Education

This book deals  
comprehensively with  
the elements of cost  
accounting, their  
application to costing  
methods, and their  
significance for  
management through  
budgetary control,  
short term decision-  
making, and capital  
budgeting. It is an  
extensive revision of  
the author's well-  
known costing text,  
and provides the  
student with a  
complete introduction  
to cost accounting.  
Relevant exercises are

included at the end of  
each chapter, with  
solutions at the end of  
the book. These  
include many from  
recent examinations of  
the major professional  
accountancy bodies.  
Teachers are thus able  
to use their own  
favourite examples in  
lecture or class, and to  
refer students to other  
exercises for further  
practice. Students who  
are unable to attend a  
regular course will be  
able to check their  
work against the  
solutions. A series of  
multiple choice  
questions throughout  
the book provides a  
further opportunity for  
the student to check  
personal progress.  
Other features of the  
book include: a  
complete introduction  
to cost accounting;  
new material on capital  
budgeting and cost

accounting for service activities; an explanation of budgetary control including behavioural aspects; and graded questions and MCQs throughout (definitions follow CIMA terminology).

*Handbook of Cost Management* Spiramus Press Ltd

There is growing interest in the history of accounting amongst both accounting practitioners and accounting academics. This interest developed steadily from about 1970 and really 'took off' in the 1990s.

However, there is a lack of texts dealing with major aspects of accounting history that can be used in classrooms, to inform new researchers, and to provide a source of reference for

established researchers. The great deal of research into cost and management accounting in Britain published in academic journals over the last twenty years—including the authors' own contributions—makes *The History of Cost and Management Accounting* an essential contribution to the field.

Vikas Publishing House  
 Cost Management: A Strategic Emphasis, by Blocher/Stout/Juras/Cokins is dedicated to answering the question: Why Cost Management? Blocher et al. provide the cost-management tools and techniques needed to support an organisation's competitiveness, improve its performance, and help the organisation accomplish its strategy. The text is written to help

students understand the broader role of cost accounting in helping an organisation succeed - and not just the measurement of costs. While the text does include coverage of traditional costing topics (e.g., job-order costing, process costing, service-department cost allocations, and accounting for joint and by-products), its primary strength is the linkage of these topics, as well as more contemporary topics, to an organisation's strategy. This message is reinforced by a dynamic author team, all four of whom have close ties to current cost management practice.

**Managerial Accounting For Dummies** John Wiley & Sons

Management Accounting is part of the celebrations to mark CIMA's 90th anniversary in 2009. It looks at the development of cost and management accounting from the founding of the Institute to today. It considers a number of immediate challenges to management accountants and surveys a range of issues and challenges that will likely affect management accounting thought

and practice in the future. The authors examine the possibilities for accountants to widen their focus and become more familiar with the enterprise technology determining their organisations' cost structures and with the effects of multiple production in various locations, such as economies or diseconomies of scale. Such change may require the alteration of traditional cost models used by accountants to become more nuanced. The book suggests how this may be accomplished and highlights the need for management accountants to work as part of management teams throughout the organisation as business partners rather than remain

grounded in specialist information provision roles. Alnoor Bhimani is Professor of Management Accounting at the London School of Economics. He is also a Certified Management Accountant as well as an author of 15 books and over 100 articles. Michael Bromwich was CIMA's Professor of Accounting and Financial Management at the London School of Economics and Political Science (1985 to 2006), now Emeritus.
