*Shibori* That Patchwork Place

Mandy Southan takes the art of Shibori, in which fabric is bound, clamped or stitched before dyeing, and goes beyond the traditional blue and white to create fabrics in a fabulous array of colours, patterns and textures. Clear step by step photographs and instructions demonstrate how to use acid dyes and cold water reactive dyes in a variety of creative ways. Mandy then demonstrates shibori techniques such as binding, hand painting, capping, stitching, folding and clamping, pole winding and pole wrapping can be used to create truly wonderful dyed fabrics.

Color your world blue.

Indigo is one of the colors of the rainbow, as easily recognized as it is fashionable. From its origins as a naturally produced dye, most common in India, to its ubiquitous appearance in blue jeans today, indigo has traveled far and wide. Nicola Gouldsmith shows you how to use indigo to dye fabric in different ways, including dip-dyeing, tie-dyeing, batik, shibori, and arashi, as well as basic plain dyeing. She then shows you how to use the results of your dyeing to make beautiful items to wear, and for the home, such as a tie-dyed t-shirt, a batik wall hanging, and a dip-dyed shawl. With the help of the clear step-by-step instructions for each project, and a full

techniques section explaining the various methods of dyeing, and any sewing or other skills needed, you will soon be able to create your own indigo world.

The word 'batik' is possibly of Malay origin from the word 'tik' meaning 'to drip' or 'to drop.' The term is applied to a resist dye technique invented independently in locations as diverse as Ancient Egypt, Japan and Turkestan. Batik is a remarkably flexible textile technique and is suited to small-scale methods of production, but demand from the fashion and tourism industries is increasing. This volume brings together the experiences and concerns of the international community of batik producers. It gives voice to their suggestions for ensuring that the producers of this traditional craft are integrated into its increasingly global production rather than excluded from it. Building on the work of batik designers and producers the book discusses the emergence of a global craft consciousness. Batik producers report on innovative measures taken both individually

and collectively to hold their market position while commercial producers frequently annex and mass-produce traditional batik design. The book concludes with a discussion of marketing and production innovations and tourism which enable the producers of batik to maintain the integrity of their designs whilst harnessing the benefits of new commercial forms. *Design, Style & History* Tuttle Publishing

Learn how to transform foraged wild plants, plants, garden produce and recycled food into dyes and inks with *Botanical Inks*. The book shows you how to extract environmentally sustainable colour from the landscape and use it to create natural dyes for textiles, clothing, paper and other materials. *Botanical Inks* covers dyeing and surface application techniques, including bundle dyeing, Shibori tie-dyeing, hapazome, indigo sugar vat dyeing, wood-block printing, screen printing and more. And it also shows you how to turn your new inks, dyes and technique knowledge into wonderful projects, from a simple bundle-dyed a scarf to a block-printed

tote bag. The process of turning plants into print can help you reconnect with nature, find a creative outlet and develop a mindful sense of presence. It also promotes an awareness of sustainable practices and how to reduce our impact on the planet.

An international study of natural dyeing aimed at teaching beautiful techniques Similar to cooking and the act of sharing meals, our relationship to textiles is a core tenet of our human experience. Creating textiles cultivates connection, belonging, community, and friendships among people. In the world of textiles, natural dyeing is the closest we come to the act of cooking. *Journeys in Natural Dyeing* shares the story of Kristine Vejar and Adrienne Rodriguez's travels to four countries—Iceland, Mexico, Japan, and Indonesia—where they visited natural dyers who use locally-sourced dyes to create textiles that evoke beauty, a connection to their environment, and showcase their mastery of skill. This book shares their process of using their own locally-grown dyes and includes recipes and projects to create more than 400 shades of color. In addition, you will learn how to use your own natural environment to create deep, beautiful

colors. No matter where you live, creating color naturally is possible. Batik, Traditional Textiles of Indonesia Routledge  
The oldest natural dye in use today is indigo. Learn about cultures that have used this wonderful dye and the chemistry of the dyeing process. Then develop varied applications and techniques through the recipes and projects. "...a must-have reference for fiber artist."--Ornament Magazine.

H'mong Batik: A Textile Technique from Laos celebrates the artistry of Blue H'mong women, as it is expressed in their batik. The painstaking methods by which they created traditional skirts, the importance of the skirts in the major life events of marriage and death, and the bonds formed between women as one thought another are all explored with great sensitivity. Illustrations recognize the achievements of individual batik artists, and a legend on the origin of batik adds a spiritual dimension.

The literature upon textile dyeing technique, including the tie-dye and batik methods, is widely scattered in a large number of periodicals and books, many of which are no longer available or do not appear in English. This book offers a concise history of man's attempts to dye, and pattern by dyeing, the textiles he made from the raw materials available to him. Despite the

conditions reflected in an early papyrus which stated that the "hands of the dyer reek like rotting fish and his eyes are overcome by weariness, " the development of dyeing techniques persisted from earliest known civilizations to the present day. As man discovered new natural fibers, and later synthetic fibers, so he invented new dyes and dyeing methods. Dyeing became a prosperous trade and the concern of governments, with the result that technical and social innovation began to develop more quickly. This development is described here in considerable detail. Sections are devoted to the many forms of tie-dye and batik practiced in various parts of the world from early times. Since this book, in common with its companion volume, is intended as a source book for students preparing special studies on dyed textiles, an exceptional feature is the provision of a number of comprehensive appendices of information for further research.

Learn the Japanese art of shibori, including tie-dyeing, folded, rolled, and sewn techniques, using indigo dye. Then make one of the 25 projects using the fabric you have created. Shibori is the name for a range of dyeing techniques that have been practiced in Japan for centuries. Using just plain white cloth and indigo dye, you can create a huge range of patterns that will each be unique. Full photographic step-by-step instructions are given for preparing the vat and plain dyeing, so you can master these steps before you move on to the different types of shibori. Each chapter then starts with a photographic step-by-step explanation of a different shibori technique. The first chapter covers kanoko and kumo (tie-dyeing with and without stones). Next there is shibori itajime (folding the fabric and clamping it between pieces of wood), then arashi (wrapping fabric around tubes), and nui (sewing and gathering the fabric with thread). After each technique has been

explained, there are simple projects to make that show off the patterns you have created at their best. A sewing techniques section completes the book, with all the basic stitches and skills you will need to make the projects.

Batik occupies a special place in Indonesian culture. Each fabric has a rich story to tell—as a reflection of the nation's religious beliefs, sophisticated court cultures and cosmopolitan history. The extraordinary textiles in this book are from the collections of Rudolf Smend and Donald Harper. Most date from the period 1880 to 1930 when the art of batik reached its apogee. Having collected historical batik for over thirty years and published two books on the subject, Rudolf Smend has invited his friend and fellow batik specialist Donald Harper to contribute his fine collection to this publication as well. None of the batik in this book have been published before. They represent an exquisite cross-section of the batik production of Java—the most important

batik-producing region in the world. The cloths are complemented by vintage photographs from the first quarter of the 20th century demonstrating how the batik were worn at court and at home. Three are from museums in Dresden and Cologne, while three are from the private collection of Leo Haks. The others have been collected over the past 30 years from private sources in Java. The captions are by Maria Wronska-Friend, an ethnologist and batik expert who frequently visits Indonesian batik centers and has worked for many years as an anthropologist in Papua New Guinea. Her contributions provide fundamental knowledge for lovers of this art form while at the same time providing new insights for experts. Rudolf Smend has invited other batik aficionados of his generation to share their passion for batik in this book. Inger McCabe Elliott, author of the bestselling *Batik: Fabled Cloth of Java* has contributed her lifelong

experience. Other authorities like Annegret Haake, Brigitte Khan Majlis and Jonathan Hope share their views and expertise in these pages. This book represents a labor of love and a lifetime of friendship for the two authors, who hope it will provide inspiration to a whole new generation of batik lovers.
