A personal journey made on one of America's most historic and defining routes--Highway 61--by one of Hollywood's finest, most gifted talents--Jessica Lange. Highway 61 is a storied stretch of road that cuts through the center of the country, North to South, originating in the Boreal forests on the North Shore of Lake Superior at the Canadian border and ends at Broad and Tulane in downtown New Orleans. It passes through eight states. It is sometimes called the Great River Road, rolling along the Mississippi and when it heads south out of Memphis, through the ancient flood plains of that river it becomes known as the Blues Highway - home to some of the greatest blues singers of the last century, many of whom recorded songs about this highway. "Lord, it wrecked my heart to think about Highway 61 I felt so blue, Lord, while I was out on that lonely highway." --Roosevelt Sykes "I was born in a small town in Northern Minnesota on Highway 61, as were my mother and father, my sisters. Most of my family, grandparents, aunts, uncles, cousins, were born, raised, married, lived and died and some buried along that stretch of highway. I drove that road countless times growing up and have been driving it again often in the last eight years, back and forth between New Orleans and my Minnesota, sometimes just passing through places - sometimes staying. Long stretches of Highway 61, north and south, are empty now, desolate. The landscape forlorn, you sense a longing for what has gone missing. The small towns, the stores, neighborhoods, family farms, the

factories. Even the strip malls have failed. What remains is mysterious, melancholy, lonely. These photographs are a chronicle of what remains and what has disappeared. It has a long memory, Highway 61." --Jessica Lange

Miles Davis, supremely cool behind his shades. Billie Holiday, eyes closed and head tilted back in full cry. John Coltrane, one hand

behind his neck and a finger held pensively to his lips. These iconic images have captivated jazz fans nearly as much as the music has. Jazz photographs are visual landmarks in American history, acting as both a reflection and a vital part of African American culture in a time of immense upheaval, conflict, and celebration. Charting the development of jazz photography from the swing era of the 1930s to the rise of black nationalism in the '60s, *Blue Notes in Black and White* is the first of its kind: a fascinating account of the partnership between two of the twentieth century's most innovative art forms. Benjamin Cawthra introduces us to the great jazz photographers—including Gjon Mili, William Gottlieb, Herman Leonard, Francis Wolff, Roy DeCarava, and William Claxton—and their struggles, hustles, styles, and creative visions. We also meet their legendary subjects, such as Duke Ellington, sweating through a late-night jam session for the troops during World War II, and Dizzy Gillespie, stylish in beret, glasses, and goatee. Cawthra shows us the connections between the photographers, art directors, editors, and record producers who crafted a look for jazz that would sell magazines and albums. And on the other side of the lens, he explores how the musicians shaped their public images to further their own financial and political goals. This mixture of art, commerce, and racial politics resulted in a rich visual legacy that is vividly on display in *Blue Notes in Black and White*. Beyond illuminating the aesthetic power of these images, Cawthra ultimately shows how jazz and its imagery served a crucial function in the struggle for civil rights, making African Americans proudly, powerfully visible.

Changing Moods is the second photography collection from John Dersham, who previously released *My Alabama* in celebration of the state's bicentennial. Changing Moods is a celebration of the art of photography, an appreciation of subjects both incredible and mundane, and a retrospective of a successful artistic career. *The essential guide to the art of creating black & white images* CRC Press

In this volume, Tanya Sheehan takes humor seriously in order to trace how photographic comedy was used in America and transnationally to express evolving ideas about race, black emancipation, and civil rights in the mid-1800s and into the twentieth century. Sheehan employs a trove of understudied materials to write a new history of photography, one that encompasses the rise of the commercial portrait studio in the 1840s, the popularization of amateur photography around 1900, and the mass circulation of postcards and other photographic ephemera in the twentieth century. She examines the racial politics that shaped some of the most essential elements of the medium, from the negative-positive process to the convention of the photographic smile. The book also places historical discourses in relation to contemporary art that critiques racism through humor, including the work of Genevieve Grieves, Adrian Piper, Lorna Simpson, Kara Walker, and Fred Wilson. By treating racial humor about and within the photographic medium as complex social commentary, rather than a collectible curiosity, *Study in Black and White* enriches our understanding of photography in popular culture. Transhistorical and interdisciplinary, this book will be of vital interest to scholars of art history and visual studies, critical race studies, U.S. history, and African American studies.

Containing photographs taken between 1948 and 1952, *Black White and Things* was in its original form a book hand-crafted by Robert Frank in 1952. Frank made three identical copies designed by Werner Zryd, each with spiral binding and original photographs. Printed for an exhibition at the National Gallery in Washington in 1994, Frank has now redesigned the book. Separated into three categories "black", "white", and "things", which are shaped more by mood than subject matter, the book traces Frank's travels to cities such as Paris, New York, Valencia and St. Louis. In the white section for instance, he brings photographs of vastly different motifs under a single aesthetic umbrella - his first wife reclining with their new-born baby, peasants squatting against a flaking wall in Peru, and a business man strolling past a snowdecked tree in London.

Now that you've bought an amazing new DSLR, you need a book that goes beyond the camera manual to teach you how to take great shots. That's where *Composition: From Snapshots to Great Shots, Second Edition*, comes in, teaching you the fundamentals of composition--the creative arrangement of elements in the shot, and the way a viewer's eye travels through an image--so you can get great shots no matter what gear you use. In this book, author and professional photographer Laurie Excell starts with the basics of composition--such as the popular rule of

thirds--and illustrates how elements like color, shape, angles, and contrast work to create compelling images. In the process, she covers all key camera features that affect composition (regardless of what type of DSLR you have), including the ability to freeze and convey motion depending on what shutter speed you choose, and the correlation between aperture and depth of field. In addition to dozens of brand-new images and more in-depth coverage on topics such as patterns and textures and arranging elements in a frame, this revised edition features several completely new chapters. These will include a chapter of step-by-step examples that highlight the compositional technique used to get just the right shot; a new chapter on black-and-white photography; and a chapter on what to do after the shot--enhancing and editing the images in post-processing. Beautifully illustrated with large, vibrant photos, this book will help you bring your own unique artistic expression to any situation whether taking portraits, action shots, landscapes, or events, teaching you how to take control of your photography to get the image you want every time you pick up the camera. The book includes coverage of Lightroom for image management; Nikon Capture NX2 for RAW processing; Photoshop for image processing; and NIK and OnOne software for creative effects.
