivity; secondary line price discrimination; vexatious litigation; acquisitions of intellectual property rights (IPRs); refusals to supply necessary inputs; provision of storage equipment on the condition of exclusive use; selective above-cost price cuts; tying; technological integration; and refusal to license IPRs. The author also contrasts the Commission's decisional practice with the case law, assesses approaches under U.S. antitrust law to similar forms of conduct, and incorporates insights from economic theory. This study greatly enhances our understanding of the distinction between abusive conduct and lawful competition. In the course of its clarification of the EU Courts' responses to individual forms of market behaviour, an overall approach to the identification of exclusionary abuses under Article 102 TFEU begins to come into view. Apart from the

important new synthesis the work offers legal scholars, there can be little doubt this book will prove a valuable asset and even an inspiration to competition lawyers.

*Political Transitions in Dominant Party Systems* Totally Entwined Group (USA+CAD)

THE PROCEDURE HAS BEGUN . . . Fifteen years earlier, Jasper College is buzzing with the news that famed literature professor Richard Aldiss will be teaching a special night class called Unraveling a Literary Mystery—from a video feed in his prison cell. In 1982, Aldiss was convicted of the murders of two female grad students; the women were killed with axe blows and their bodies decorated with the novels of notoriously reclusive author Paul Fallows. Even the most obsessive Fallows scholars have never seen him. He is like a ghost. Aldiss entreats the students of his night class to solve the Fallows riddle once and for all. The author's two published novels, *The Coil* and *The Golden Silence*, are considered maps to finding Fallows's true identity. And the only way in is to master them through a game called the Procedure. You may not know when the game has begun, but when you receive an invitation to play, it is an invitation to join the elite ranks of Fallows scholars. Failure, in these circles, is a fate worse than death. Soon, members of the night class will be invited to play along . . . Present day. Harvard professor Alex Shipley made her name as a member of Aldiss's night class. She not only exposed the truth of Paul Fallows's identity, but in the process uncovered information that acquitted Aldiss of the heinous 1982 crimes. But when one of her fellow night class alums is murdered—the body chopped up with an axe and surrounded by Fallows novels—can she use what she knows about Fallows and the Procedure to stop a killer before each of her former classmates is picked off, one by one?

*The Politics of Contemporary Spain* Linzi Basset

This fully updated third edition is devoted to the analysis of various Stochastic Dominance (SD) decision rules. It discusses the pros and cons of each of the alternate SD rules, the application of these rules to various research areas like statistics, agriculture,

medicine, measuring income inequality and the poverty level in various countries, and of course, to investment decision-making under uncertainty. The book features changes and additions to the various chapters, and also includes two completely new chapters. One deals with asymptotic SD and the relation between FSD and the maximum geometric mean (MGM) rule (or the maximum growth portfolio). The other new chapter discusses bivariate SD rules where the individual's utility is determined not only by his own wealth, but also by his standing relative to his peer group. Stochastic Dominance: Investment Decision Making under Uncertainty, 3rd Ed. covers the following basic issues: the SD approach, asymptotic SD rules, the mean-variance (MV) approach, as well as the non-expected utility approach. The non-expected utility approach focuses on Regret Theory (RT) and mainly on prospect theory (PT) and its modified version, cumulative prospect theory (CPT) which assumes S-shape preferences. In addition to these issues the book suggests a new stochastic dominance rule called the Markowitz stochastic dominance (MSD) rule corresponding to all reverse-S-shape preferences. It also discusses the concept of the multivariate expected utility and analyzed in more detail the bivariate expected utility case. From the reviews of the second edition: "This book is an economics book about stochastic dominance. ... is certainly a valuable reference for graduate students interested in decision making under uncertainty. It investigates and compares different approaches and presents many examples. Moreover, empirical studies and experimental results play an important role in this book, which makes it interesting to read." (Nicole Bäuerle, Mathematical Reviews, Issue 2007 d)

This volume is dedicated to the concept and several applications of Dominant Language Constellations (DLC), by which it advances understanding of current multilingualism through addition of a novel perspective from which to view contemporary language use and acquisition. The term Dominant Language Constellation denotes the set of a person's or group's most expedient languages, functioning as an entire unit and enabling an individual or group to meet their needs in a multilingual environment. The volume presents pioneering contributions that employ DLC as the lens for analysing a wide array of issues. These include multilingual syntactic development, cross-linguistic interaction and multilingual production in formal and informal educational contexts, as well as linguistic profiles of multilingual groups used in elementary school and higher education. Other DLC issues include discussions of how identity, emotions and attitudes operate in various minority and majority contexts. Because the DLC concept does not assume any inherent hierarchy of languages it can serve as a framework public policy in multilingual countries/communities faced with challenging policy determinations regarding choice of languages for use in education settings and more widely in social institutions and the economy. Some chapters develop and extend the DLC concept, others adapt and apply it to a variety of contexts, both global and local. Many chapters feature educational and social settings across large parts of the world- Africa, Australia, Europe, North America (Canada and the USA) and Southeast Asia. The volume can serve as supplementary reading for courses on multilingualism, sociolinguistics, language policy and planning, educational linguistics, Second and Third Language Acquisition. *A History of the Christian Church* Kluwer Law International B.V. **A Dominant Character: The Radical Science and Restless Politics of J. B. S. Haldane** Under His DominanceA Dark and Deadly Romance

This path-breaking book provides a comparative analysis of public discourses in France and Australia on a series of highly mediated racialised gang rapes that occurred during the early to mid-2000s. These rapes led to intense public debate in both countries regarding an apparent 'gang rape phenomenon' associated with young men of Muslim background. By comparing the responses to similar instances of sexual violence in two very different Western liberal democracies, this book explores the relationship between constructions of national, gender and ethnic identity in modern, developed nations of the West. The impact of immigration and cultural diversity on communities has become an issue of central concern to Western liberal democracies in recent years. With greater movements of people than ever before, and large temporary migrant populations who have not 'gone home', the discourse of a 'crisis of national identity' is a feature of many democracies in the West. At the same time, in a supposedly 'post-feminist' age, the focus of debates around women's rights in these democracies has increasingly been the extent to which the cultural values of immigrant and ethnic minority populations are compatible with the espoused gender equality of the West. Through an analysis of these rapes, Kiran Kaur Grewal identifies certain commonalities as well as interesting points of divergence within the two nations' public discourses. In doing so she identifies the limitations of current debates and proposes alternative ways of understanding the tensions at play when trying to respond to acts of extreme sexism and violence committed by members of ethnic minority communities.

**Under His Dominance** W. W. Norton & Company

Offering an alternative narrative of the conquest of the Incas, Gonzalo Lamana both examines and shifts away from the colonial imprint that still permeates most accounts of the conquest.

Lamana focuses on a key moment of transition: the years that bridged the first contact between Spanish conquistadores and Andean peoples in 1531 and the moment, around 1550, when a functioning colonial regime emerged. Using published accounts and array of archival sources, he focuses on questions of subalternization, meaning making, copying, and exotization, which proved crucial to both the Spaniards and the Incas. On the one hand, he re-inserts different epistemologies into the conquest narrative, making central to the plot often-dismissed, discrepant stories such as books that were expected to talk and year-long attacks that could only be launched under a full moon. On the other hand, he questions the dominant image of a clear distinction between Inca and Spaniard, showing instead that on the battlefield as much as in everyday arenas such as conversion, market exchanges, politics, and land tenure, the parties blurred into each other in repeated instances of mimicry. Lamana's redefinition of the order of things reveals that, contrary to the conquerors' accounts, what the Spaniards achieved was a "domination without dominance." This conclusion undermines common ideas of Spanish (and Western) superiority. It shows that casting order as a by-product of military action rests on a pervasive fallacy: the translation of military superiority into cultural superiority. In constant dialogue with critical thinking from different disciplines and traditions, Lamana illuminates how this new interpretation of the conquest of the Incas revises current understandings of Western colonialism and the emergence of still-current global configurations.
