TURNER GOOD

In His Father's Shadow, Updated Edition Springer

This is the second edition of a textbook covering the Zimbabwe O-level Science examination. In line with the syllabus, the five major sections have been retained, while activities have been integrated into the relevant topics. Examples in the book relate to Zimbabwe. At the end of the book there are questions taken from past GCE O level examination papers of the University of Cambridge Local Examinations Syndicate (UCLES). These have been updated to reflect recent changes to the syllabus and styles of question. There is a comprehensive glossary of terms which provide support for study and revision.

Developing Science, Mathematics and ICT (SMICT) in Secondary Education is based on country

studies from ten Sub-Saharan African countries: Botswana, Burkina Faso, Ghana, Namibia, Nigeria, Senegal, South Africa, Uganda, Tanzania and Zimbabwe, and a literature review. It reveals a number of huge challenges in SMICT education in sub-Saharan Africa: poorly-resourced schools; large classes; a curriculum hardly relevant to the daily lives of students; a lack of qualified teachers; and inadequate teacher education programs. Through examining country case studies, this paper discusses the lessons for improvement of SMICT in secondary education in Africa.

Refugee Learner Experiences. A Case Study of Zimbabwean Refugee Children Springer Nature

Much attention in late-developing countries is given to providing access to studies which allow school leavers to enter science and technology-related careers. This book reviews research related to the crucial dimension of epistemological access to the disciplines of import, which students need as much as institutional access in order to improve their chances of success. A significant feature of this collection's research studies is that their empirical bases are highly localised, covering areas such as research methods, access, curriculum, instruction and assessment, and the relevance of science and mathematics education in Zimbabwe, Uganda, Swaziland, South Africa, Namibia, Malawi, Ghana and Lesotho. It is the outcome of a doctoral research capacity-development project,

the Graduate Studies in Science, Mathematics and Technology Education (GRASSMATE).

This book deals with several issues linking immigration and social development. Following several approaches, from economic to sociological ones, it covers the many effects of the rising phenomenon of immigration. It deals with the effects of immigration on economic growth, on human capital accumulation, and on the government budget. Moreover, it also includes contributions on the social integration of immigrants and on the effects they have in some different cities. It covers studies in countries such as Norway, the USA, Romania, and South Africa. The book *Immigration and Development* is an essential reading for those who want to get a social sciences multidisciplinary approach to immigration as a social phenomenon.

The book includes seventeen excellent researched and documented papers that reflect the diversity of thought, ideas and experiences related to IWRM. They draw from an extensive, inclusive and geographically representative range of theoretical propositions and practical examples. These include the implementation status of the IWRM concept at local, basin, regional

and national levels; its appropriateness for the twenty-first century; main implementation gaps from the institutional, legal, policy, governance, management and technical viewpoints; the likelihood that IWRM's entrenchment in laws, regulations and policies has led to smoother implementation and the reasons why that has been the case; reflexions on whether the attention given to IWRM is pushing other alternatives to the policy periphery; and the new conceptual constructions that can be put forward for discussion in the international arena. For the development and water communities it is imperative to debate and reach towards more illustrative conclusions regarding whether the promotion of the IWRM concept and its actual implementation status have been beneficial for development and how the notion could evolve to achieve this end. In-depth objective and constructive discussions, arguments, proposals and ideas are put forward for analysis by all interested parties. The book has the objective of fostering scholarly exchange, encouraging intellectual debate and promoting the advancement of knowledge and understanding of IWRM as a concept, as a goal per se and as a strategy towards development goals. This book was published as a special issue of the International Journal of Water Resources Development.

JORIC. IGI Global

This book provides an overview of the space sector in African countries, from a legal and policy point of view, analysing how the African Union's Space Policy and Strategy (ASPS) is implemented and highlighting the various space activities in each country. Against this backdrop, it investigates the ASPS, identifying its policy goals identified and discussing its strategy. Moreover, it explores the on-going regional cooperation programmes, the continent's leading space actors and their roles, and the space-related regional fora and organizations, reflecting on various initiatives, including the African Leadership Conference on Space Science and Technology for Sustainable Development (ALC), the Regional African Satellite Communications Organisation (RASCOC), and the African Resource Management Satellite Constellation (ARMS-C). As such, it is a valuable source of information on space capacities in African countries.

Expanded access to and improved quality of secondary education in Sub-Saharan Africa are key ingredients for economic growth in the region This Secondary Education in Africa (SEIA) synthesis report makes this point by bringing together a significant volume of analytical work sponsored by the World Bank and by many African and international partners. 'At the Crossroads: Choices for Secondary Education in Sub-Saharan Africa' argues the case for broad and equitable access for a basic education cycle of 8 to 10 years, as well as for expanded education and training opportunities. This book provides a timely resource on good practices and potential solutions for developing and sustaining high quality secondary education systems in Africa. It includes the main elements of a roadmap to improve Africa's secondary education systems' response to the demands of growing economies and rapidly changing societies.

Handbook of Research in Science Education in Sub-Saharan Africa Routledge

Zimbabwe's guerrilla veterans have burst into the international media as the storm troopers in Mugabe's new war of economic liberation. In this book, Norma Kriger gives the unfolding contemporary drama a historical background, and shows continuities between the present and past. Between 1980 and 1987, guerrilla veterans and the ruling party colluded with and manipulated each other to build power and privilege in the army, police, bureaucracy and among

workers. Both relied chiefly on violence and appeals to their participation in the anti-colonial liberation war as they sought to vanquish their then political opponents. Today, violence and a liberation war discourse continue to be salient as Mugabe's party and its guerrilla veterans struggle to maintain power through land invasions and purges of a new political opposition. This study gives a critical review of guerrilla programs and the war-to-peace transitions literatures, thus changing the way we view post-conflict societies.

Science Teachers Association of Nigeria Springer Nature

This study is a presentation of Zimbabwean refugee learner experiences. Children escaped political persecution and economic problems which affected Zimbabwe in the year 2008. Many of these children were abused and witnessed traumatic experiences, their close relatives and neighbours being executed in cold blood. This study was guided by three critical questions: i) who are the Zimbabwean refugee learners? ii) what were Zimbabwean refugee learners' migration experiences? and iii) what were Zimbabwean refugee learners' school experiences? The study employed Bronfenbrenner's Social Ecological Model as its overarching theoretical framework. Each stage of the refugee experience was described at each point in time.

Some Case Studies from Africa Psychology Press

The majority of people in Limpopo river basin depend on rainfed agriculture. Unfortunately the Limpopo is water scarce, and parts of the basin, such as Zimbabwe's Mzingwane catchment, are under stress in terms of agro-ecological and socio-politicoeconomic conditions. Integrated Water Resources Management (IWRM) has been adopted in the river basin i

Shelfmark : *Bulletin of the National Free Library of Zimbabwe* Springer

This book describes the importance of water resources for socio-economic and ecological development including geomorphic and ecological environments. Hence, conservation, management and development of water resources have become necessary for the all-around development of global populations and the environment. It is the outcome of valuable contributions made by eminent scientists and research scholars who have developed alternative strategies, solutions and models for sustainable water resources through research, monitoring and experiments varying from regional to global scale. This book is of immense use to the policymakers, environmentalists, ecologists, academician, research scholars and people in general

concerned with water resources management.

Proceedings of the ... Annual Conference and ... Conference of CASTME Africa Anchor Academic Publishing

This book discusses Hong Kong's use of onscreen marking (OSM) in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive, coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high-stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Validating Technological Innovation Springer

A psychological profile of George W. Bush describes how his privileged childhood became an obstacle to his political ambitions, his efforts to transform himself, and his passion to change America and the world by promoting the nation's best attributes. Reprint.

The African Book Publishing Record CRC Press

This course covers the objectives of learning and understanding science specified in the Sierra Leone junior secondary science syllabus. There are three pupil's books, each accompanied by a teacher's book, which provides teaching notes on each of the topics and answers to the exercises.

Register of Educational Research in the United Kingdom, 1992-1995 UNESCO Regional Office

Through country case studies centred around Sub-Saharan Africa; this book provides critical insights into why science and technology should be popularised; what and whose science and technology systems should be introduced and promoted; and how science and technology should be implemented and practised.

Guerrilla Veterans in Post-war Zimbabwe Ministry of Mines Environment and Tourism

This volume is concerned with inequalities in access to science and technology education and with the quality of the education provided. It is particularly focused on the effect of gender in all aspects of science and technology education, with a special emphasis in Africa. The book is intended for science educators in universities and colleges, especially those involved in teacher training and curriculum planning. Ministry of Education officials and science and technology teachers.

The State of Zimbabwe's Environment, 1998 UNESCO

This latest volume lists all the major research projects being undertaken in Britain during the latter months of 1992, the whole of 1993 and the early months of 1995.

Some Developments in Research in Science and Mathematics in Sub-Saharan Africa Routledge

This book addresses major sociological issues in sub-Saharan African education today. Its fourteen contributors present a thoroughly African world-view within a sociology of education theoretical framework, allowing the reader to see where that theory is relevant to the African context and where it is not. Several of the chapters bring a much-needed cultural nuance and critical theoretical perspective to the issues at hand. The sixteen chapters thus aim to be of interest internationally, to those who work in such fields as social and political foundations of comparative and international education, and development studies, including university professors, teacher educators, researchers, school teachers, tertiary education students, consultants and policy makers.
