Billboard Council of Europe

Due to its versatility and accessibility, individuals all around the world routinely use various forms of technology to interact with one another. Over the years, the design and development of technologies and interfaces have increasingly aimed to improve the human-computer interactive experience in unimaginable ways. The Handbook of Research on Human-Computer Interfaces and New Modes of Interactivity is a collection of innovative research on the methods and applications of interactive technologies in the modern age. Highlighting topics including digital environments, sensory applications, and transmedia applications, this book is ideally designed for academicians, researchers, HCI developers, programmers, IT consultants, and media specialists seeking current research on the design, application, and advancement of different media technologies and interfaces that can support interaction across a wide range of users.

Contracts Springer Science & Business Media

Human rights cannot be defended by legal measures alone. They need to be protected and safeguarded by everyone, including young people. Human rights are best respected and appreciated when we know them, stand up for them and apply them in our lives. COMPASS provides youth leaders,

teachers and facilitators of human rights education activities, whether professionals or volunteers, with concrete ideas and practical activities to engage, involve and motivate young people in living, learning and acting for human rights. It promotes a comprehensive perspective on human rights education and sees young people as actors for a culture of universal human rights. COMPASS was originally published in 2002 and is now available in more than 30 languages. A version specifically designed for human rights education with children - COMPASITO - enjoys a similar success. This fully revised and updated edition includes new activities and information about human rights issues such as disability and disablism, migration, religion, remembrance, war and terrorism. COMPASS is a practical tool and resource for citizenship and human rights education. It is an essential companion for all those who are curious and interested in making the right to human rights education a reality for everyone.

The Nautical Gazette Emerald Group Publishing

The Federal Regulatory Directory, Eighteenth Edition continues to offer a clear path through the maze of complex federal agencies and regulations, providing to-the-point analysis of regulations. Information-packed profiles of more than 100 federal agencies and departments detail the history, structure, purpose, actions, and key contacts for every regulatory agency in the U.S. government. Now updated with an improved searching structure, the Federal Regulatory Directory continues to be the leading reference for understanding federal regulations, providing a richer, more targeted exploration than is possible by cobbling together electronic and print sources.

InfoWorld John Wiley & Sons

Advances in Web-based GIS, Mapping Services and Applications is published as part of ISPRS WG IV/5 effort, and aims at presenting (1) Recent technological advancements, e.g., new developments under Web 2.0, map mashups, neogeography and the like; (2) Balanced theoretical discussions and technical implementations; (3) Commentary on the current stage

The Invisible Librarian: A Librarian's Guide to Increasing Visibility and Impact provides insights into what many librarians are feeling, including questions such as "do they feel invisible?" and "How many times have they heard somebody say 'but everything is on the Internet?'" If you are a librarian struggling to find the best strategy for the future of the profession in a rapidly changing information environment, this book is for you. People don't realize that librarians make information available and not just by search engine. This book will make people think differently about librarians, making a case for their value and impact that is compelling, convincing, and credible. Given their versatility and knowledge, now is the time for librarians to become champions of the information age as they improve the visibility and impact of libraries to readers, to stakeholders, and in society. By the end of the book, librarians will have a Visibility Improvement Plan to guarantee future success. - Provides strategies that librarians can use to raise their visibility - Presents how successful librarians have made a positive impact - Covers new techniques that measure current visibility amongst readers and key stakeholders - Includes key guidance on how to implement a 10-step Visibility Improvement Plan

Are you younger, or older, than you think? Nobody wants to acknowledge that dreaded number on their driver's license, yet chronological age is only one aspect of what determines a person's 'true age'. Just as we all possess multiple intelligences, we also have multiple ages that make up our 'true age'. Expert authors Partnow and Hyman explain just what factors make up these multiple ages, and provide practical insight on ways to improve the scores in each area. ?Includes easy quizzes to help readers determine their 'true age profile' ?Addresses medical, educational, sexual, and familial issues, and many More ?A fun and engaging take on cultivating optimal health and well-being

[The Complete Idiot's Guide to Your True Age](#) CQ Press

This book is the fourth edition of a highly practical guide to the leading cases in European Competition Law. It explores the application of Article 101 TFEU, Article 102 TFEU and the European Merger Regulation, as well as the public and private enforcement of Competition Law. In addition, it reviews the intersection between Competition Law and Intellectual Property Rights and the application of Competition Law to State action. Each chapter outlines the relevant laws, regulations and guidelines for each topic. Within this framework, cases are reviewed in summary form, accompanied by analysis and commentary. "This book should be in the library of every competition law practitioner and academic. The summary of cases is first class. But what makes it really stand out is the quality of the commentary and the selection of the material which includes not only the most important European judgements and decision but also some of the leading cases from the US and European Member States." Ali Nikpay, Gibson, Dunn & Crutcher "The study of EU Competition law requires the analysis and understanding of a number of increasingly complex and lengthy European Commission and European Court decisions. Through the provision of case summaries, excerpts from the important passages and concise commentary linking these decisions to other key case law and Commission documents, this unique and impressive book provides the student and practitioner of EU competition law with an extremely clear and useful introduction to these leading decisions." Dr Kathryn McMahon, Associate Professor, School of Law, University of Warwick "The Guide is an invaluable tool for both students and practitioners. It provides a compact overview on the fundamental cases and highlights the essential problems in a clear and sharp analysis." Dr Christoph Voelk, Antitrust Practice Group, McDermott, Will & Emery LLP, Brussels "This edition will be especially valuable to competition law specialists abroad who are interested in the jurisprudence and policy of the European Union and its member states. Familiarity with the European regime is essential for proficiency in competition law today, and this volume provides an excellent foundation." William E Kovacic, Global Competition Professor of Law and Policy, George Washington University Law School, Former Chairman, US Federal Trade Commission "A perfect reference for students of competition law, giving them a kick start when searching for EU case law on a specific subject." Magnus Strand, University of Uppsala, Sweden

The International Air Guide was published in 1931, and it contains all international airports, aerodromes and airfields. Any large airport, but also any little-known airfield, is described in detail. In most cases, this description also includes a historical aeronautical chart and aerodrome map with reference to the corresponding coordinates, radio frequencies and special geographical blockades. For those who are interested in aeronautics and in aviation history, and for those, who want to locate vanished or abandoned airfields, the International Airport Guide is a perfect tool.

Contracts: Cases and Doctrine features a mix of lightly-edited classic and contemporary cases that stresses current contract doctrine along with the essential lawyering skill of case analysis—how to sift through the facts of the case to discern the prevailing rules and theory. Randy Barnett and Nate Oman's innovative text introduces each case and provides the historical background of the iconic cases that make the study of contract law engaging. Study Guide questions help students identify salient issues as they read each case. Judicial biographies of each judge provide additional context. The Seventh Edition has been edited to delete materials that are seldom covered in a 1L class. This edition adds new cases that have been chosen for their topicality, facts, or pedagogical usefulness. New areas covered include so-called "smart contracts" and the relationship between restitution and contract. As always, we have tried to focus on cases with facts that will be easier to teach. New cases in this edition include a contract with a spy that

turns out to be a double agent for the KGB, the effect of pandemics on contractual obligations, the gambling shenanigans of a royal prince, and emotional support animals. New to the Seventh Edition: In order to keep the size of the book manageable, we have eliminated the section on the signature requirement under the statute of frauds and have slimmed down the materials on internet contracting, which is no longer the "cutting edge" area that once it was. New cases include: Attorney General v. Blake (restitution damages for breach of contract against a British spy who defected to the USSR) Snepp v. United States (squib) (constructive trust against an American spy for breach of contract) Al-Ibrahim v. Edde (denied an unjust enrichment remedy to unwind a contract declared unenforceable for illegality) Pelletier v. Johnson (claim for unjust enrichment allowed to unwind a contract declared unenforceable for illegality) Carter Baron Drilling v. Badger Oil Corp. (discussing the parole evidence rule under the UCC) C.R. Klewin Inc. v. Flagship Properties, Inc. (the exception to the 1-year requirement under the statute of frauds) Cohen v. Clark (case imposing liability on a breaching party that everyone agrees breached in "good faith"; illustrates the strictness of contractual liability) Hanford v. Connecticut Fair Ass'n, Inc. (public policy exception for public health in time of a pandemic) B2C2 Ltd v. Quoine Ltd Pte (unilateral mistake case dealing with "smart contracts") Professors and student will benefit from: Case-based approach that gives students ample doctrinal materials to sift through for facts and analyze for prevailing rules and theory. Cases that are lightly edited, or presented as whole as possible, to give first-year students the opportunity to develop case-analysis skills. Restatement and UCC sections integrated to encourage students to consult them as they read the cases. Iconic and contemporary cases combined to show how the classic cases are still relevant. Chapters that begin with a brief, accessible textual introductions. Study Guide questions before each case help focus student attention on salient issues. Flexible organization begins with Remedies, but chapters can be taught in any order.

As the world rapidly moves online, sectors from management, industry, government, and education have broadly begun to virtualize the way people interact and learn. Virtual Learning Environments: Concepts, Methodologies, Tools and Applications is a three-volume compendium of the latest research, case studies, theories, and methodologies within the field of virtual learning environments. As networks get faster, cheaper, safer, and more reliable, their applications grow at a rate that makes it difficult for the typical practitioner to keep abreast. With a wide range of subjects, spanning from authors across the globe and with applications at different levels of education and higher learning, this reference guide serves academics and practitioners alike, indexed and categorized easily for study and application.

Do you need a one-volume lesson about business applications of the Internet and other computer-based hardware and software? This book provides comprehensive coverage of four major areas: The Internet and Data Communications Basics, Popular Types of Networks, Design, Implementation, and Management Issues in a Network Environment, and Data Communication and Internet Applications. The Handbook of Business Data Communications looks briefly at the major corporations working in each category. In addition to practical examples, short case studies, and summaries of emerging issues in data communications, Professor Bidgoli discusses personal, social, organizational, and legal issues surrounding the use of networks and business software. Easy to use, balanced, and up-to-date, the Handbook has both answers and insights into future trends in business data communications. Key Features * An industry profile begins each chapter, providing readers with ways to learn more about the products they use * Numerous case studies of businesses throughout the book highlight applications topics * Includes balanced presentations of current and emerging technologies as well as useful discussions of security issues and measures * Presents thorough examinations of the Internet and intranets/extranets * Social, organizational, and legal materials provide context for data communications information * Summaries and review questions reinforce the aims of each chapter

Strategies for advocacy, fundraising, and engaging the community Social Change Anytime Everywhere was written for nonprofit staff who say

themselves or are asked by others, “Email communications, social media, and mobile are important, but how will they help our nonprofit and the issues we work on? Most importantly, how the heck do we integrate and utilize these tools successfully?” The book will help answer these questions, and is organized to guide readers through the planning and implementation of online multi-channel strategies that will spark advocacy, raise money and promote deeper community engagement in order to achieve social change in real time. It also serves as a resource to help nonprofit staff and their boards quickly understand the evolving online landscape and identify and implement the best online channels, strategies, tools, and tactics to help their organizations achieve their missions.

The only work to date to collect data gathered during the American and Soviet missions in an accessible and complete reference of current scientific and technical information about the Moon.

[Advances in Web-based GIS, Mapping Services and Applications](#) Bloomsbury Publishing

This User’s Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase

understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User’s Guide was created by researchers affiliated with AHRQ’s Effective Health Care Program, particularly those who participated in AHRQ’s DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.
