Be able to successfully "do" both monohybrid and dihybrid crosses. Understand the labels P, F1, F2 in reference to various genetic crosses. Study Guide: Mendelian Genetics | Biology I Augustinian monk Gregor Mendel developed the science of genetics. Mendel performed his experiments in the 1860s and 1870s, but the scientific community did not accept his work until early in the twentieth century. Because the principles established by Mendel form the basis for genetics, the science is often referred to as Mendelian genetics.
