Inspiration and Authority in the Middle Ages rethinks the role of prophecy in the Middle Ages by examining how professional theologians responded to new assertions of divine inspiration. Drawing on fresh archival research and detailed study of unpublished manuscript sources from the twelfth to fourteenth centuries, this volume argues that the task of defining prophetic authority became a crucial intellectual and cultural enterprise as university-trained theologians confronted prophetic claims from lay mystics, radical Franciscans, and other unprecedented visionaries. In the process, these theologians redescribed their own activities as prophetic by locating inspiration not in special predictions or ecstatic visions but in natural forms of understanding and in the daily work of ecclesiastical teaching and ministry. Instead of containing the spread of prophetic privilege, however, scholastic assessments of prophecy from Peter Lombard and Thomas Aquinas to Peter

John Olivi and Nicholas Trevet opened space for claims of divine insight to proliferate beyond the control of theologians. By the turn of the fourteenth century, secular Italian humanists could lay claim to prophetic authority on the basis of their intellectual powers and literary practices. From Hugh of St Victor to Albertino Mussato, reflections on and debates over prophecy reveal medieval clerics, scholars, and reformers reshaping the contours of religious authority, the boundaries of sanctity and sacred texts, and the relationship of tradition to the new voices of the Late Middle Ages.

A unique, integrative, team-centered approach to writing and formatting technical documents
 Technical Professionals: Do you have difficulty producing high-quality documents with multiple contributors when faced with a tight deadline? Do you need a process that enables global team members to collaborate online as they produce sophisticated documents? Do you prefer the ease of a WYSIWG desktop publishing tool like Microsoft Word rather than more complex software like LaTeX? Professors and Graduate Students: Do you want to streamline the process of writing multi-

investigator papers, reports, proposals, and books? Do you spend a lot of time formatting documents instead of thinking and writing? Do you write research papers in Microsoft Word and then need to convert them to LaTeX for your thesis? Do you write research papers in LaTeX and then need to convert them to Microsoft Word when embarking on collaborations with your colleagues from industry? Undergraduate Students: Do you need to write a research paper and don't know where to start? Do you need to collaborate with classmates on a long paper and find yourself lost in organizational details rather than immersed in the content? If you answered "yes" to any of these questions, Technical Writing for Teams: The STREAM Tools Handbook is for you. It provides an easy-to-learn system that streamlines individual and collaborative writing, allowing you and your teams to instantly become more productive and create the highest quality documents in a minimum amount of time. Introduced here are the STREAM Tools—Scientific and Technical wRiting, Editing, And file Management Tools—which unlock your collaborators' potential and addresses team dynamics, separation of duties, and workflow. You'll see how to ensure compatibility among multiple writers, achieve consistent formatting, organize content, integrate

bibliographic databases, automate the process of document preparation, and move content between Microsoft Word and LaTeX. Checklists, guidelines, and success stories are also included to help you operate as efficiently as possible. From planning and editing documents to solving common team writing problems to managing workflow, *Technical Writing for Teams: The STREAM Tools Handbook* is the one-stop reference that allows teams to collaborate successfully and create unified, effective documents.

K2 blackpearl and the K2 platform is a large, powerful, "game-changing" application platform built on Microsoft technologies. Understanding it from top to bottom would be a great task for a single person, which is why we have gathered more than a dozen authors to supply you with the information to successfully transform your company into a process-oriented, efficient business that can grow with the K2 platform. Since this is the first book on K2 blackpearl, you will find a broad range of topics in this book, from the market in which K2 blackpearl is aimed to the architecture of

the platform, from how to approach process design to developing your own custom user manager. The first part of the book is meant for everyone and provides an understanding of K2 blackpearl and where it fits in the marketplace. It is included to provide a framework for thinking about various aspects of process-driven applications, including how they differ from business process management techniques; identifying processes in your company to automate, the different pieces that make up a process; measuring the success of your efforts; and finally shifting your company's culture in the direction of process efficiency. This section may be the only section you need to read if you are sponsoring a process improvement effort in your company. If you are responsible for leading the effort, make sure to read Chapters 3 and 4. The other parts are meant to provide details on how to effectively deploy and use K2 blackpearl and include a broad range of topics. Read what you are most interested in, but also make sure to read Chapter 8, which will give you a great foundation to start designing processes with K2 blackpearl. Chapter 14 is also recommended for everyone because it provides an overview of the available K2 Designers and how you can share projects among them. K2 blackpearl is the main subject of this book, although we devote an entire chapter, Chapter 23, to the add-on product K2 connect to give you an understanding of how to bring SAP data into your processes. We also talk a bit about K2 blackpoint, particularly in the SharePoint chapters. Since K2 blackpoint is built on the K2 blackpearl foundation, many of the same concepts apply to that product as well, but we do not point out the differences between K2 blackpearl and K2 blackpoint. For that information browse to www.k2.com.

This book is concerned with the transmission and reception of Latin literary culture in the early Middle Ages, and with the production of Latin works in Ireland and in Irish centres on the Continent. In these articles, Professor Herren deals with several closely related themes: the introduction of Latin into Ireland and the study of Latin literary heritage; the language and metre of Hiberno-Latin writings; and questions of dating and authorship pertaining to a number of crucial texts, from Columbanus to John Scottus Eriugena.
