[Complete & Illustrated](#) Dover Fine Art, History of Art

Leonardo Da Vinci, arguably the central figure of the Renaissance, has long been considered by many a man of mystery. This is in spite of the fact that we have an unparalleled set of documents which illuminate his thought processes, interests, and deepest beliefs. We have access to hundreds of pages of his notes, jottings, sketches, doodles, and musings, including lists of books he read and even scraps of financial records. All of the known Da Vinci papers as of the mid-19th century are included here in this magnificent collection. What emerges is the picture of a rationalist. For instance, Da Vinci was one of the first to question the Biblical account of the Flood. He saw the fossils of sea creatures on the tops of mountains and concluded that these could not have been deposited in a forty day flood. He looked at river valleys and did the math; they could only have been eroded over huge horizons of time.

Vinci papers as of the mid-19th century are included here in this magnificent collection. What emerges is the picture of a rationalist. For instance, Da Vinci was one of the first to question the Biblical account of the Flood. He saw the fossils of sea creatures on the tops of mountains and concluded that these could not have been deposited in a forty day flood. He looked at river valleys and did the math; they could only have been eroded over huge horizons of time. Da Vinci put as much thought into his art as he did his science. Practically half of the writings here relate to detailed studies of the natural world which informed his work as an artist.

**Leonardo Da Vinci** Simon and Schuster

Most people will know Leonardo da Vinci as a master artist, but he was far more than that, preferring to describe himself as an artist-engineer to encompass his prodigious skills as a virtuoso inventor. Richly illustrated with more than 50 facsimile images from his notebooks and several of his most famous works of art, including The Last Supper and the Mona Lisa, The Notebooks of Leonardo da Vinci dips into the thousands of pages and several notebooks that he accumulated with his observations on a wide range of subjects, offering an insight into his thoughts and ideas. Combining Leonardo's famous mirror writing with the most beautifully detailed drawings and sketches, these extracts are divided into three sections - art, science, and design - and cover topics as varied as painting, anatomy, the nature of flight, the scientific method, and the practical concerns of engineering. The accompanying translations by the renowned Leonardo da Vinci scholar Edward MacCurdy bring to life this polymath and genius who was truly the quintessential 'Renaissance Man'.

*Leonardo Da Vinci* Oxford University Press

This selection offers a cross-section from the 6,000 surviving sheets that constitute Leonardo's notebooks, including his thoughts on landscape, optics, anatomy, architecture, sculpture, and painting. Fully updated, this new edition includes some 70 line drawings and a Preface by Leonardo expert Martin Kemp.

Leonardo da Vinci's life is fascinating; he is the prototypical Renaissance man, and acknowledged genius. Leonardo's Notebooks explores this biography in his own words and in his art, connecting moments of his life to artistic accomplishments. Exploring this image-filled book is as close to reading Da Vinci's diaries as we can get. Leonardo da Vinci, artist, inventor, and prototypical Renaissance man, is a perennial source of fascination because of his astonishing intellect and boundless curiosity about the natural and man-made world. During his life he created numerous works of art and kept voluminous notebooks that detailed his artistic and intellectual pursuits. The collection of writings and art in this magnificent book are drawn from his notebooks. The book organizes his wide range of interests into subjects such as human figures, light and shade, perspective and visual perception, anatomy, botany and landscape, geography, the physical sciences and astronomy, architecture, sculpture, and inventions. Nearly every piece of writing throughout the book is keyed to the piece of artwork it describes. The writing and art is selected by art historian H. Anna Suh, who provides fascinating commentary and insight into the material, making Leonardo's Notebooks an exquisite single-volume compendium celebrating his enduring genius.

About The Notebooks of Leonardo Da Vinci - Complete Edition By Leonardo Da Vinci Leonardo da Vinci (1452 - 1519), painter, sculptor, architect and engineer, kept notes and drawings of his studies, ideas and inventions. Over 7,000

pages have survived, including this notebook known as Codex Arundel after its English collector Thomas Howard, 14th earl of Arundel. The structure of the notebook shows that it was not originally a bound volume. It was put together after Leonardo's death from loose papers of various types and sizes, some indicating Leonardo's habit of carrying smaller bundles of notes to document observations outdoors. Many of the pages were written in 1508; others come from different periods in Leonardo's life, covering practically the whole of his career. The notebook features many topics, including mechanics, the flow of rivers, astronomy, optics, architecture and the flight of birds, demonstrating Leonardo's intense curiosity.

Profile Books

Leonardo da Vinci was a Renaissance Master and is widely considered one of the greatest painters of all time. In addition to his paintings Leonardo da Vinci was famous for his highly detailed notebooks and manuscripts where he wrote and sketched his ideas on his studies of science, invention, anatomy and nature. The notebooks of Leonardo da Vinci provide a rare glimpse into the mind of a universal genius. These notebooks are carefully crafted with that in mind, to inspire the modern day artist and inventor in the tradition of this Renaissance genius. The Vitruvian Man note book makes a great personal journal, diary and sketchbook or a perfect birthday gift or Christmas gift for the renaissance man or woman in your life. The Notebooks of Leonardo da Vinci Courier Corporation

*The Notebooks of Leonardo Da Vinci - Complete* Ilex Press

Towering across time as the creator of the Mona Lisa, forever famous as a sculptor and inventor, Leonardo da Vinci was one of the greatest minds of both the Italian Renaissance and Western civilization. His keen scientific imagination and, most of all, his aesthetic and creative genius have forever changed the course of our culture. Dan Brown's The Da Vinci Code and recent in-depth biographies have stimulated renewed interest in da Vinci and his complex and inquiring intelligence. He is a challenging figure easily defined only by his great works, but this revealing selection of sketches, diagrams, and writings from his notebooks is a beautiful and varied record of da Vinci's theories and observations. They embrace not only art but also architecture, town planning, engineering, naval warfare, music, medicine, mathematics, science, and philosophy. The notebooks—a treasure trove of unparalleled ingenuity, curiosity, and creative energy—have inspired readers for centuries. The Da Vinci Notebooks is the perfect introduction to the mysteries of a master artist.

*Journal Sketchbook* Sirius Entertainment

This new Great collection of his art and notes from Cheapest Books. Put together all notes and drawings of Da Vinci as found, not need reordered. A singular fatality has ruled the destiny of nearly all the MOST FAMOUS OF LEONARDO DA VINCI'S WORKS. Two of the three most important were never completed, obstacles having arisen during his life-time, which obliged him to leave them unfinished; namely the Sforza Monument and the Wall-painting of the Battle of Anghiari, while the third--the picture of the Last Supper at Milan--has suffered irremediable injury from decay and the repeated restorations to which it was recklessly subjected during the XVIIth and XVIIIth centuries. Nevertheless, no other picture of the Renaissance has become so wellknown and popular through copies of every description. Vasari says, and rightly, in his Life of Leonardo, "that he laboured much more by his word than in fact or by deed", and the biographer evidently had in his mind the numerous works in Manuscript which have been preserved to this day. To us, now, it seems almost inexplicable that these valuable and interesting original texts should have remained so long unpublished, and indeed forgotten. It is certain that during the XVIth and XVIIth centuries their exceptional value was highly appreciated. This is proved not merely by the prices which they commanded, but also by the exceptional interest which has been attached to the change of ownership of

merely a few pages of Manuscript. Leonardos literary labours in various departments both of Art and of Science were those essentially of an enquirer, hence the analytical method is that which he employs in arguing out his investigations and dissertations. The vast structure of his scientific theories is consequently built up of numerous separate researches, and it is much to be lamented that he should never have collated and arranged them. His love for detailed research--as it seems to me--was the reason that in almost all the Manuscripts, the different paragraphs appear to us to be in utter confusion; on one and the same page, observations on the most dissimilar subjects follow each other without any connection. A page, for instance, will begin with some principles of astronomy, or the motion of the earth; then come the laws of sound, and finally some precepts as to colour. Another page will begin with his investigations on the structure of the intestines, and end with philosophical remarks as to the relations of poetry to painting; and so forth. Leonardo himself lamented this confusion, and for that reason I do not think that the publication of the texts in the order in which they occur in the originals would at all fulfil his intentions. No reader could find his way through such a labyrinth; Leonardo himself could not have done it. Added to this, more than half of the five thousand manuscript pages which now remain to us, are written on loose leaves, and at present arranged in a manner which has no justification beyond the fancy of the collector who first brought them together to make volumes of more or less extent. Nay, even in the volumes, the pages of which were numbered by Leonardo himself, their order, so far as the connection of the texts was concerned, was obviously a matter of indifference to him. The only point he seems to have kept in view, when first writing down his notes, was that each observation should be complete to the end on the page on which it was begun.

*The Leonardo Da Vinci Sketch Book* Courier Corporation

Volume 1 of 2-volume set. Total of 1,566 extracts includes writings on painting, sculpture, architecture, anatomy, mining, inventions, and music. Dual Italian-English texts, with 186 plates plus over 500 additional drawings.
