Studying cost accounting is one of the best business decisions a student can make. Why? Because success in any business—from the smallest corner store to the largest multinational corporation—requires the use of cost accounting principles and practices. Cost accounting provides key data to managers for planning and controlling, as well as for costing products, services, and customers.

This supplement provides computerized cases for all major cost accounting topics. Students are asked to define the unique business problem described in the case, use the applied

templates to analyze data related to alternative courses of action, and then make a decision or discuss the implications of the results. An initial exercise illustrates the basics of using a microcomputer and Excel. Optional tutorials are also available for those who want to add to, improve on, or make more effective use of the templates. A Solutions Manual provides the case objective, an overview of the case, a description of the accompanying template, a list of potential student analysis, and a discussion guide. *Student Guide to Cost Accounting* Pearson Horngren's Cost Accounting defines the cost accounting market
