The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic *Automate the Boring Stuff with Python*, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation,

as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any size
- Split, merge, watermark, and encrypt PDFs
- Send email responses and text notifications
- Fill out online forms

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in *Automate the Boring Stuff with Python, 2nd Edition*.

Join the technological revolution that's taking the financial world by storm. *Mastering Bitcoin* is your guide through the seemingly complex world of bitcoin, providing the knowledge you need to participate in the internet of money. Whether you're building the next killer app, investing in a startup, or simply curious about the technology, this revised and expanded second edition

provides essential detail to get you started. Bitcoin, the first successful decentralized digital currency, is still in its early stages and yet it's already spawned a multi-billion-dollar global economy open to anyone with the knowledge and passion to participate. Mastering Bitcoin provides the knowledge. You simply supply the passion. The second edition includes: A broad introduction of bitcoin and its underlying blockchain—ideal for non-technical users, investors, and business executives An explanation of the technical foundations of bitcoin and cryptographic currencies for developers, engineers, and software and systems architects Details of the bitcoin decentralized network, peer-to-peer architecture, transaction lifecycle, and security principles New developments such as Segregated Witness, Payment Channels, and Lightning Network A deep dive into blockchain applications, including how to combine the building blocks offered by this platform into higher-level applications User stories, analogies, examples, and code snippets illustrating key technical concepts [Get Ready for the Code A](#) Createspace Independent Publishing Platform There is truly something for everyone in Italy. Whether you desire a delicious meal and bottle of wine on the Ligurian coast, a wonderful night scene set among ancient ruins, or the romance of a gondola ride in the Venetian canals, Italy won't disappoint and will leave you craving more while simultaneously expanding your waistline! With some feeble attempts at humor and a little bit of personality, my travel guide has been updated for 2016 and explores three of Italy's top destinations: Rome, Venice and Cinque Terre. I provide my best budget saving tips on trip planning,

accommodations, transportation and sight-seeing. Pictures of each sight are included to help you navigate and experience all this country has to offer. The road less traveled certainly is the most rewarding. Happy and safe travels.

The Earth is in ruins. Cities and nations destroyed. Mankind is extinct. Brant and Arsha are synthetics, machines made in the image of people. They dream of bringing humans back into the world and have the technology to succeed, but the obstacles in their way are mounting. Not only are their own conflicting ideals creating a rift between them, but now the sinister Marauders are closing in as they seek revenge on Brant. Out in the wasteland, strange lights and mysterious objects in the sky herald the arrival of new factions that seek to control the region. Even in the once quiet streets of their own city, malevolent forces are beginning to unfurl that threaten the sanctity of everything they hold dear, jeopardising the future that is within their grasp. A graveyard late at night wouldn't seem like the ideal place to meet someone. But for teenager Katey McCoy, that encounter with the handsome stranger with the striking blue eyes would alter her life in ways she'd never imagined. Orphaned as an infant, bounced around foster homes, labeled as a discipline problem, and now under the thumb of an abusive foster mother, Katey's been slipping deeper into

depression. Who would want a girl with such an ugly face, an imperfect body, or wild hair? But Logan Keith knows the truth about Katey: she's beautiful. Her flaws are in her head. Besides, he has issues, too. And a secret that could tear apart their growing relationship. Logan is a werewolf--a loup-garou--with his own troubled past and a flaw that's considered a handicap in his world. A secret, supernatural world he soon introduces Katey to. Although Logan longs to make Katey part of his pack, it may be impossible for them to be together. In his pack's history, there's never been a female werewolf. No woman has been able to survive the transformation. Will Logan's desire give Katey the escape to a better life and the love she's always dreamed of, or will he be signing her death warrant?

This is a solutions book that shows how to organize and structure a classroom to create a safe and positive environment for student learning and achievement to take place. It offers 50 procedures that can be applied, changed, adapted, and incorporated into any classroom management plan. Each procedure is presented with a consistent format that breaks it down and tells how to teach it

and what the outcome of teaching it will be. While all of the work and preparation behind a well-managed classroom are rarely observed, the dividends are evident in a classroom that is less stressful for all and one that hums with learning.
