The Handbook of Methods in Cultural Anthropology, now in its second edition, maintains a strong benchmark for understanding the scope of contemporary anthropological field methods. Avoiding divisive debates over science and humanism, the contributors draw upon both traditions to explore fieldwork in practice. The second edition also reflects major developments of the past decade, including: the rising prominence of mixed methods, the emergence of new technologies, and evolving views on ethnographic writing. Spanning the chain of research, from designing a project through methods of data collection and interpretive analysis, the Handbook features new chapters on ethnography of online communities, social survey research, and network and geospatial analysis. Considered discussion of ethics, epistemology, and the presentation of research results to diverse audiences round out the volume. The result is an essential guide for all scholars, professionals, and advanced students who employ fieldwork.

Lewellen gives us the first analytic overview of an important new subject area in a field that has long been identified with the study of relatively bounded communities. Globalization refers to the increasing flows of trade, finance, culture, ideas, and people brought about by the sophisticated technology of communications and travel and by the worldwide spread of neoliberal capitalism. Unlike dependency theory and world systems analysis, which tended to assume a bird's-eye perspective, globalization offers a down-and-dirty, ground-up approach in which

ethnographic research is not marginal but essential. Through multiple examples, selected from the latest ethnographic research from all over the world, Lewellen examines the ways that globalization impacts migrants and stay-at-homes, peasants and tribal peoples, men and women. A crucial theme is that the global/local nexus is one of unpredictable interaction and creative adaptation, not of top-down determinism. Theoretically, globalization studies have become the focal point for the convergence of interpretive anthropology, critical anthropology, postmodernism, and poststructuralism, which are combined with a tough empiricism. For the casual reader or the classroom, this work draws together the ethnographic studies and cutting-edge theories that comprise the anthropology of globalization.

A Brief Empirical Introduction to the Four Fields of Anthropology Human Evolution and Culture presents the highlights of the popular Anthropology, 13th edition by the same author team. It provides students with an empirical introduction to the four fields of anthropology, and helps them understand humans in all their variety - and why such variety exists. Its four sections introduce students to 1) anthropology, 2) the biological and cultural evolution of humans, 3) cultural variation, and 4) how anthropology can be applied beyond academia. This new 7th edition places an increased emphasis on immigration, migration and globalization. Additionally, the size of the book (19 chapters) makes it useful for quarter courses, as well as for courses that encourage a lot of supplemental reading. An Introduction to Cultural Anthropology  
 Jill Potash

Offering compelling photos, engaging examples, and select studies by anthropologists in a variety of locations around the globe, this streamlined, market-leading text presents cultural anthropology in vivid, accessible terms showing students how the field is relevant to understanding the complex world around them. The authors present

the fundamental concepts from a holistic perspective using three unifying themes to frame the text: 1) the varied ways humans face the challenges of existence, 2) the connections between culture and biology in shaping human beliefs and behavior, and 3) the impact of globalization on peoples and cultures around the world. They also integrate coverage of race, class, gender, and ethnicity throughout the text, and in this edition, they have expanded the popular Globalscape feature to get students thinking about the consequences of globalization and (sometimes) their own behavior. Furthermore, the text's strong supplements program provides instructors and students with a wealth of resources designed to enhance the teaching and learning experience. *Human Culture* SAGE Publications  
 THE ESSENCE OF ANTHROPOLOGY features an experienced and diverse author team with expertise in all subfields of anthropology. With an eye to visual and written clarity, the authors present anthropology from an integrated, holistic perspective. They use three unifying themes as a framework to tie the book together and keep students focused: systemic adaptation to emphasize that every culture, past and present, is an integrated and dynamic system of adaptation; biocultural connections that highlight the integration of human culture and biology in the steps humans take to meet the challenges of survival; and the emergence of globalization and its disparate impact on peoples and cultures around the world. Pedagogical elements support these main themes

and give deeper insight into the meaning and relevance of a wide range of topics covered in the general narrative by tying examples to behavior today. Insightful questions foster critical thinking, additional Visual Counterpoints widen the book's array of compare-and-contrast examples, and a new Digging into Anthropology feature provides a hands-on approach to anthropological methods by giving active learning opportunities related to each chapter's content. In addition, the authors have broadened viewpoints to offer explanations and examples from different points of view. Practical and insightful, CLASSIC READINGS IN CULTURAL ANTHROPOLOGY is a concise, inexpensive, and accessible reader that presents core historical and contemporary works that have been instrumental in shaping anthropological thought and research over the past decades. Carefully edited by author Dr. Gary Ferraro, the text includes classic readings from the disciplines of cultural anthropology and linguistics. Selected from scholarly works on the basis of their enduring themes and contributions to the discipline, these eminently relevant selections enable you to further explore anthropological perspectives on such key topics as culture; language and communication; ecology and economics; marriage and family; gender; politics and social control; supernatural beliefs; and issues of culture change. By providing this wide array of classic reading on foundational topics, this book delivers an

excellent introduction to the field of cultural anthropology and the contributions it makes to understanding the world around us. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

*Inside Cultures* Wadsworth

The Ecological Transition studies the relationships between humans and the physical environment. It also assesses some converging approaches in cultural anthropology, including cultural ecology, economic anthropology, social exchange, and behavioral adaptation. Comprised of ten chapters, this book focuses on ecological transition, which refers to the process by which humans incorporate nature into society. It discusses how to formulate a policy-oriented cultural ecology and looks at the ecological transition as material evolution and as a problem of equilibrium. The succeeding chapters review some of the contributions of cultural ecology, including its successes and failures. Finally, the book examines the concept of adaptive and maladaptive actions in human ecology. This book is useful for anthropologists who are interested in cultural-ecological research and its implications in public policy.

This concise, contemporary option for instructors of cultural anthropology breaks away from the traditional structure of introductory textbooks. Emphasizing the interaction between humans and their environment, the tension between human universals and cultural variation, and the impacts of colonialism on traditional cultures, *Inside Cultures* shows students how cultural anthropology can help us understand the complex, globalized world around us.

This third edition: contains brand new material on many subjects, including anthropological approaches to anti-racism social movements in the Global North during 2020; includes findings in anthropological research regarding the Covid-19 pandemic, and its relation to other recent global events and conditions; updates the organization and presentation of cultural universals and cultural variations; presents updated and enhanced discussions of anthropological studies of humankind and the environment, with expanded analysis of industrial agriculture in the age of globalization; includes more illustrations and updates to existing illustrations, sidebars, and guideposts throughout the volume; is written in clear, supple prose that delights readers while informing on content of one of the important courses in a liberal arts education, one that effectively bridges humanities and the sciences.
